Only the day before your letters came I spent the night at Pycombe Corner, an and there was a huge crop of American mail. But when I got home the next day, yours had arrived, too. And it was so good, Dicki, to have them. And to feel the mood and atmosphere of that speech in Oberlin and Oszi (fullthroated), and to take some part, to get a glimpse of your work, and to feel the denseness of those hours when you waited for the Election returns, at Oberlin. Believe me, it was exactly the same over here, and I got it in Norwegian , before the 7 o'clock news started, and I believe there was just nobody in this country who did not understand the paramount importance of Roosevelt being elected, and who did not have a deep distrust of Willkie. There are so many little things I wanted to tell you, and there is so little time to spend in writing. Well, I have seen Irene, and she has got her job. But it is hard work, not badly paid, but paid by day(at Al) so that it will not average out very nicely in the end. She is a "rechercheuse" on some food-inquiry. It is being run not only on the lines eleborated by the Institute of Economic Psychology, but the Institute is there too, in the flesh.

Anyhow, Irene is very happy, And we spent a lovely and very long evening talking of all our friends and kids. I saw Aurels

p.c. from Lisbon and listened to Elisabeth's epic letter which she sent to her sister, describing their fates and final escape. . Of English friends the finests show is being put up by Ted Edwards, who joined a balloon barrage as a private and who thinks, dreams and acts exclusively in terms of balloon-barrage crews, their meeds, comforts, amusements, whims, ideas (if any), and, in short, their lives. He writes interminable letters, every day, about this to his wife, who sends them on to a relative of Teds of Dunkerk fame, and military distinction, who made them the basis for discussion among young officers in training .and smon Jos Others, like the Muirs, lead a strange kind of life, a life untouched by the war, since their town is utterly untouched. So they are in a great number of activities, (ranging in literaryness from 50 to 100%). Phyl Wood, sticking to her pacifism and her poetry, is an LCC ambulance driver, on duty for 8 hours in every 24, in the deadly London blackout, among the bombs and the barrage. Sydney is evacuated and they have heliale swim Monfala been badly bombed there. And Phyl. of course, had very trying exhib ods vrimes sint at periences. - I have lunched with Margaret Wrong, and also with Monica. misd listseeon And I lunched, very properly at the Army and Navy Stores, with a Major in his Majesties Forces. He looks very grand, but is still a little shy and always forgets to salute . His book is out and had a very good reception indeed. On the titlepage of the book he is described as D.W.J, etts, Late Major, Spanish Republican Army Medical Service. When the book came out, he was promoted a Major in the British Army. And Tomorrow I will have lunch with Jani, who is up to London for his exam. So you see, that all things here mature, if a little slowly, and to wind tommer amind of but eventually they do mature.

Now about Edith, You know, that she took up a job in Rugby. Soon she started caughing very badly. The Labour Exchange withdrew

Emergency Hospital, the permit to work, and she was sent to Hospital (Low Hillmorton Rd, Rugby), where the doctors declared that she is a TBC case. She protested in vain that she was not. But, eventually, they condescended to make all the tests, etc. So far the X-ray has been taken and naturally does not bear out the TBC diagnosis. We must hope that eventually, it will become established that this is not the illness she suffers from In the meantime W I have started an elaborate plan to get her overseas. Margaret Wrong has undertaken, as a Canadian, to go and inquire personally in Canada House whether they would let her go to Canada, provided that some guarantees coyld be given that Robert comes to Canada to marry her there and take her with him to U.S. The whole plan may involve the finding of hospitality for at least one of them and it may be the more workeable plan to have Robert go there, and then, when he is alreade there, get her to sail. This would prove to the Canad Government the bona fides of the case. Mammin I have undertaken to write to you about the whole matter and to ask your considered opinion about it, especially as far as Robert's person, possibilities (re-entry permit, etcetera,) are concerned. I think you should at once wi write to Margaret (56, Temple Fortune Lane) what you think of the matter It is quite clear that there is no objection here as to her leaving. There is no objection in U.S. as to her immigrating as the wife of an immigrant. So the question is how to bridge over. The Canadian Government will want some kind of assurance that it is a bona fide case, and that there is no danger of Edith staying in Canada. Of course we do not know whether the difficulties are surmountable, but Margaret

seemed to be quite hopeful.

My love, I am very sad about Nenko's plight and, of course, completely helpless. One thing you could do would be to let her mave the second insurance policy, if that has not lost its value. I will make a search for it as soon as I possibly can and send you in my next letter its number and description. And, of course, you should set her mind at rest about that family silver. Kari would be absolutely furious if she heard that old Nenko is undergoing privations in order to save the family silver for her. And I would heartily agree with her, and always took that line. As to the family, nobody in his senses would ever trust Piki with any money, but Laczi is all right, and absolutely correct and punctual. He seems to me quite the proper person to take charge of matters, and he may be able to be helpful to Nenko.

