Agriculture was to the Chinese even in prehistoric times a matter of such concern that it was an object of administration. It is not an overstatement to say that the entire history of China is a history of agrarian problems. The rise and fall of the emperors and dynasties, the economic disorder and political upheaval were more or less due to the results of heavy taxation on land and its production, the maladjustment of land tenure and the sufferings of the common people. All of these are, either directly or indirectly, caused by the uneven distribution of land and the large holdings of the landlords.

If we believe that China started out the Tsing Tien System ( or nine-squares system), we may say that she started out with equal land distribution among all her people. Ponderous tomes have been written upon the subject and various attributes have been given by various writers. But it is worth arguing whether the Tsing Tien System has ever existed in ancient China. Many recent writers, such as Dr. Hu Shih and some others, do not seem agreeable to the total recognition of the Tsing Tien System. However, to their opinions, there must be some kind of land distribution system which appeared simultaneously with the birth of the feudal system.

The Chou period (1122 -256 B.C.) is known to the historians of Chinese culture as the Classical Age and is compared with the Golden Age of Greece. The Chou period is known to social historians as the Age of Feup Although dalism. The origin of feudal system was way back due to the war results between a number of "Tribal States", but the real beginning of feudalism was from the Chou Dynasty.

The land distribution system at Chou period, though different from the Tsing Tien System, can be clearly outlined from the studies and investigations of the Tsing Tien System. The very first record of Tsing Tien System is what we find in The Works of Mencious. Report of investigation in the Chou Book has drawn a conclusion that "No Tsing Tien System has ever found in Chom Book."<sup>1</sup> Our study of this system is to start from The Works of Mencious. 2

"The sovereign of the Hsia dynasty enacted the fifty mow albotment, and the payment of a tax. The founder of the Yin enacted the seventy mow allotment, and the system of <u>mutual aid</u>. The founder of the Chow enacted the hundred mow allotment, and the <u>share system</u>. In reality, what was paid in all these was a tithe. The share system means mutual division. The aid system means mutual dependence.

"Lung said, 'For regulating the lands, there is no better than that of taxing. By the tax system, the regular amount was fixed by taking the average of several years. In good years, when the grain lies about in abundance, much might be taken without its being oppressive, and the actual exaction would be small. But in bad years, the produce being not sufficient to repay the manuring of the fields, this system still requires the taking of the full amount. When the parent of the people causes the people to wear books of distress, and, after the whole year's toil, yet not to be able to nourish their parents, so that they proceed to borrowing to increase their means, till the old people and children are found lying in the ditches and water channels:- where, in such a case is his parental relation to the people?'

"As to the system of hereditary salaries, that is already observed in Tang.

> "It is said in the 'Book of Poetry', 'May the rain come down on our public field, and then upon our private fields.'

"It is only in the system of mutual aid that there is a public field, and from this passage we perceive that even in the Chow dynasty this system has been recognized." All of the other attributes whose apparance after the time of Mencious, are either directly or indirectly elaborated from The Works of Mencious. Dr. Hu Shih has prepared a list of such works in the order of its appearance, in his investigation of Tsing Tien System. He comments as follows:

- 1, The Tsing Tien System as such stated in The Works of Mencious is neither clear nor complete.
- 2, In the Kung Yang Chun of early Han dynasty, only one sentence can be found: "The tax system was one-tenth (tithe)".
- 3, In the Kuo Liang Chun of early Han dynasty, though it is comparatively in more detail but they can only be interpretated literally.
- h, The written about "Benevelent Government" at Han Wen-ti time was based upon the Works of Mencious but there is no clear nor definite Tsing Tien System ever mentioned.
- 5, In the Han Poetry, written between the time of Wen-ti and Chin-ti, who quoted from Kuo Liang Chun, draws a clear picture of Tsing Tien System.
- 6, In Chou Li which was wirtten at even later time, you can find a well designed giving every detail and full descriptions about Tsing Tien System.
- 7, Shih Ho Chi written by Pen Ku which use references from Chou Li and Han Poetry, makes out a more homogenous system.
- 8, Kung Yang Chun written by Ho Shu at more later time, which uses refences from the Works of Mencious, Benevelent Government, Chou Li and Han Poetry, a Tsing Tien System is crystallized by the contributions and combinations of all concerned.

Mencious referred to three kinds of historical system which his suggesttion to Tang state was based upon. Then he quoted from Lung, a comparison of the advantages and disadvantages of the "tax system" and the "mutual aid system". Among the three, the taxing was the worst. He thought it was too mechanical. Taking average among several years' harvest to get a standard rate and applying such rate is not justfiable to good years nor bad years. The mutual aid system was just the reverse. Mencious specially emphasized the mutual aid system. But the question arises, whether the mutual aid system has been practiced or not in Chou period. Judging from the Book of Poetry, there is evidence to prove that the mutual aid system has been practiced in Chou period. Mencious said continuously: 4

"Now, the first thing towards a benevolent government must be to lay down the boundaries. If the boundaries be not defined correctly, the division of the land into squares will not be equal, and the produce available for salaries will not be evenly distributed. On this account, oppressive rulers and impure ministers are sure to neglect this defining of boundaries. When the boundaries have been defined correctly, the division of the fields and the regulation of allowances may be determined by you, sitting at your ease."

The above are the foundamentals reasons in his talking to Tang state. He pointed out that there may create two grave mistakes if the boundaries are not defined correctly. Firstly, the nobilities may get too much or an uneven division of land. Secondly, the nobilities may ask too much or not enough crop harvest from the husbandmen. "When boundaries have been defined correctly, the division of fields and the regulation of salary allowances may be determined by you, sitting at your ease." In his opinions, the division of land and the regulating salary allowances for the officials are the most pime importance. Therefore, he advanced one further step to suggest as follows:

"I would ask you, in the remoter districts, observing the nine-squares division (Tsing Tien system), to reserve one division to be cultivated on the system of mutual aid, and in the more central parts of the kingdom, to make the people pay for themselves of a tenth part of their produce.

From the highest offices down to the lowest, each one must have his holy field, consisting of fifty mows let the supernumerary males have their twenty-five mow.

On occasions of death, or removal from one dwelling to another

there will be no quitting the district. In the fields of a district, those who belong to the same nine squares render all friendly offices to one another in their going out and coming in, aid one another in keeping water and ward, and sustain one another in sickness. Thus the people are brought to live in affection and harmony.

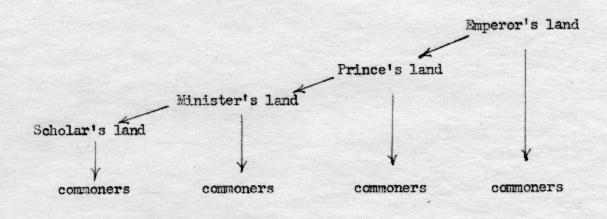

A square li covers nine squares of land, which nine squares contain nine hundred mow. The central square is the public field, and eight families, each having its private hundred mow, cultivate in common the public field. And not till public work is finished, may they presume to attend to their private affairs. This is the way by which the countrymen are distinguished from those of a superior grade."

Thus he gave the great outlines of the Tsing Tien System. To understand the Tsing Tien or "nine-squares division of the land", the form of the Chinese character needs only to be looked at. If we draw lines to inclose it - thus - we have a square portion of ground divided into nine square and smaller squares. But can we suppose it possible to divide a territory in this way? The natural irregularities of the surface would be one great obstacle. And we find the "holy field" and other assignments of land, which must continually have been requiring new arrangement of the boundaries.

Now, suppose we put aside the conception of Mencious and ask ourselves what was the land distribution system prevailed in Chou period? We can reasonably presume that the system was probably running askthe following:-

(1) The ownership of all-land belongs to the Emperor, that is so called "The land of the whole empire should be called imperial land". The emperor distributes his land to the princes and holds a part which he orders the husbandmen work on them. The princes distribute the land which he receives from the emperor, to his ministers and holds a part at his own management.

