AUTHOR-PUBLISHER COOPERATION

The personality of the author, together with his achievements, honors, and outstanding biographical facts, are always of interest to people who read books. We are being called upon, usually without any warning, constantly and from many sources, for detailed information in these fields; and of course the only time when such information is worth anything is at the very moment when it is requested! Therefore, if you'd be willing to help supply this information, and in other ways cooperate with your publisher in getting the widest possible public knowledge of your book, your effort would be much appreciated.

PLEASE LET US HAVE SEVERAL COPIES OF RECENT PHOTOGRAPHS--FORMAL, INFORMAL, OR BOTH.

PROMOTION ACTIVITIES

What points do you consider should be emphasized in the promotion and advertising of your book?

In your opinion, what special markets, regional or occupational, does the book have?

Are you willing to lecture or appear on the radio in connection with the promotion of your book?

Would you be willing to write an article or two for the Trade Press, if you thought it would help the sale of the book?

What cities, communities or localities will have a special interest in your book?

List booksellers or bookshop employees you know personally:

Could you give us a list of people who will help promote your book, indicating any whom you know personally?

- a. Editors
- b. Newspaper men
- c. Radio broadcasters
- d. Interviewers
- e. People interested in your work
- f. Reviewers who would be interested in receiving review copies

Are there any special groups who have mailing lists of their own which you believe would be interested in circulating the information that your book is now available, and whom you believe would permit us to use their lists?

It is often necessary to prepare information for our sales force many months before a book is published. Information about a book sometimes has to be written up long before the promotion office sees a copy of the manuscript or any galley proofs. That leaves this office in a quandary, and this is where authors can be extremely helpful.

Since you know the contents of your book better than anybody else, it would probably be easy for you to let us have roughly 500 words of factual information about the contents which can be developed by this office into jacket copy for the front and back flaps.

Can you also let us have about 300 words of quotations from the book--quotations which in your estimation are characteristic and provocative? When a salesman is visiting a bookseller whom he perhaps will not see again for some months, information such as is requested here can actually make it possible for him to sell the book in advance of publication....