I must go to sleep now, it's getting late. But I will scribble more on it to-morrow.

Here is also a little note from Karo with very wery much love to you. My darling Dicki. I must post this now. I own always with you.

My sweet heart ,- this is a semi-business letter , so as to clear up a number of things which maynot deed it, but, you know, it is better to keep on the safe side. (21, xii. 40) (1) When I cabled about Canada, the idea was this: You had written (just after the thrid degree episode) that the seas are getting darkand that the prospect of meeting again were remote. Now, you did not seem to have meant exactly what you said. I understood this to mean that sailings were getting unvertain or even impossible, and so I cabled that you should come to Canada soonand not wait for U.S. immigration unutanvisas. You took this to mean that there were difficulties my end. The opposite was the case: It had become clear that itisonly a questionof time and nut much time at that I should get my visa and whyshouldyou therefore not wait in the mean time in Canada?

Still , I had already before that, said that if not otherwise , I would come homeagain. Now you seem to have meant this num to imply that I wasfailing to get a job/thisend. Theopposite was the case: I simply wanted to provide for all possible contingencies induding the one that you wouldnot sail or were not permitted to. Now in such a case, I thought , you would like to know that I would mply go homeagain irrepse tive of whother I had a job here ornot, if only I got a boat this end (which seems to me always easier than the otherway). Of course, when I cabled about Canada, I did not know what the exit permit position for Britishers was (thatkindofthing you cannot know here). Upshot: I causedyou a lot of unavoidable pain, but incide tally the lovel liest things happened: you said I should come home if I fail here, which was teribly sweet of you (actually, I was better off than ever). I had meally onlymeant to speed up matters, if that was possible, for I was nomore benefit concerned about the finance nor about the reisks of the vista, things going well.

(You could not ofcourse know that cables to England are nowneither confirmed nor returned here; more over cables from England are sometimes delayed .e.g. you Xmas cable filed in Shor ham the 23. arrived 27. Consequently one cannot know whether a cable from England is or is not an answer to parts, if the has been sent resonably close. The own may not have arrived; it may have been garbled; etc; thus unless the English side confirms the cable unmistakably, it is not possible this endto be sure what is really in the minds of the other side. This accounts for a great deal of the unavoideby dable misunderstanding.).
The quact position at this moment is , that (a) my visitor's visa is going to be prolonged another six months; (b) the German quota - to-days information fromWashington; is actually already free (I hope bothKari and you have applied in order to get favorable placement; in order to give Kari and you claims on your own); I myself will apply un er this new situation for the regular German quota (this in no way copllides with the non- guota vi sa); I will use Maust's affidavit and affidavits of support finomometram of Peter's and others; you should have Sanyi's - please wime if you have neural recieved it, also I will send you affidavits of support). (c) I continue to urge my non- quota - visa as that isalso linked with the Rockefel feller Fellowship, which I need for my work. I of course now know that the exit permit requirement is that of permanent residence on a 2 years bas You had never informed me about the sailing position - for obvious reasons and that was one of the causes; of themix-up, as I assumed that there might be no sailings at all. From Nenko : Sanyi had letter from nonno of 15 th Dec. She has recieved the moneys, she isg thinking of going to Hungary; the letter is as alwin and lovelyas aonly she can be... She had not yet recieved the Hungarian let But I hope she will, soon. I will sendher the insurance sums . Thanks for thinking of it. Who is a fee 124/42 as arrive, love! Bennington, Vt.

Ilko my birdie, at 6 p.m. , we were told , you would be list fening in to the Inaugural , and I , sitting in my study at 12 a.m. , felt the joy , the pride and the elation his words would bring you. The background of it all, is the absence of the skeletons; inhe cupbord which populated the European scene in comparable periods of history. Also there is this: One can take it for granted that in the packing-room of the College, in the store, in the garage, in the tool house and sneds everybody unindication alistened in , all those who are manual workers , for it was to them that their President spoke, primarily and formostly. It is more like a Cardenas ora Camacho speaking than the late Neville Chamberlain.

My friends, the Kouwenhovens, have gladly offered to give usan affidavit of support, and it is quite probable that Mrs. Kouwenhoven's mother will do so too, and she is a very substantial person. All these papers will reach you of course in due time. I will apply simulataneously and concurrently for the quota and for the non-quota via and will request to be granted that which comes through sooner. From the point of view of permanancy of residence, there is analy probably no difference between the two.