He orders peasants or husbandmen work on his land. The ministers distribute a part of land which he receives from the prince, to the scholars and holds a part for his own management. He orders the peasants or husbandmen work on his land. The scholars are the lowest in the hierarchy of the nobilities or upper class. He could not distribute any further. He orders the peasants work on his land and sometimes, he, himself would supervise the cultivation of land or farming. Such arrangement can be illustrated by a diagram as below: 6

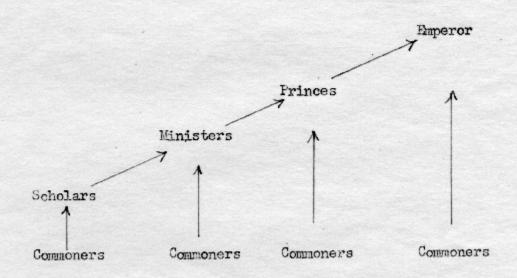

Note: The vertical arrowhead means "land is ordered to". The inclined arrowhead means "land is distributed to".

The emperor, princes, ministers and scholars are nobilities or upper class people and also owners of land who order the land to the commoners. The commoners are peasant, tenants (husbandmen), tenant-labours and slaves. Those people who are working on the land which they receive from upper class. Thus as above illustrated, is the distribution of land. (2) The commoners who work on the land owned by upper class must offer and nually part of the crop harvest to upper class. Generally, there are two or more kinds of offering. For the benefit of those who choose to offer their labour on the public field besides his own work on self-cultivating field, he could cultivate an extra piece of public land of upper class. The crop offering can be exempted if he choose to do extra work on the public field plus what he has to work on the self-cultivating field. The size of the public field is appoximately equal to one tenth of the his self-cultivating field. The common, do not be provided to an external provide the public field besides and the base of the public field besides his own the public field. The size of the field. For example, if five peasants each cultiwate 100 mow of their assigned land, they would alaosicolfectively a piece of public field of about 50 now in size.

7

Another kind of offering is that every one offers 10 per cent of his collection to the one higher up. Thus is so called "Each offers one tenth in self ecultivating private field". The peasant offers 10 per cent of crop harvest to upper class. The lower one offers **b**0 per cent to the one higher than him. The arrangement can be illustrated by a diagram as below:

Note: The upward arrowhead means offering from peasants. The inclined arrowhead means lower upper class offering to higher up.

The first diagram shows the part of "land distribution". The second diagram shows the part of "regulating allowances". These are the most important things in the feudal system. Mencious's suggestions to Tang state, if inter preted correctly, were to adopt the Chou's systems, that is, either for the peasants to do ten per cent extra labour work on the public field or taxing on ten per cent harvest from top to bottom.

Nevertheless, Tsing Tien System is repeatedly reminded in Chinese history. Attempts were made in many dynasties to limit land holdings, to equalize the land distribution and to imitate the Tsing Tien system but there are scores of failures due to the economic power and political influences of the landlords. Records made in almost every dynasty's history book, petitions from wise ministers, edicts by the intelligent rulers to limit the owning of land also the power of the rich. The resistance was so strong that even occasionally there was a temporarily submission to the limitation but the revival of landlordism was always a cycle in the history. P

II. PRIVATE OWNERSHIP OF LAND (770 B.C. - 9 A.D.)

At the beginning of Chou dynasty there were some 1700 states, but at time when the capital was moved from Hao (Shansi) to Loyang (Honan), the number of vassal states had been reduced to less than 200, of which only a dozen were considered as important, the others being surrounded the larger state. The vigilant and rigorous measures of the early Chou emperors made them possible to enjoy a prosperous time and rapid expanding economy. Because of the economic development, vident changes in political and social order gradually came into effect. Those most notable ones are as follows:

- 1, The decay of the nobility increases at the same speed as the rapid expanding economy. Intoxicating in the easy and extravagent life, the privileges of the nobility were intrenched without their knowing. Consequently, they were repeatedly cheated by their subordinates and at last, they lost the power of control.
- 2. The communications, bartering and other exchange relationships between the states became more frequent resulting of the conomic development. Surplus in productions were available for exchange. Productions are different due to geographical difference: Following this trend, wars, looting of cities, fighting for land are naturally unavoidable.
- 3, Owing to the economic development, the arising of the influential people, landlords and merchants in their social positions jumped high above the upper class. A new social class is formed, the landlord.

Under the feudalism, the land was owned by the nobility and upper class. Land was allotted to the commoners to work on. People who work on land were peasants, tenants, labour-tenants and slaves. People who collected the curplus crop harvest were nobolity and upper class without exception. Owing to the growth of population Land in society as a whole, was the main resource for livelihood. Owing to

the apparent improvement in farming method and the increasing productivity of agriculture, land has become an attractive object to fight for. The luxury and greedy life of the nobility expected more and more returns from the land in order to satisfy their desire in the want of precious, valuable and ornamental articles. These are all the reasons of rushing for land. Finally, there is a concentration of land by outright purchase or the booty of war.

Merchants were able to reinvest their money which profit they made in trade, to land. Land was either concentrated in the hands of rich merchants or ingroup of influential people who turned up from the scholars. Scholars, the lowest stratum of upper class, had direct contact with the peasants. Scholars are the medium between the upper and lower class people. Awaring of the decay and greedy of the upper class, scholars hanged tightly on the land. Scholars struggled very hard to save the situation and quite a few scholars became pure landlords when the nobility and upper class totally collapsed. The newly borne landlords were entirely different in nature from the original land owners.

We can hardly give a definition for scholar. But it is universally recognized that scholar is a wellieducated man and scholar is an able official or who is capable to take an office. Scholars, though at the lowest stratum of upper class, are most qualifiable to study knowledges and to preserve the culture. At the collapse of the upper class, the scholars had the chance to be a landlord. The habit of study in literary culture was also inherited traditional in the newly formed landlord class.

Since then, it is only possible for landlord to be a scholar. Unless one bwnstsomerland, junless one is a landlord who can exploit the surplus production in agriculture, one has no such leasure hours to study intelligently in literary culture. The examinations for civil service in <sup>C</sup>hinese history were purposely made it so difficult that sons from por familifies had no chance at all.

Due to the birth of landlords plus the existing of merchants, all the surplus production of a society wilbbe absorbed either directly or 10

indirectly by the ownership of landlord or the business capital of the merchant. Hence the stratification of society is clearly divided into rich and poor classes. The landlord and merchant being rich class who always has surplus. The peasants, tenants artisans belong to the poor class people who are living from hand to mouth and can hardly to make their ends meet. The lending and borrowing is naturally created in the society. The poor, at the will of the existence, finds himself to borrow from the rich when he has no other door to turn to. The rich lends to the poor in the form of money, or some times in kind, the seeds or crops. In such relationship, interest rate is charged. Hence the poor becomes poorer, the rich becomes richer. 11

In 250 B.C., Shang Yang, prime minister of Chin state ushered in the era of private ownership of land. In 221 B.C., the last of independent feudal state fell before the Chin emperor Shih Hunag-ti, the great conqueror, and China was united as a single empire. Within a period of ten years time, he built up an overwhelming military striking power. But the fate of the empire was doomed as soon as his empire was established. The military campagins were expensive and funds had ultimately to come from the people. Heavy taxes and enforced services exhaust the people. Just how heavy the taxes were at this period is not known. It was recorded, however, that the average taxes on land, on mouths (poll tax) and on iron and sale amounted per person to 20 times as much as during the earlier part of Chou dynasty. According to the record, the emperor employed at one time h00,000 men in building the Great Wall, 500,000 in defending the frontiers and 700,000 in the construction of palaces.

That the sufferings of the peasants were directly responsible for the overthrow of the Chin is proved by the fact that Chen Shen, the leader of the revolt, was a peasant who dropped the plough and grasp the sword.

The landlord class people were also not too pleased in the Chin's dictatorship. The revolt was started by peasant upheaval who fought for their

very existence; continued by the suppressed or defeated nobility for revenge; centralization and succeeded by the landlord to reap the fruit. A **solinative** empire is fianlly realized, the Han empire. The creation of Chin and Han empires are similar to the creation of the Roman empire same as a result of unification of feudal kingdoms.

The controlling power of nobility in the f eudalism is now displaced by the landlord of the centralization. Administrative officers are slected among landlord class for the office of Chuan which is the term for administrative districts in the Han period. The main purpose during the control of landlords is to maintain the private ownership of land. At the extreme expansion of private ownership, the social prestige and influences of the landlord is more powerful than any other class in the social struture. Landlord and merchant dominate the political thoughts, social and economic institutions.