I have nowsettled down to reading and notes, and am doing mre of both to than perhaps at any time since 1920. This is inpreparation for my course next semester and also innu for the plan of the Book, which I am now owrking out in some setail. Still, I will wint for the decrision of the Rockefeller Foundation before setting it up ina finalform, for so muchdepends inthis resepct on the extent, the character and the circumstances of the final publication. Retail, this is a great occapsion for getting into American Political theory, sociology, secial philosophy etc.

Human beings are very very nime to me, so mydarling and own, you will inferthat I am notunhap py but doing well, for only then do people usually like you. I am perhaps plaguing t them a bit with my permanent and unistiting efforts to interest them in you and Kari, but they seem notonly to understand but actually, I am quite sure, tounderstand you both, insofar as I allow them an insight.

Please let Misiknow that Mausi and I discussed the details of the film sagenda and that I for one am satisfied that it is rightly handled by all concerned. The love to him -

If suppose that the plan of leaving Holly Place for the Huts has not progressed far and that you find it now much more convenint onaccount of your believed the stay in Shoreham than tomove to Wrotham. I am of course always in agreement with anything you should decide upon, evenitiated move from tholly Place, but frankly, I see very little point indoing it on minumal financial grounds. I need not say that the Huts are not a very healthy place place, but, I suppose, you would actually live in him Tony's former toom. Well, do just as you like, my darling, but as you asked me. I answer ed. It was lovely to have Nenko's letter and to know that she has how received the sums. I sent several cheques myself. because I thought, that I was intthe position to do so and that she needed mee than Sanyi but ould afford. I sent the Cheque to Sanyi, who added it to his own countribut butions.

The intellectual and *pirital bancruptcy of the progressive world is great in this country than anywhere else in the world. That is why my'Essence of Fascism 'is againin demand here, and why I feel that I maystill be able to

hand you for wengthing, - for all I save the works.

34 I. 141. My heart: I just had a cable from you which I must take with caution so as not to mike a mistake for joy. And so I will fix you onmy mind though by the time you get this letter, minewill almost containly be quite out of date. But I have nowle rut that eliptic correspondence may be dangerous in times like these, because it is impossible to find outwastmay or is may not be in them not of the other which may be utterly unknown to gets self-

(6)So let me be precise: Your wire runs: No quota restrictions in operation shipping sole difficulty tryingall/ I can possible cargoboat (6)stop up to college standards. Ilona Polanyi MLT 23 Jan. restrictions in operatio

(a) 'Up to College standards to maybe an answer to my long letter on this subject or to mycable sent the day before yesterday inwhich asked for a cable on your part in the following terms: 'please cable quote ready to accept academic position in America as lecturer for thysics at deathem tistics unquote Karl Polanyi. In either case The it very useful; the I did not tell you, buttle fact is that Bennington College is inneed of a Lecturer and the inquiry was made on my part on behalf of President Leigh. Should yoby the time you get this following think it unnecessary to do anything about it, then that is alright. But should things not have changed at all, it might be wise to letme have the cable asked for by this may not be unavoidable).

(b) Literally cube Literally the would mean! that you come as soon as you can get a boat.
But what about the Exit permit? There is no mention of it in your cable.
I amnow going ahead with my own immigration visa, of course; and you may have meant that assuming I get my visa anon, you can join me as soon as you get a boat. Anningmentingningmentingning open There are of course an infinite number of their possibilities, but none that we are used to consider (e.g. enough persit being eranted on the strength of the vice, which would be quite unusual.) So I anfrankly puzzled, although the most probable explanation remains that you merely wished to confirm what I cabled you about the regular quota being free and that you have applied, or, rather, that an application is not needed from the quota punning being nut in operation for the time being. This means that restriction, you are now free to book a berth if you can get one and then applied the confirmation. you are now free to book a berth, if you can get one, and then apply for an exit permit, if by that time I have my two years residence here. I suppose that the latter must be borne out by an immigration visa on mypart (quota or non- quota); or did you mean that that is unnacessary? I proceed, of course, on the assumption that it is not only necessary but the one and only urgent thing forme to procure just now. Should it be otherwise then it might be a badwistake not to have clarity about it. E.g. what if the British authorities merelyask for the certification ofmy two years job (whichas you know I have just been appointed to at Bennington) In that case , Dr. Leigh would at once cable them about my appointment, and you might get the exit permit. (Please don't assume that I am endutting inthiskind of wishful thinking woomally; I morely that I am endulying inthiskind of wishful thinking woomally; I morely mention this possiblity because nothing is quite impossible in emergencies and it is better you know exactly what kindof uncertainties I am envisaging because that unhauman interpretative value hateron). It is clear to me as I am writing have some that all of these points will be cleared up (by on his or atherwise) within a week, at the latest. Still, I now feel that I cannot be too explicit. (Incidentally, I had a delightful answer from Bandi on the position in Canada; he hastried to find out by all means whether Britishers areor arenot allowed to enter, and finally advised me to elel you that you should inquire at Canada House, Trafal gar Square, London, for he is unable to make sure of antiying in Canada! That is what things are like, so you know). All this is of course obvious and infact quite as it should be, but takes it difficult to carry on a correspondence unless one is prepared to be very explicit. espondenceunless oneisprepared to be very explicit.

His adden is: Ander Kenneny, 35 Rochester Avenue, Canada.

I will inquire inNew York about the position incase there is some startling change in the thole immigration position in sofar as British women and girls under 18 are concentred. Of course, in this letter as always, Kari was included in the term 'you' but an this anapoint; showing the box of the course of the course

The state limit is it is in structured and the state of t transmission and possible -though, as Inow believe, infrequent delays-one on never be sure whether the other side didors didnot get a cabbe and in what form it was delivered . : Eventually, I mang Drucker's inNew York and Doris, who was in promised that shewould enquire at the Sonsul te General Doris, who was in promised that shewould enquire at the Sonsua te General to findout about the require ents, the mainpoint being this: What proof does the Home Office require of my permanent residence on a two years basis in this country as a prerequisite of iss uing an exit permit to you both?).

I enclose a Personalia of myself, just inorder to giveyou an idea. It is theone I am using with authoritesing general, not of course if There is a residence of the proof.

a need for more specific information as e.g. with the Rocket ller crowd.

Unfortunately the splendid solution of numbering our vables is impracicable at the juncture. But I will describe them by the date, infuture, and cortainly, it wise to acknowledge cables, at leastnahunnink Minstering to them.

So we ended up lastnight by reading the Sonnets, my favorits (No longer mourn for me ... That time of year thou mayst imme behold... And: Expense of spir t ina waste of shame .,,) John is awriter; much his mainproblem is the meaning of America. I drew his attention to Dostoewski's Pushkin speech and also to Goethe's everlasting efforts to find form for Morado lie and thought whether in Hindu, in Antique or in French tradition. The John-problem is that of the "ussian Narodniki-(in. Dostoewski) when faced with Turgenjew but also Herzen or Lawrow. In America it is the Mark Twains, Walt Whitmans, Melville, and Hawthrones and Emersons including the weaker offshoots (Lewis Sinclair, etc.) who represent the Narodniki strain of obympic journalism, as I would all it.

I amworking now finely, in a house of my own, (notinthe beautiful but berren guest suite anymore) andreading up all the sources and rooftsof Amercann existence. The library is at my disposal and it is a good one. And I ammade tow ork beause people think I shouldtell them about things.

(Dont dream of preparing separately for teaching junion physics or mathe matics, orgoing out ofyour way inany respect. If theywant you here, it is exactly enaccount of what you are, and that the that. Also I have given an accurate description of the interruptions of your mentations under which they may be, and also of the practical acops of your workst various times of life. So that is exactly as it should be a categories of the constant of the consta should be).

Who long his brishe! Re Dick.

My two birdies, surely you will find out how much I want you to feel the intense, incessant thinking that is going on in me day and feel the intense, incessant thinking about you. There is no avenue of thought I have not followe night, thinking about you. There is no avenue of thought I have not followe up; my sweet love of you both has made me understand many many painful conflicts, many many unbearble tensions, and an endless kindness with whichyou are getting over the day to the life beyond it.

This is the 25th Pebruary, more than afortnight since Ilko cabled tast your case was under consideration and that she was moderatefly hosful. Almost together with it came letters VI and VII (28th and 30 th January) explaining clearly the background of the ferror cable which was conswhat more ing clearly the background of the ferror cable which was conswhat more hopeful and which made me so very a tive; in order to do what I could to help. There was one slight misunderstadning: Onaccount of the previous situation which had been the case all along, I thought that the phrase situation which had been the case all along, I thought that the phrase need your affidavit and evidence of your appointment referred to the American Consults General. There we no hint that it referred to the Homest Office—this I found out only from your letters VI and VII. But surely office—this I found out only from your letters VI and VII. But surely were well-able to get copies of the official material at the Consults for home Office use. When I realised the true position, I cabled about my new extended invitation from 'Intered' to lecture and later, I debled, to ask whether anofficial coef irmation of my permanency coming from the to ask whether anofficial confirmation of my permanency coming from the British Consulate General in New York would be desirable. Such a step must be taken personally in New York and should be taken only on the bat is of anexplicity request to this effect, even though it as me only from the party concerned. As I had no answer to this cable, I take it that I should not proceed. Of course, my suggestions were all made of random. I don't whom what the exact situation is, minnonnean and leave it to you to decide: until now I always felt that you had given me sufficient information decide; until now I always felt that you had given me sufficient information (except for the fact that a letter mitches got lost in which you stated explicitly the conditions of Exit Permits work of knew not what special conditions were attached and, anyway, what they were at the fine)