Peasants are forced to desert their land and to seek employment as a tenant or labour when they fail to resist the "eating up" by the landland and merchant; or the exploitation by the government. The sharp contrasting difference of rich and poor is the sharp conflict between the landlord and peasants. This condition usually end in diaster. Suggestions are made enthe limitation of landownership.

"Consequently the condition of "eating up" arose, and greed appeared. Those who are strong are holding land to the extent of thousands of chuans of land (incer/chuant equal to incer/f00 mow); wwhile those are are weak have not even a place to accomodate an awl. From now on, the land of the whole empire should be called imperial land, and the slaves should be called private dependants; they could be neither sold nor purchased. Those families which have fewer than eight mal members, but have land amounting to more than one Tsing should distribute the surplus (one Tsing - 900 mow) of land to their relatives and neighbors. The offenders should be punicked by death." <sup>6</sup> The law proclaimed in the Han dynasty (202 B.C. - 220 A.D.) was 12

not justly arranged and the officials took advantage of that fact to make fraudulent gains.\*7

"Some influential people and merchants have become exceedingly powerful. They have houses in every part of the country, and their land property is connected from state to state. Having no official rank or titles they are wearing official gowns nevertheless. Though they are not the heads of any organizations, yet they have servants in huge numbers. The honor and happiness of these people exceeds that of any state princes, and their influence and power are equal in strength to that of any state officer. They have money sufficient to purchase anything desired and they are not subjected to punishment even if they have committed crimes. Many assassins and daring persons are at their service. Consequently the poor who are weak in strength and mean in widsom, are suffered to be clothed in rags and to rest on poor beds; and dying, there is no one to give them burial. Neither do they dare complain, though suffering injustice and poverty.

"All such evil conditions, though partly due to laxity of the law, arise chiefly because of the fact that people are entitled to hold land property without any limitation.

"Therefore if today we wish to establish the justice of a universal peace, to equalize the wealth of the people in richness and poverty, and to correct the customs of extravagence prevailing side by side with parisimony, the best and the only way, is to go back to the Tsing Tien system. Of this we are assured, that although there are certain disadvantages in making a change, yet we ought nervertheless to restore the old system."\*<sup>8</sup>

Petitions for a limitation of land holdings reveal to as the conditions of the poor. They were so reduced that they lost all their holdings to the rich, so that it was a common saying of the day that whereas the land of the rich extended from field to fields, "the poor had not enough to accommodate the point of an owl." Landlords being given a free hand, rent were as high as 50 per cent of the produce. This, coupled with the taxation and services required, drove the poor peasants to desperation. "The universe was exhausted and the people desperate". The cry for limitation of land holdings was heard an all sides and even a law was proclaimed to that effect, but was not enforced due to the influence of the court favorites. 14

# III PERIODS OF EQUAL DISTRIBUTION OF LAND

15

In the year of hh3 A.D. - h99 A.D., Ghina proper was pacified by the Wei dynasty. Seeing the luxury of the rich with their unlimited extension of land holdings as contrasted with the misery and suffering of the homeless poor, Northern Wei revived the system of land distribution. Such a drastic measure would be the best solution applied to the people of Han race. Such measures call special attention in Ghinese history because Wei people who came from north, are supposed to be a different race. How could they solve the most disputable problem so easily. Therefore, people suspect that the land which is equalized and distributed by the Northern Wei was not taken from the hands of the rich people. Those land might be waste land, unclaimed or land without owners.

Such guessing is not entirely without reasons. The land is not taken directly from the hands of the rich but as a matter of fact, the land used to belong the rich is unquestionable. During the invasion from the north, the rich people following the government evacuated to the south. Almost all land becomes ownerless temporarily. Not until the political situation and social order return to normalcy, the land owners are refugeenin some where else. When they return they find the land is worked on by local people. The claims in the court and disputes cutside the court are numerous. The government seize thesopportunity to adopt the land distribution,

"The reason why we were unable to restore the Tsing Tien system successfully before was all the property (land) had belonged to the people for generations, and it would have been very difficult for the goernment suddenly to take away the land from their hands. But now, after a great period of confusion, all the people are scattered, and the land is left without owners. Thus all of it belongs to the government as public fields. So we ought to take advantage of this opportunity to restore the Tsing Then system." The powerful and influential families should not monopolize all fertile and rich fields. The small man will be able to make his living, and the influential will not be able to accomulate too much surplus. In this year, an edict was issued by Hsian Wen-ti (471 - 499 A.D.) as follows: 11

" - - - Recently, the rich and strong are eating up even the mountains and marshes while the weak and poor have no hope of getting even a place to live. As a result, the benefit of the soil had not been fully utilized and the people are living in a hand to mouth condition. Some of the people have risked their lives, because they were quarelling over some hedges of the fields; while others have given up their occupartion (desertion of land) because they were suffering from hunger and cold (land return not sufficient) for subsistence). Under such conditions, how can we expect the empire to be settled and peaceful, and the people to be plentifully provided for and catented? therefore, be it ordered that the land poperty of the people in the whole empire to be distributed on an equal basis."

The system established was as follows: (1) The Regular Land

From the age of 15 years up each man received h0 mow of regular land in which nothing had been planted and each woman received 20 mow; the slave was treated like free citizen. Those who had reached the taxable age (15 years) received land, and those who were old enough to be exempted from taxation, returned it; if they dies, it reverted to the state.

(2) The Flax Land

Land nn which flax was planted. When a man reached the taxable age, he received 10 mow of flax land ( in addition to 40 mow of regular land) a woman received 5 mow; the slaves were treated like the free citizens. This land too was\_subject to the law of acceptance and return.

\* The slaves received land shares the same as free citizen; but their shares actually went to the slave owners. Hence the slave shares only benefited the owners.

# (3) The Mulberry Land

When a man first received it, he had a share of 20 mow. <sup>1</sup>t was not subject to the law of acceptance and return, and it was classified as the double land (auxiliary land, i.e., auxiliary to the regular land). The recipient was required to plant 50 mulberry trees, 5 date trees and 3 elms. The slave was treated like the free citizen. All the mulberry land should be hereditary property; when the owner dies, his land needs not be returned.

But this equal distribution system was only adopted to the Northern Wei whilst in the southern state there was no attempt to limit the land holding because it was too weak to cope with the large land owners.

In the north, the equal distribution is succeded by Tsi, Sui and Tang dynasties. In the year of 564 A.D., Wu Chen-ti, emperor of Sui dynasty made a law providing that every man receive land and pay taxes at 18 years of age; he enrolled as a soilder at 20; be freed from any forced labor at 60; and at 66 return the land to the government and be exempted from taxes. Each man to receive 80 mow of regular land; each woman, 40 mow, the slave treated as free citizen.

The limitation of slaves was 300 slaves for the princes of near relation; 200 for the successive princes; 150 for the princes of next rank down, and for the princes outside of the imperial family; 100 for official of third rank up, and the imperial clansman; 80 for officials from the seventh rank up, and 60 for officials from the eighth rank down, and the common people. No land was given not the slaves who stood beyond the limit. Besides, every man received 20 mow of mulberry land as perpetual property, which was not subject to the law of acceptance and return. \*

The official approval of the owning of slaves and the land distributed to the slaves were actually went to the slave owners. Though the perpetual property wereprohibited for sale but the landlords still be able to buy them. "Many people have sold or bought their perpetual property and mouth shares without regard for the regulations. Sometimes they changed the records illegally and at other times they declared that they were simply mortgaging their property. The result is that the poor have no place to live, having to drift around at strange doors, and have been doing work on other people's fields. It means that some people have been robbed off their occupation and properties, and the defects and evils are plainly obvious. The government forsaw the danger and even willing to pay the cost to the present holders of such properties which transferred from the poor if original owners come to recover them. However, the government official, landlord and tax collector are oftentimes one person. Elthough the law forbade anybody to sell or buy the perpetual property and mouth shares but the regulations cannot be strictly enforced. thy. 18

In the year of 780 A.D., Yang Yen of Tang dynasty established the bi-annual tax system, from this time on, the public land ownership never revived again. Nominally, the Tang dynasty had the system of public land distribution, but in reality it was a system of private ownership. In the later period of Tang, after the military expediations, the taxation was very heavy and complexie The regulation was not uniform throught the country; and the people were allowed to own their land privately and could sell it when they so wished. The government changed the system of equal distribution into Bi-Annual Tax system which continues to modern time with slight modifications.