I have now (some time ago) applied -for grant of privilege of menument pre-examination in Washington. Miss Dunlap has written to Studebaker; askinghimto speed it up, He remembers me well, and will probably do the trick. Then I will have to take some other steps, but finally, to certain, I will be granted an immigration visa, preferably non-quota, or perhaps 'quota'. (I need not decide about that until a laterstage; or perhaps 'quota'. (I need not decide about that until a laterstage; I amm intend to ask for a non- quota minem visa; but e.g. Gergely has bee informed by the Montreal consul (American) that if he cannot give him non- quota visa, he will grant hima quota visa.) Legally the diffrest is small; but on account of the eventual acceptability to the Home Office I ninammannamm always had the non- quota visa in mind even after that of which made quota visa available. (Whether they are still. I do now know but believe that it is the case). I have of course, applied for extending the straight; then the stage of stay also, in time and that also isentirely in the straight; then refers to the extension of my visitor's manning my request. Which lapsed on the written to the Department inquestion, documenting my request. to the Department inquestion, documenting my request. 1 001 Misi

Not well tong thought, deep happiness and hope made me wait annhongnan to tell you what it meant to me that you thought you might now help me in my you what it meant to me that you thought you might now help me in my work, -- work together, in spite of some differences, which are not easy to state to-day. And you will behappy to hear that, never in all my life, not excluding the last three years, have I been working as purpose fully, and with so much self- restirction and conviction of the worth ofmy efforts than in these last two months of stress and strain. I was getting in touch with American work and thought, one braod approach. And at the same time, I formulted by the Planofmy book for the Rockefeller Institute which has it nowunder consideration. Walter W. Stewart, now at Princeton the Institute of Advanced Studies, at Princeton, suggested that I might have to describe the state of Advanced Studies, at Princeton, suggested that I might have to described the state of Advanced Studies. of Advanced Studies, at Princeton, suggested that I might have to do a part of the work at Princeton, at their Institute. But the main job, of course, would remain to be done, at Bennington. The Rockefeller Foundation has now the two years grant ineid for me under consdieration. It would amount of course to somewhere about 2400 dollars ayear? Unfortunately, I couldnot use this sum in my affide its, because it is not yet afact. But actually, it is all mern in a good way. I may visit Stewart in Princeton, some of these days. He is at the same time head of the Foundation (Rockefeller) too. So My prospects are wuite good, bananan as Willetz, the Rockefeller Foundation prospects are waite good, benefind as will to Leigh, he would leave all this to authority in charge of the grants, said to Leigh, he would leave all this to Stewart, the latter, asyou will notice, acts in a double function). You will be amzed to hear that, after all, the in scheme which seemed to smooth to be true has proved of utmost value and isnow salled the Theorem of the Four Instititutions! It consists of the substantial assertion that the economic and political, then ational and international formed four institutional spheres of relative independence, the imperfiece equilibrium of which undelies all the stresses and stains of the period. The four main stresses and strains are Unemployment, Currency depresiation, Imperialism and Class tension. These were actually in alterniative relations, like the arms of a balance. Strains and stresses were shifted from the one to the other, causing changes in the expression of the tension, but not really relieving it ever. What I had first used as a convenient sub - headings for the presentation of the I had first used as a convenient sub - headings for the presentation of the Ke contemoorary problems: turned out to be the key (the foundation stone which the builders had thrown away) to theunderstadning of the actual mechanism. And so now esverything falls into its place, and my partial theories about capitalism and the great trasnfromation find their frame of reference

There is achange in the Bennington end of your possible job here. It was originally a concrete possibility, but it is not so any more, at least not the time being, in the original form. But in this country, all this is even in flux. Kari has been definitely announced for Bennington, in case you came and she wanted to take up studies at this college, which is after one of the foremost in the States just now. But nothing at all has been done on this account so that, Karo love, you would be as free as before to do what you will and circumstances allow. (The latter, in America means almost anything you might wish to do.)

I amwriting all this in full knowledge of the warning you glave me some time ago ('was it letter V?), and the much graver warnings unn which come the Radio pror instance yesterday. You told me that you might be not ab to come; and I gather from the news, what coming might amount to. There is nothing, I feel, that I would not understand without a word being sallow I live and feel, what life means to me, what it is all about, you know that I now we have been strong in our love and confidence in one another. The time has come when we will need it most.