SYMMETRY

Malinowsky: A.W.T.

"...symmetry of structure will be formed in every savage society as the indispensable basis of reciprocal obligations." Mekeel: Economy of the Modern Teton Dakota Community

"Any social gathering taken as a pretext for giving away of property."

Mommaon: Bk. I, Ch. 4.

Romans described parts, e.g., tribute or contributing as thirds (tribus). Confer English "quarters" = 1/4. All ancient bodies divisible by three (like the Muses).

M. Mead: C.C. (p.32).

Aropesh: Dual Organization.

"Only about a tenth of an average man's time is taken up with initiating enterprises in which he invokes other's help - for the other nine tenths he is following leads which came from many different groups! (

#### Samoa:

"The Samoan life is based upon an economy of plenty." "There is more than enough land." "The emphasis was never upon what an individual did, neither upon the skill nor upon the size of his catch or hervest, but always upon its place in a larger social situation." (e.g., in the village fishing fleet organization).

Iroquois: male side; Mohawk, Onondega, Seneca. Chairmanship Female: Oneida, Caruga

of the Confederation (votes last)

# RECIPROCITY

Tueting:

Melanesia: " ... reciprocal exchange of gifts between groups" - general pattern of ceremonial exchange ... sa Rivalry in giving.

Malinowsky: Crime and Custom "Fish and Chips."

#### Samoa

Exchange of Toga (dowry property) against Oloa (bride price property). These are strict interchanges. Also between chief and talking chief. Equity: borrowing, begging, ladaix lending relationship.

# REDISTRIBUTION

Thurnwald: E.B.C. China, Incas, Indian, kingdoms, Egypt, Babylonia.

Principal headman or chief "disposes of the booty of hunters, trappers."

Same in case of collective trading parties (redistribution following upon it).

Gifts become taxes.

All archaic states made use of metal currency for taxes and salaries but relied mainly on payments in kind stored in granaries and warehouses for pottery, etc., to the nonproducing part of the population. "In this case distribution fulfills an essentially economic function."

#### Andamans:

"The Andamans exchange all their objects continually through gifts and counter-gifts.

#### Foudalism:

The ethnic groups transformed into professional ones. "By the formation of an upper layer. There is thus created an organization based on the one hand on the contributions and services of the dependent class, and on the other, on the power of distribution possessed by the heads of families in the leading stratum." Naturally they always keep something back for themselves and the maintenance of their slaves. In this exchange of goods from various districts is effected. "In the absence of agenuine system of agriculture we find in America - in Mexico, and above all in Peru - a similar gigantic centralized political organization based on transactions in kind."

Combination of reciprocity with redistribution (via headman).

# Micronesia and Polynesia:

M. and P. peoples have a stratified population with a ruling aristocracy and a sacred king. The kings as representatives of the first clan receives the revenue, redistributing it later in the form of <u>largesse</u> among the population.

### Firth:

Trustfulness and power of resisting temptation much more developed than with us. They take the long-term view ...

# Thurnwald:

"Diagrams show the functioning of the collective system of taxation and redistribution in kind." Diagram VII.

Malinowsky: "The whole tribal life is permeated by a constant give and take.

# NO GAIN

#### Malinowsky: A.W.P. (p. 175)

"... there is not even a trace of gain." (Nor primitive communism either).

"...giving for the sake of giving is one of the most important features of Trans Trobriand sociology."

(p.153): "So we see that food contributed by all the villages before the <u>sagali</u> was simply redistributed among them, a considerable quantity having been aded, first by the chief: and this is indeed the usual procedure at Sagali. In this case of course the lion's share was taken by the <u>Kitawans</u> who helped at the building." (At a <u>tasasartian</u> <u>tasaan</u> tasaria: ceremonial regatta held at the launching of a new Kula cance called <u>waga</u>).

"...primitive wealth is not of an economic but of a social nature..." "...not possession but allowing others to share is the privilege of wealth."." But you might hide part of your store in order to keep it for yourself (<u>actual</u> motives).

Sir James George Krzer Frazer on Malinowsky's Argaunots: "Its main theme is economic - for it deals with commercial enterprise, exchange, and trade."

#### Thurnwald: E. P.C.

Gain for the sake of money values is therefore unknown. Not to possess but give and take, turn-over... "To hand over, pass on."

Above all failure to earn money does not lead to personal ruin however great the importance attached to wealth in stratified societies. Communal economies even if only partial minimum protect the individual from starvation.

"... recognition and distinction, success and respect are not due to acquisition or gain, but to quite different activities.

# Barnett: The Mature of the Potlatch, A.A. Vol. 40.

"...only guests build a house and of course they are paid."

#### NO INDIVIDUAL FEAR OF STARVATION

Muntz; E.E.: Economic Jour., 1926. "The Early Development of Economic Concepts."

"There is not a single thing Europe can sell to the natives that is of the nature of true necessity, a thing the natives must have or starve (relative exception: tobacco).

# Herskovits: E.L.P.P.

"... no starving in societies existing on the subsistance margin."

Very small number of primitive people live on subsistance margin. Confer Cora DuBois great majority: under less stringent conditions.

4

### FAMINE

on law

Indians in central and northern California; Bushmen of Kalahari Desert; Australian Aborigenes; Chipewayan and Caribou Eskimos.

#### Cora DuBois:

Tolowa: scheming parsimony not extended to food: only to prestige goods.

"...certain physiologically determined tensions. One of the most obvious of these is any ... But nowhere do human beings discharge this, or any other basic tension, directly."

# Herskovits: (p.12)

Even strike and sabotage not quite unknown. "But the demands enforced are demands of prestige and not of livelihood. For among these workers there is no one to whom the return for his labor is essential to his existence." (Confer Thurnwal on Samoa).

#### Thurnwald: Samoa

Natives never join labor teams for the sake of escaping from physical need.

#### NO PAY FOR IMPERSONAL LABOR

#### Thurnwald:

"Labor freely given for return in kind."

#### Malinowsky:

"Gain such as is often the stimulus for work in more civilized communities never acts as an impulse to work under the original native conditions.

# Lowie:

"The only recompense known to primitive society is the magician's." (Pol. "Personal tie" may be unwelcome in case of the sorcerer).

"Nowhere in uninfluenced primitive society do we find labor associated with the idea of payment."

"Even in the Middle Ages payment for work for strangers is something unheard of." Stranger has no personal tie of duty and consequently should work for the sake of honor.

# NATIVES KNOW HARD WORK

#### Malinowsky:

Terrific exertions make recuperation necessary.

Thurnwald: Native Labor in the Pacific Protectorate (1910)

Long quotation. Native activity - white man's "work."

\_\_\_: M. and G. Vol. 3

"Labor invariable tends beyond that which is strictly necessary."

#### Firth: Maori

"Work for its own sake." A salient feature of Maori industry.

# Herskovits: Samoa

Pukapuka Atol, northeast of Samoa has artifical soil production: from cocoanut fronds, leaves, water seeping through the coral - to grow taro in thick mud (today enormous excavations feed entire villages ... confer Thurnwald on Incas.

Polynesian Island of Mangaria. Taro is irrigated by means of a race dug only with wooden digging sticks from some distance upstream - a work of considerable magnitude.

Ifugao of Philippines: Irrigated terraces of rice on steep mountain sides - 10 to 50 feet high terraces - 20 feet high stone walls from valley stones.

"The prestige that accrues to the hard worker, the fast worker, the careful worker, the competent worker is sought after everywhere among primitive peoples (Sanfar Cf. Malinowsky).

"South Sea Islanders work, and work hard."

"Reproach of inertia" unjustified.

"... they take their ease at their own pleasure."

Thurnwald: Incas

Lower region Milpa (fallow).

# Thousand meter high terraces.

Three different agricultural systems according to elevation. Above Milpa 1000-2000 meter terraces: the wonders of the world: vast walls of rough stone jigsawed 1000 square miles. Miles of waterways over rocky cliffs.