Ilko, my beauty, and my sweet Karo, the snow lies foot before my wooden house; my books lie ankle-deep on the floor; and last night I found passefages in the newest work on the Gold Standard which rackly chief donfirm! NAME my theories about the nature of the cataclysm. I have four girls and three facultry memebers in my seminar, and these are precisely the four girls I was hoping for , theablest and most serious ones. So Thursdays from 3-4,30 p.m. means now alot to me; I am systematically building up them meterial for my book, by delivering lectures so-to speak chapter-wise. They are not written them, and even if so, not in book form, still, they take matters a long step further. I have not yet deard from Princeton that is the Institute of Advanced Studies, buthope to hear from them soon. In themean time I have been asked to deliver a lecture at Princeton University on April 23 rd on Can Hitlerian so have the European Princeton University, onApril 23 rd on: Can Hitlerism solve the European problem? My answer will be on the lines: If he can conquer Europe and the rest of the world, why not? For nobody knows exactly what European problem means; but it is quite certain that it cannot be solved by Hitler he has also subjeugated America fired.

Into this snowy landscape and lovely quite wescay three letters came. Into this snowy landscape and lovely quite ***ciay* three letters came. one from old Nenko, a lovely one; one from Ilko, yourself, though really only a semi-copy of a former one, yet dated VIII (6th Febr.), and a glorious heartwarming epistle of Rosie's, with the smell and the feel and bustle of Helen's children and of John, of Jani and the cats. I am forwarding onika's letter to Sanyi at once for the correct addressing. I gathered from the first lines of the letter that Rosie did get from you Taonika's letter which Sanyi had passed on to me. Well, I hope so; as I hadnotread it, I could not make sure whether Rosie was answering it or not. It was longifietter, on blue paper (but I am not sure of that) and I sent it/mb/t/p/p/p// Sanyi's affidavit (Incidentally, no letter of your's together with sver gotlost: I had, later, the letter about Sanyi's affidavit and the one on our friends.)

Yesterday, your cable came about my having to have the government's of for taking permanent employment abraid. I have alle dy cabled Cri for taking permanent employment abraid. I have alreedy cabled Car for the consent of the Delegacy, and as soon as I have an answer, I was approach the Consulate on the Embassy, eventually go to Washington, and a second sound the Consulate on the Embassy, eventually go to Washington, and a second sound sound the Consulate of the aid for England , and in which case this is the only course to take. firmly believe that I should be given the government consent in questice on all accounts; however, I will find out more about it soon. Should you in the mean time had had dables from suggesting that you should ask Carter ight about it, orthe Master, this letter will help you to see my position better. How shall I tell you what that cable felt like to me Fortunat ly, I had been prepared for difficulities by your calbe of Lot, loth ('moderatelyhopeful'); still, there it was. And then your addition, your loving advice; my only one . We will both do our jobs, and Karo will go ahead with hers. This is the time when it is worth while the right thing. 14 th March, 1941. The post - birth - dayletter. sweet heart- now about my Course. It is really on my own persoal theory, and so week byweek I put a art of the stuff, neetlyworked out and authenticated, although not written down ff course. Yesterday's was the third, on the Balance of Power and on the miracle of peace in Europe under the HolyAlliance, and later - under Rothschilds! The long peace reign of the Haute Finance was traced, and of course also the costs of the system. I have four girls and three faculty: the one girl is the Huckleberry Twon', & wrote Kari about . She is the person who gave in a simple, very modest, and slightlyoff hand way a complete account of the 'time -experiment' to some others, in comversation. She is a hemist , a work student, reads only mathematics and Donne, the most through -going gamin' I ever met, even in this country. She is a Junior (harmadeves), the other three are seniors. Well, there is Margaret Jones, the most brilliant methodogical mind I have ever met in a minimum girl. She specialises in the postulative technique, and in the glove 'logic, authors although, as amatter of fact, I have not initiated herinthat article of waring. These two, I want to work together: Margaret should teach Char (thats Finn) what theoretical economics is. Then Margaret should continued to study economics and sociology under me, while har should not go on to actual econ9mics at all, but use her understadning of theoretical economics only as an additional help to master herscience method questions, as e.g. statistical methods, biological problems of method etc. The other two girls, are on the humanistic side: then their intrest is \$6141 social . The one of Swizz parentage , is very able; she worked during winter period in the editorial office of Harper's Magazine and helped collecting material for a work on 20 th century inventions. She inn is doing 1/ptpff her thesis with an economics professor on an American subject. So I have decided to give her the English and general slant on the problems of her thesis. I make her read Dicey (you remember my raptures!) and the Radice , I was sokeen on, as well as some provocatioallt erature such as Spencer's : 'Man versus society' or his epigone: Lippmann . Also I want her to read Mill's glorious Autobiography , and the Halevy (which is at Holly Place) building up a clear understanding of the intrinate connections between liberalism, individualism radical philosophy and uttatianism. This is the equipement she needs, I think. The forth girl very handsome, but she is the weakest. Like the Swiss parenage girl she is of wealthy stock (the other two are schol ship girls) interested in the progressive social movement I was the Swiss girl (who is fat and looks like a German hose ife , to con after her and coach her a bit. It will not be day to belo the bet me ed one, because, basically she has not a good mind. But he is so thou ly decent, and really wants to find out what Moral velu underly soci stion- that I a nnot let her down.