# MONEY

# Thurnwald: M. and G. Vol. 3, p. 117.

Preferred objects of exchange: "preferential exchanges" such as sago against pots in New Guinea; stone axes against shells of fish; arrows against tobacco; arm bands against pigs; usually in convention amounts at conventional rates of exchange. Such preferred exchanges are common only between different tribes or xxeetnext settlements. The Californian Hupa traded with the Yurok ... Pomos insisted in transit dues when salt mines were approached (thus conflicts caused). Ply River tribes exchange one woman's grass skirt skirt and mat versus shell: (1) one large melon shell plus one tridacna shell. Mawata vs. Kiwai: big bunch of processed sago vs. bamboo bow and 20 arrows. Torres Straits: 1 large cance against 2 large arm bands plus small melon shell, one dugong-rib + 1 ell of dog's teeth. Is top luxury trade, i.e., jant jewelry produced by Tubetube and Taste who buy all their necessaries in this fashion. Most of these jewels used as bride's price. Innumerable similar instances, however, never between members of one and the same tribe. Exchange not on the markets but at visits, sometimes feasts, festivals. Ornaments (jewelry) constantly moving from village to village according to need.

Jewelry - the general term, most of the trade is top luxury trade.

"Zweite Etappee:" ein "Tauschmittet."

Iron money in Central Sudan: (a) spear heads, (b) black rough spads, (3) polished spades. One pound of salt = 6-7 Kaori shells (1890's) in Oual-Oualé.

Carolines Palau, Rossel Islands.

Palau money: 6 different kinds, partly ceremonial and even secret money.

Measure of Value: 1/4 of barley = 1 grain of silver since UR money in Sumaria.

Pacific: native moneys in fixed (stable) relations, to European money relations, are less stable.

# ECONOMIC DETERMINISM

Mead: C.C. (Introduction)

"The most discernible bias was a slight leaning towards the dependence upon the environmental factor and expectation that scarcity of food or materials or technological practices which required collective activity might have a determining influence..." Consequently two chief subjects for research were put down: "The nature of the material environment", "the details of the technological procedures of the different people," third: Structure of Society. Fourth: Education.

Four conclusions were implied: (a) environment directly determined man's primarily craving organism "who will compete with other organisms only to satisfy a desire for an object of which there is a limited supply;" (b) technology: "the kind of over-determinism which is characteristic of so many historical interpretations of social forms. That is, that the way in which men make their living accounts for their marriage forms and their religious beliefs. It would postulate that certain habits, themselves culturally determined, are hevertheless more important than other habits and will in fact determine them."

"Whether a group has a minimum or a plentiful subsistence level is not directly relevant to the question of hows cooperative or competitive in emphasis a culture will be."

"The social conception of success and the structural framework into which individual success is fitted, are more determinative than the state of technology or the plentifulness of food."

"There is no corelation at all between major emphases and a classification of cultures into food gathering, hunting, agricultural or pastoral peoples."

"There is no corelation to be found by culture areas ... "

Cultural definition over-riding natural environment.

Arapesh and Zuni: Actual great scarcity of land yet "phrase their difficulty as a scarcity of labor," consequently no competition. / Eskimo: Capelin in shoals "yet each man firsts fills his own dip net."

Thurnwald: Gosuite Indians (Great Salt Lakes)

"...are allowed to kill a rattle snake exclusively by coremonially shooting it through the head with an arrow." Pol.: primum vivre dinde philosopher RL.?

primus vivere devide

SYMMETRY

Malinowsky: A.W.T.

"...symmetry of structure will be formed in every savage society as the indispensable basis of reciprocal obligations." Mekeel: Economy of the Modern Teton Dakota Community

"Any social gathering taken as a pretext for giving away of property."

Mommsen: Bk. I, Ch. 4.

Romans described <u>parts</u>, e.g., tribute or contributing as <u>thirds</u> (tribus). Confer English "<u>quarters</u>" = 1/4. All ancient bodies divisible by three (like the Muses).

M. Mead: C.C. (p.32).

Arapesh: Dual Organization.

"Only about a tenth of an average man's time is taken up with initiating enterprises in which he invokes other's help - for the other nine tenths he is following leads which came from many different groups!" (

Samoa:

"The Samoan life is based upon an economy of plenty." "There is more than enough land." "The emphasis was never upon what an individual did, neither upon the skill nor upon the size of his catch or harvest, but always upon its place in a larger social situation." (e.g., in the village fishing fleet organization).

Iroquois: male side; Mohawk, Onondega, Seneca. Female; Oneida, Cayuga Chairmanship of the Confederation (votes last)

### RECIFROCITY

Tueting:

Melanesia: "...reciprocal exchange of gifts between groups" - general pattern of ceremonial exchange...za Rivalry in giving.

Malinowsky: Crime and Custom "Fish and Chips."

#### Samoa

Exchange of Toga (dowry property) against Oloa (bride price property). These are strict interchanges. Also between <u>chief</u> and <u>talking</u> chief. <u>Equity</u>: borrowing, begging, isinix lending relationship.

#### REDISTRIBUTION

Thurnwald: E.B.C. China, Incas, Indian kingdoms, Egypt, Babylonia.

Principal headman or chief "disposes of the booty of hunters, trappers."

Same in case of collective trading parties (redistribution following upon it).

Gifts become taxes.

All archaic states made use of metal currency for taxes and salaries but relied mainly on payments in kind stored in granaries and warehouses for pottery, etc., to the nonproducing part of the population. "In this case distribution fulfills an essentially economic function."

#### Andamans:

"The Andamans exchange all their objects continually through gifts and counter-gifts.

#### Feudalism:

The ethnic groups transformed into professional ones. "By the formation of an upper layer. There is thus created an organization based on the one hand on the contributions and services of the dependent class, and on the other, on the power of distribution possessed by the heads of families in the leading stratum." Naturally they always keep something back for themselves and the maintenance of their slaves. In this exchange of goods from various districts is effected. "In the absence of agenuine system of agriculture we find in America - in Mexico, and above all in Peru - a similar gigantic centralized political organization based on transactions in kind."

Combination of reciprocity with redistribution (via headman).

#### Micronesia and Polynesia:

M. and P. peoples have a stratified population with a ruling aristocracy and a sacred king. The kings as representatives of the first clan receives the revenue, redistributing it later in the form of <u>largesse</u> among the population.

#### Firth:

Trustfulness and power of resisting temptation much more developed than with us. They take the long-term view ...

#### Thurnwald:

"Diagrams show the functioning of the collective system of taxation and redistribution in kind." Diagram VII.

Malinowsky: "The whole tribal life is permeated by a constant give and take.

# NO GAIN

# Malinowsky: A.W.P. (p. 175)

"... There is not even a trace of gain." (Nor primitive communism either).

"...giving for the sake of giving is one of the most important features of Tran Trobriand sociology."

(p.153): "So we see that food contributed by all the villages before the <u>sagali</u> was simply redistributed among them, a considerable quantity having been aded, first by the chief: and this is indeed the usual procedure at Sagali. In this case of course the lion's share was taken by the <u>Kitawans</u> who helped at the building." (At a <u>kasasaktimic</u> <u>kasaak</u> tasoria: ceremonial regatta held at the launching of a new Kula cance called <u>waga</u>).

"...primitive wealth is not of an economic but of a social nature..." "...not possession but allowing others to share is the privilege of wealth."." But you might hide part of your store in order to keep it for yourself (<u>actual</u> motives).

Sir James George KRZER Frazer on Malinowsky's Argaunots: "Its main theme is economic - for it deals with commercial enterprise, exchange, and trade."

# Thurnwald: E.P.C.

Gain for the sake of money values is therefore unknown. Not to possess but give and take, turn-over... "To hand over, pass on."

Above all failure to earn money does not lead to personal ruin however great the importance attached to wealth in stratified societies. Communal economies even if only partial with kakaximum protect the individual from starvation.

"... recognition and distinction, success and respect are not due to acquisition or gain, but to quite different activities.

Barnett: The Nature of the Potlatch, A.A. Vol. 40.

"...only guests build a house and of course they are paid."