Ilona, letters are coming much faster and very regularly now; I know how your life feels; its glory, its unending help to me, and the sudden drooping of the spirit. Perhaps of all things I want you to know this with assurance: that every one thing you did on your wan was a help and a book boon to me. Not one step that I did not understand, indeed, very much more than that: that did not untangle or relieve or bridge something in my life.

The Lassalle Hof, the bridge, her little hand waving on the 1st 6 May. The bushes where you were hiding at night outside the Oppossum hunters shad the Biomalz and the A:28, and the window at Kingsview, in that strmy night, when you were iding home from Orpington. My daily visits to the hospital. And the waiting for news from her from Moll's. The shelter which you unlaoded from the drunken driver's truck (You are perhaps shelftering in it it in the woman at the Sandwich Bar knows how I love you.

Kari Mat/detided understood what we had decided to do, and you both were ment of the second s

There was a time when you feared that I might fail over here, and so you lovingly suggested that I could go onat home with your help.

But all this was superseeded by your growing concerns about our general position; that we might be doing the wrong thing altogether. And you decide ded to stay, with Kari.

When the news of this reached me I wasnot taken by surprise, for you had written to tell me how deeply you felt about it; nor \(\frac{1}{4} \)/ did I disagree. I was myself gravely concerned about the misudnerstadning which appeared to have arisen \(\), and which led to your calbe which was garbled. When I realise ed what its correct text was, \(\frac{1}{4} \) knew what line you would take, and also the that I had to go ahead steadily on my line, firstly because it was right, secondly, for our ownsakes. Aslong as we both did the right thing, there was no danger of our being unhappy inseparation. The suffer ing could be borne.

Both of us have the lives of bothof us in hur hands. Once or twice I felt the that it was almost too hard on you to ask you to join me; once I falt that it was right that you should stay. (That was when you decided to do so.)

Now I feel that you should join me, because the usefulness of your presence in England -unemplayed, inpoor health, over-age - did not justify anymore this course. I am doing grand work for England over here. You should both be with me. But, obviously, it is for you, on the spot to decide, what the concrete circumstances are. I need you and I cannot live without you; but I can die happilvalone if that is what we both should do. I do not think so now, and am prepared to take the responsibility (5 saying so. No fineal decisions are involved, except that of your working over here, and Kari getting a chance of studying in America. Perhpas we will live inkingsview or perhpas somewhere near it, later. I would have then done my bit of worlfor which I was preparing so many years. Whether shipping facilities

are avialable, is that must be clearly understood and different question altogether. I do not think that any unreasonable risks should be taken by you both. But that is a question of concrete facts, not of valuations. If the assumptions on which you acted in dedding to withdraw your application have proven void, then you should face this fact and say so. You will then feel happy and content again, as you felt when you withcrew.

As to the paper-side of things, I have no doubt at all that the P.O. was simply uninformed. The Embassy has informed Leigh that his communication in the name of the College on behlaf of my stay is being given attention. In the mean time, I amputting off my trip to Montreal, as I do not know whether there is any reason for me not to accept the offered quota visa. But all this is secondary andentirely sub/sidiary to your own decision.

I do not think that I have missed any of the numerous connections between the difficulties which appse and your own line of action; in effect, I tend to assume that at least mabjectively, if not nhim also objectively, that line alone opened up the way to solutions. I have given much thought to every possibility that I could gaage, and always trid to account for a number of factors which I would not possibly have knowledge of, but which might presumably enter into the picture and make determine its character. This, of course, you know. And that is why I felt happy, even when I had to wait for the explanations, or simply take them for granted. Now, however, I had to say what I think; I do not believe that anything wpile//be/ I said would be new to you even to the slightest degree; but so many details are bound to get into wrong connections in time that I felt it was necessary to state the obvious. I rely mand on your and Kari's judgment. On the strength of our common determination I have acted. If you are convinced that your place is not with me at present, but at home, I will gladly abide by this decision; but if you are not convinced of this, then consider the work which is still to be done.