#### NO INDIVIDUAL FEAR OF STARVATION

Muntz; E.E.: Economic Jour., 1926. "The Early Development of Economic Concepts."

"There is not a single thing Europe can sell to the natives that is of the nature of true necessity, a thing the natives must have or starve (relative exception: tobacco).

# Herskovits: E.L.P.P.

"...no starving in societies existing on the subsistance margin."

on law

Very small number of primitive people live on subsistance margin. Confer Cora DuBois great majority: under less stringent conditions.

#### FAMINE

Indians in central and northern California; Bushmen of Kalahari Desert; Australian Aborigenes; Chipewayan and Caribou Eskimos.

#### Cora DuBois:

Tolowa: scheming, parsimony not extended to food: only to prestige goods.

"...certain physiologically determined tensions. One of the most obvious of these is anger. But nowhere do human beings discharge this, or any other basic tension, directly."

# Herskovits: (p.12)

Even strike and sabotage not quite unknown. "But the demands enforced are demands of prestige and not of livelihood. For among these workers there is no one to whom the return for his labor is essential to his existence." (Confer Thurnwal on Samoa).

#### Thurnwald: Samoa

Natives never join labor teams for the sake of escaping from physical need.

# NO PAY FOR IMPERSONAL LABOR

#### Thurnwald:

"Labor freely given for return in kind."

#### Malinowsky:

"Gain such as is often the stimulus for work in more civilized communities never acts as an impulse to work under the original native conditions.

# Lowie:

"The only recompense known to primitive society is the magician's." (Pol. "Personal tie" may be unwelcome in case of the sorcerer).

"Nowhere in uninfluenced primitive society do we find labor associated with the idea of payment."

"Even in the Middle Ages payment for work for strangers is something unheard of." Stranger has no personal tie of duty and consequently should work for the sake of honor.

### NATIVES KNOW HARD WORK

#### Malinowsky:

Terrific exertions make recuperation necessary.

Thurnwald: Native Labor in the Pacific Protectorate (1910)

Long quotation. Native activity - white man's "work."

: M. and G. Vol. 3

"Labor invariable tends beyond that which is strictly necessary."

# Firth: Maori

"Work for its own sake." A salient feature of Maori indastry.

# Herskovits: Samoa

Pukapuka Atol, northeast of Samoa has artifical soil production: from cocoanut fronds, leaves, water seeping through the coral - to grow taro in thick mud (today enormous excavations feed entire villages ... confer Thurnwald on Incas.

Polynesian Island of Mangaria. Taro is irrigated by means of a race dug only with wooden digging sticks from some distance upstream - a work of considerable magnitude.

I. LACK OF INTEREST OR KNOWLEDGE IN PRODUCTION

2. GOVERNMENTAL RESTRICTIONS. - FROM SENATORIAL OPPOSITION.

3. PILLAGE MORE PROFITABLE

ROMAN UNIVERSALISM WAS AN OUTGROWTH OF ROMAN REALISM. JULIUS CAESAR, HAVING FOUGHT IN GAUL, AND KNOWING THAT THE ROMAN ARMY WAS THE FOUNDATION OF ROMAN CIVILIZATION, CONCLUDED THAT MANY ITALIANS, AND MANY GAULS WERE MORE THAN A MATCH FOR THE ROMAN ARISTOCRACY. THE SENATE WAS AGAINST HIM, MARSHALLING THE WHOLE STRENGTH OF THE ROMAN MIDDLE (CICERO) AND UPPER CLASSES. BUT CAESAR BEAT THEM HE THEN BROUGHT A LARGE NUMBER OF GAULS, NOT THE ONLY INTO ROMAN CITIZENSHIP, BUT EVEN GAVE THEIR LEADERS (OVER 200) A PLACE IN THE ROMAN SENATE! AUGUSTUS CARRIED OUT THIS POLICY MORE CAREFULLY, BUT HE EXTENDED ROMAN CITIZENSHIP TO ALL OF ITALY HE LET THE OLD ARISTOCRATS KEEP CONTROL OF THE SENATE, BUT HE STARTED AN IMPERIAL BUREAUCRACY, IN WHICH PROVINCIALS AND NON-ARISTOCRATS WERE IN CONTROL, AND IT WAS THIS GROUP THAT TOOK OVER THE REAL POWER OF GOVERNMENT. IT WAS THIS GROUP THAT FOR TWO HUNDRED YEARS RULED ABOUT 50,000 ME MILLION PEOPLE IN PEACE (EXCEPT ONE CIVIL WAR) WITH A HIGH DEGREE OF JUSTICE, WITH AN ARMY OF ONLY 150,000 MEN. IT IS IRONIC THAT THE OLD ARISTOCRACY HAS HAD ITS VENGENCE THRU THE PEN OF TACITUS, A SENATOR, WHOSE TRAGIC SXXER LITERARY STYLE IS THE MOST PERSUASIVE MOXING IN ALL ANCIENT LITERATURE. TACITUS VIEWED ALL THIS UNIVERSALISM AS DECADENT, AND PAINSED THE EMPERORS IN THE BLACKEST COLORS THIS HAS BEEN THE PREDOMINANT VIEW

LET US SEE HOW TACITUS SHADES H, STORY: HE SPEAKS OF THE ROMAN CIVILIZATION BEING SPREAD IN & BATH, ENGLAND, "THE ROMAN H, STORIAN TACITUS REVEALST THE SUBTLE TECHNIQUE OF AGRICOLSA IN INNERVATING AND UNDERMINGING; THE MORAL OF THE CONQUERED BRITONS IN ORDER THAT A RACE OF RUDE AND PRIMITIVE MEN VERSED IN THE ARTS OF WAR MIGHT BE RENDERED PEACE FULL AND RRANQUIL THRU THE DELIGHTS OF LUXURY HE PRIVATELY ENCOURAGED AND OFFICIALLY HELPED THEM TO BUILD TEMPLES AND MARKET PLACES AND HOUSES PRAISING THE EAGER AND ADMONISHING THE SLOTH-FUL AND SO IMITATION BECAME A MATTER OF COMPULSION FOR NOW INDEED HE INSTRUCTED THE SONS OF CHIEFTAINS IN THE LIBERAL ARTS AND CONFRONTED BRITISH NATIVE WIT WITH GAELIC LEARNING SO THAT ONLY THOSE WHO WERE UNFAMILIAR WITH THE ROMAN TONGUE WERE REGARDED AS LACKING IN ELDQUENCE. THEN THEY WERE MADE TO ADOPT OUR STYLE OF DRESSING AND THE TOGA BECAME COMMON . LITTLE BY LITTLE THEY WERE LURED TO THE BLANDISHMENTS OF VICE, TO PORTICOES AND BATHS AND TO LUXURIOUS FEASTS . IN THIS WAY AN UNBOPHISTICATED PEOPLE LEARNT TO MISTAKE THE BATH OF SERVITUED FOR THE HIGH ROAD TO CULTURE." NOW NO MATTER HOW MUCH AS AMERICANS WE MAY LOVE LIBERTY, WE CANNOT BUT QUESTION TACITUS, WHETHER THEIR WASN'T A CONSIDERABLE GAIN, IN BRITISH CIVILIZATION, WHEN WHILE SAVIAGE TRIBES, EACH ARRAYED AGAINST HIS NEIGHBOR, WERE LED TO DWELL TOGETHER IN PEACE, LEARNED TO READ AND RIGHT, AND TO BATHE, AND TO COMMUNICATE WITH THE REST OF THE WORLD

SUMMARY: ROMAN UNIVERBALISM, HINGING ON THE NECESSITY FOR A SHRONG ARMY OPENED THE PATH OF CITIZENSHIP TO ALL MEN SERVING IN THE ARMY. THE ROMANS DID NOT IMMEDIATELY DECLARE ALL MEN ARE CAPABLE OF RULING THEMSELVES AS OUR DOCTRINE OF DEMOCRACTY FOR THE WORLD SEEMS TO, BUT THEY DID OPEN A PATH WHEREBY PEOPLE OF ANY RACE OR NATION, MIGHT BY EXXE SERVICE, AND BY PARTICIPATING IN THE ROMAN "CIVILIZATION" BECOME THE EQUALS OFTHE ROMAN ARISTOCRATS. THIS THE BREEKS WERE NEVER ABLE TO DO. ALCHOUGH STRONG GREEK GITIES EXISTED FOR 400 YEARS IN ITALY THEY NEVER COULD UNITE OR BHARE THEIR CITIZENSHIP TO ANY EXTENT WITH OTHERS. MORE THAN EVER BEFORE I THINK WE HAVE A NEED FOR A SYNTHESIS OF & ROMAN UNIVERSALISM, MEDERN GREEK CULTURAL DEMOCRACY, AND AMERICAN CIVILIZATION. THIS MEANS LITTLE UNTIL B WE BLUEPRINT IT IS SIGNAL TERMS.