Kari, my sweet daughter, although you are a grown up person now, I don't think we should put this decision on you. I am still able to keep you whereever you are, but you are not yet able to keep yourself, (and even less your parents). When I offered to suggest to you that you should stay, if you thought you should, the pain of the decision was almost morethan I could bear. It was your steady &brave heart which upheld me fireful in many a black patch. Thank you. I cannot decide formother; you know me well enough to understand; but she has a right to know where I stand. Whatever decision she is happy in, keeps us together. But it must be a decision based on a facing up to all the responsibilities involved. Is long as I know what they are, I am not only galdly willing to take the consequences, but would be utterly wretched to think that my weakness prevented mother from doing what was right. Such is not the case. Should anything in this letter strike you as self-contradictory, re read it and, if necessary, reinterpret it, until that semblance disappears. For it is simple and clear: Your last letter like seemed to mirror annh unutterable loneliness, partly, because you were not doing as essential war work as you were hoping for, I take it. If this isso: Some. I need you both

done LAW YOR VISA , AND WHY IT WAS WELAYED. finally Only on the 19th June did I proceed to Montreal for my visa having wested the home governmets of the consent free the first That consent reached me thorugh your cable saying I shoul take the quota visa and that the P.O. had informed you of the consent.

Now by very much. And while beefre it was I who wanted consent, now it was the U.S. Consulte which institted on formal home consent. As I did not had such a docum ment at my disposal, my case was sent to the State Department to Washig ton for investigation - this meant a delay of everal weeks. This was the more annoying as onmy return to Bennington on June Elst, I found the F. O. letter waiting for me, with Anthony's hand written signature on the envelope. However it was too late and I settled down to wait, which should go into new regulations were published which should go into force on July 1st. Now I decided to act, instatuly and with utmost vigour. I went to Washington minh saw the State Department and put my case. After many ups and downs, I wen through: on June 27 the State Department authorized Moureal by waire to issue the visa. (Incidentally, your and Kari's name as were take by the State Department, before the visa were issued). On June 28 th I was incanary and them of the issuance of a visa to me and mentioning unnu both your names. There is the story of January 18, That will survive. Then't read Tauschnings second book "Hitler speaks". It is even more important than his first. He is, of course a superb writer and his recording of conversations with Hitler will rank among the tgreatest pieces of writing of the period. Materially the book bears out all, and more, we always assumed. It is a heartbreaking book. You should certainly read it, the whole. Then I read Sepastian Haffners Book"Germany - Jekyll and Hyde. "Vile. The group from which it emanates could not have sunk lower. Then I read the Joad's book "What is at stake and why not say so". Hetook grate pains to put the liberal case fully and concisely. It is therefore quite an important book in its way. Laski's Pinguin contains just one or two drops of recognition of the basic incompatibility of democracy and capitalism which is at the roopt of the crisis. But it is less , really, than a drop. Then I read a Labour Party book by Francis Villiams, called "War by Revolution". T, is is honest according to the lights of the Labour Party, but packed with disastrous illusions. Then the Gollancz-book by "Scipio"

"germany Tomorrow". Looks a lot more serious to me than what the defunct German Left produces. I forgot to say that I read, in patches a very fine and singleminded piece of writing The Life of Luxemburg by Proclich. That's the lot, so far. I am waiting tumbemsemb for Sabine and Drucker's book, which is always in hand..

absurdities. He is of the balanced type. If there is a comparison it is ;

(formerly announced under the Pseudonym of "Miles") "100,000,000 allies, if we choose." This is a complicated case. Then de Gaull's book which he wrote in 1934, "The Army of the Future". This is the

work of a soldier of genius, undoubtedly, and a man of vision, and

a poet on top. Much greater than Fuller, without crankyness and

De Vere, that is, has given up the London job and looks now less lean and haggard, and much warmer than ever, her wildflower beauty in full delightful bloom. And the house is resplendent in cleanliness and charm and the very cats have put on flesh. It is now not possible any more to distinguish "Shy" from "Mama", except by the alleged occasional wagging of her tail on "Shy"s part. They also have a kitter "Pinocchio" which is a very funny kitter indeed with a white nose and four white socks, and it is of course otherwise quite black. I cannot tell you how dear these people are to me and what a delight it is to go and see them. I spent the whole of last week-end the there, doing nothing, delighting in the sun over the Weald and the wild flowers that are out even now. They did nothing but spoil me and I have now a permanent bed there in "Tonye" (this, as you may figure out, is short for Gaston) old room, on the ground floor, to come over whenever I feel like it.

The House is in very good order and very lovely indeed, and everybody in the village is all right. There was hardly any damage round here and not a single casualty. Hedales, of course, is even more peaceful than these parts.

My darling love, if you can, write to me as often as you can.

Write a little scrawl, a line, or, else, all you think, if you have
the leisure. Mails sometimes take longer time, sometimes a shorter,