I. ROMAN REALISM: AXXXNEXBESIANINGX85XTHEXROMANXXMERESXXMEXBERESARXREAEX From the beginning of her existence as a buffer state on the

SEVEN HILLS AT THE STRATEGIC TIBUR FORD THE ROAMANS HAD NO ILLUSIONS ABOUT WHAT THEIR STATE RESTED ON. FOR A SHORT TIME THEY WERE SUBJECT TO THE RULE OF THE MORE CIVILIZED, TECHNICALLY SUPERIOR, ASIATIC IMMIGRANTS, THE ETRUSCANS. FROM THEM THEY LEARNED MILITARY TECHNIQUES, AND THE RULE OF IMPERIUM, ABSOLUTE MILITARY POWER, SYMBOLIZED BY THE FASCES ( A BUNDLE OF RODS WITH AN AX IN THE CENTER) AND THEIR BEARB ERS, THE LICTORS. BUT THEN THE ROMAN NOBLES RESENTED FOREIGN RULE AND DROVE OUT THE FOREIGN INVADERS. THEY REALIZED THE NEED FOR ABSOLUTE MILITARY POWER, IMPERIUM, BUT DECIDED TO CONTROL IT BY THE GREEK PRINCIPLE OF ROTATION, AND THEIR OWN IDEA OF COLLEGIUM. THE SXXMEXXMERXXMAXXXX AND PROVINCIA. THUS THE IMPERIUM WAS TO BE HELD FOR ONE YEAR ONLY BY TWO MEN ACTING TOGETHER, AND IT WAS TO BE HELD <u>OUTSIDE</u> OF THE CITY.

THE ROMANS WERE THEN ASKED TO PARTICIPATE IN A MINIATURE UNITED NATIONS, THE LATIN LEAGUE THEY DID SO FOR A WHILE, BUT THEN, THREATENED WITH EITHER GREATER STRUGGLES AGAINST THE MIGHTY SAMNITES, THEY REALIZED THEY COULD NOT AS THINGS STOOD, DEPEND ON THE LATIN CONDEDERACY THEY THUS, BY DIPLOMACY AS MUCH AS BY FORCE, OUTMANEUVERED THE LATINS, CUT THEM OFF FROM THE SEA, DEFEATED THEIR CHI F GITY, AND BECAME THE CHIEF STATE IN THE LEAGUE. THEY CONTINUED TO SUPPLY MORE TROOPS THAN ANY OTHER CITY, BUT THEY & NOW HAD THE RIGHT OF DRAFTING MEN AND RESOURCES FROM THEIR ALLIES. IN LOCAL AFFAIRS THE LATINS HAD ALMOST COMPLETE FREEDOM

THE ROMANS, IN THE HARDEST WXW WARS THEY EVER FOUGHT, DESTROYED THE SABINE HILLSMEN. BUT THEY DID NOT LEAVE THEIR LAND A DESSERT, BUT SENT OUT COLONIES OF ROMAN YOUTHS TO FOUND CITIES, JOINED TO ROME BY MAGNIFICENT ROADS, AND PERMITTING THE COLONISTS STILL TO HAVE THE FULL RIGHTS OF ROMAN CITIZENSHIP.

XHEXRUMXMSXRX ONCE THIS NUCLEUS WAS SET UP NOTHING COULD STOP IT. THE GREEKS BROUGHT IN THE GREATEST TATICIAN OF THE DAY, PYRRHUS WITH HIS ELEPHANTS AND 20,000 MAGNIFICENTLY ARMED GREEKS. THE ROMANS WERE TERRIFIED BY THE FEARFUL BEASTS, AND OUTMANUEVERED THEY LOST TWO BATTLES. BUT PYRRHUS HAD TO ST BUT PYRRHUS HAD TO STOP: IN HIS WORDS: ANOTHER VICTORY LIKE THIS AND I AM A RUINED MAN!" HERE WAS THE CENTER OF THE MATTER WHERE ROMAN "CIVILIZATION" MATTERED. IF PYRRHUS LOST HIS 20,000 HE WAS FINISHED, AT ROME THERE WEREE EDOUGH MEN WHO HAD BEEN FED, CLOTHED, EDUCATED TAUGHT TO WORSHIP THE GODS, "CIVILIZED", SO BE EAGER AND ABLE TO DEFEND THE CITY, THAT IF ONE ARMY WAS LOST ANOTHER COULD TAKE ITS PLACE. THUS IN THE FIRST CARTHAGINI AN WAR, THE ROMANS, WHO NEVER BEEN SAILORS, HAD LITTLE DIFFICULTY IN INVENTING DERRICKS AND GRAPPLING HOOKS WHICH WOULD TURN A NAVAL BETTLE INTO A LAND ONE, BUT THEY CONTINUALLY LOST FLEETS IN STORMS TIME AFTER TIME (3) TIMES THEY LOST A FLEET WITH AT LEAST 20,000 MEN IN IT, BUT THEY COULD ALWAYS RAISE ANOTHER ONE THE FIRST CARTHAGINI AN WAR WAS WON WHEN THE ROMANS, THOUGH PROSTRATE, ASSEMBLED ALL THEIR SUPPLIES TO RAISE ANOTHER FLEET. THE CARTHAGINIANS, ALTHOUGH SEAMEN DECIDED IT WOULD BE BETTER BUSINESS , CHEAPER, TO PAY A SMALL TRIBUT TO ROME THAN TO RAISE ANOTHER FLEET.

IN THE SECOND CARTHAGINIEM WAR THE ROMANS AGAIN FACED GREAT LOSSES. AT TREBIA, LAKE TRASIMENNE, AND CANNAE, THREE ARMIES WERE LOST, INCLUDING OWER FIFTY THOUSAND ROMANS AND R AS MANY ALLIES. BUT HERE AGAIN ROMAN CIVILIZATION HELD UP. THE BIG TEST HERE WAS IN THE LATIN CITIES. WOULD THEY REMAIN LOYAL TO ROME ? FOR SOME REASON, XMEX 1 WOULD CALL IT ROMAN CIVILIZATION, THEY PREFERRED ROMAN PEACE, ROADS, PROTECTION, TO THE CHANCE FOR THEIR OWN LIBERTY AND CHAOS. THEY REMANIED LOYAL AND ROME OUTLASTED HANNIBAL.

SUMMARY: & THE ROMANS WERE UNDER NO ILLUSION, THAT THEIR PEACE AND SUPERIORITY RESTED ULTIMATELY ON FORCE. THEIRXMEANANE WORD FOR PEACE WAS"PAX" COMING FROM THE VERB "PACEO" TO SUBDUE THERE WAS ONLY PEACE WHEN OTHERS WERE SUBDUED YET THEY ALSO REALIZED THEY HAD TO GIVE TO PEOPLE WHO WORKED WITH AND FOR THEM SOMETHING. THUS THEY TREXX SHARED ROMAN CIVILIZATION, BATHS, ROADS, ROMAN REALISM (CONTINUED)

THE RESULT OF THES ROMAN POLICY WAS THAT AFTER LOO YEARS OF THE EMPIRE, ITS EMPERORS COULD BE DRAWN FROM THE SAVAGE SPANIARDS, EMPERORS WHO WOULD BUILD BATHS, GARDENS, XLLXQXER WHEREVER ROMAN CITIZENS WERE EXPECTED TO LIVE, AND WHO WOULD ALSO ENDOW SCHOOLS FOR ORPHANS.

<u>GREEK Culture</u>: The Romans w ere by no m eans perfect, and as a model  $I_N$  many wass the greeks may be much more helpful. Tt is they who set the classic models  $I_N$ the field of culture, which is used by us for Art, Literature, etc,  $I_N$  general the elaboration of the F of the ethic by the special work of <u>E</u>. (Here perhaps there was less of a specialized E, be and we shoud more accurately state the work of the citizen functioning as E.) Greek Democracy, whereby the great gower of the state would be controlled and guided by all the citizens is probably the center of Greek seperiority over the Romans. But the Greeks had a problem they couldn't solve. Their sitizens, they believed, to rule, had to be informed. **Xemer** therefore Plato bays a city can't be over 6,000 people, the number that hear a speaker easily.

MODERN CIVILIZATIOND: IT IS HERE THAT THE MODERN GIVILIZATION OFFERS ITS GREATEST CONTRIBUTIONS. OUR RADIO MAY NOW BE BARBARIC, BUT IT CAN BE A GREAT CIVILIZING FORCE. COMBINED WITH TELEPHONES, I THINK IT MIGHT BE A POSSIBLE WAY OF TURNING A COUNTRY OF MANY MILLION PEOPLE INTO I GREEK POLIS. CERTAINLY ALL COULD HEAR THE SPEAKER, AS ALL HEARD FRANKLIN D. ROSEVELT. VOTES COULD BE QUICKLY TAKEN THRU SOME TYPE OF TELEPHONES. MOST ESSENTIAL THEN, WOULD BE BA & INTRAMURAL SYSTEM COULD BE DIVISED WHERE THE RANKING PEOPLE WOULD BE PUT IN THE POSITION TO ADDRESS THE NATION.

<u>CONCLUSION</u>: IT THUS SEEMS TO ME, THAT CIVILIZATION, IS NOT A XXE VERBAL AFFAIR (PHILOSOPHY) NOR IS IT ONE OF THE INDIVIDUAL, NO MATTER HAOW GIFTED HE MAY BE RATHER IT IS THE WORK OF LARGE GROUPS OF MEN FIGHTI G SIDE BY SIDE, WORKING DESPARATELY TO CLEAR THE WILDERNESS AND MAKE A CITY. TO CONTROL THE FORCES OF NATURE AND MAKE LIESURE POSSIBLE. THEN IT IS THE STRUGGLE TO PRESERVE THE CITY FROM OTHER GROUPS OF MEN, AND THEN TO INCORPORATE THEM WITHING YOUR CITY. TO ME THEX GREEKS XBRKER (XNBX THEX BEMANBX THEMBELY ESX BML FROM XAY OF INCORPORATING OTHERS INTO IT, AND MODERN SCIENCE, THE BEST WAY OF COMBING THE TWO, AND TNBEN PROGRESSING TO DEVELOPMENTS THAT WOULD MAKE OUR ANCIENT IDEALS AS OBSOLETE AS A ROMAN CHARIOT. AGRICULTURE

# SUPPLY: WX8

- 1. EAREY ROMAN PEASANTS SELF-SUFFICING.
- 2. IN CRISES , EVEN IN EARLY TIMES GOVE. SUPPLIES GR IN
- 3. SALT SUPPLY TAKEN OVER.

DISTRIBUTIONS

- 1. ANNONA FROM GRACCHI ON -
- 2. POSSIBLE ANNONA OF OIL, WINE .....

While - Societas Cullicanoni

### CAPITAL INVESTMENT:

# I. IN AGRICULTURE:

- A. NOT ONLY RICHEST, BUT MIDDLE CLASSES (I.E. SULLA' VERERANS) INVEST IN LAND. B. THESE LIVE IN CITIES ON THEIR INCOME FROM LANDS.
- C. SLAVES EXTENSIVELY USED TO WORK FARMS.
- D. RATIONAL EXPLOITATION OF FARMS: HELLENISTIC SCIENCE : HANDBOOKS.

### II. IN INDUSTRY

- A. LARGE SCALE PRODUCTION FOR MARKETS.
- B. RICH INVEST IN BLAVES AND PUT THEM IN BUSINESS.
- C. THESE DRIVE OUT SMALL INDEPENDENT BUSINESS
- D. RATIONAL EXPLAITATION OF SLAVES ("MUST HAVE BEEN HANDBOOKS")
- E FAILURE OF PURCHASING POWER OF BOURGEOISIE IS CAUSE OF END OF INBUSTRIALSIN.

#### QUEST IONS:

#### IL. ON AGRICULTURE

- A. DOMINANCE OF POLITICAL PRESTIGE IN ACQUIRING LANDS.
- B. ONLY K IN GREEK WARS DO WE HEAR OF MASSES OF SLAVES.
- C. PEABANTS STILL PRODOMINATE (ROS.)
- D. EVEN C TO'S FARM PROBABLY MORE PEASANTS USED. E. CATO'S SLAVES NOT LIKELY TO REPRODUCE CHILDREN.

#### INI ON INDUSTRY

- A. FACT: LITTLE PRODUCED IN REPUBLICAN ROME
- B. ALL (?) REMAINS OF SHOPS SMALL SHOPS OR BAZAARS.
- C. IF SLAVES USED, COULD SOON BUY FREEDOM IF SUCCESSFUL.
- D. FACT NO HANDBOOKS ON INDUSTRY HEARD OF. BETTER CLASSES NOT INTERESTED IN,
  - NO TRADITION OF INTEREST IN, AS THERE WAS FOR AGRICULTURE.
- E. "PURCHASING POWER" MAINLY DEPENDS ON BOOTY FROM ASIA.
- D. KNOWM NO MEN RICH FROM INDUSTRY.

\*\*\*\*\*E. How COULD "MIDDLE CLASS" INVESTMENT BE POSSIBLE WITHOUT BANK OR STOCK FIRMS?

# INDUSTRY: NOTES:

### GENERAL VIEWS:

ROSTOVTZEFF: ABOUT THE HELLENISTIC TIMES R. IS RATHER CONSERVATIVE:

"How considerable was the actual and import and export of manufactured goods it is difficult to say. It may be regarded as a certainty that special products such as papyrus and parchment, perfumes.. class, beads.. Finer articles of art and articles of industry..weapons were objects of import and export. The same, however, was <u>Hardly</u> <u>true of Most of the everyday articles of use:</u> domestic tools, <u>AGRI-</u> cultural implements, kitchen ware, metals, pottery, ordinary clothes, shoes, slippers and the like. Some of these articles, especially clothes were made at home, but most of them were, no doubt, produced by Logal Artisans of the Greek cities, who were at the same time dealers in their own products." (CAH VIII 656)

BUT IN REGARD TO THE EMPIRE HE IS LESS CAREFUL:

- "THE EXCHANGE OF MANUFACTURED GOODS, ARTICLES NOT OF LUXURY BUT OF EVERYDAY USE WAS EXCEEDINGLY ACTIVE. EGYPT REMAINED THE ONLY CENTRE OF PRODUCTION FOR LINEN GARMENTS AND PAPER. LARGE MASSES OF WOOLEN STUFFS WERE EXPORTED FROM ASIA MINOR, ITALY, AND GAUL. ITALIAN RED-GLAZED POTTERY DOMINATED ALL THE MARKETS. THE METAL PLATE OF CAPUA AND ALEXANDRIA HAD NO RIVALS. GLASS WAS PRODUCED IN SYRIAN IN ALEXANDRIA, AND IN LARGE MASSES IN SOUTH ITALY. CLAY LAMPS WERE ONE OF THE MAIN SPECIALTIES OF ITALY. TOILET ARTICLES IN AMBER WERE MADE EXCLUSIVELY IN AQUILEIA, WHICH IMPORTED THE RAW MATERIAL FROM GERMANY AND MADE IT INTO FINE SMALL MIRRORS, BOXES, FLAGOONS, ETC., FOR EXPORT." (ROME 167)
- "BUT IT IS EVIDENT THAT THESE FEATURES OF HOUSE ECONOMY WERE MERE SURVIVALS. H ME PRODUCTION ALIKE IN ITALY AND IN THE PROVINCES WAS LIMITED TO A CERTAIN AMOUNT OF SPINNING AND WEAVING. For everything ELGE RECOURSE WAS HAD TO THE MARKET; AGRICULTURAL AND DOMESTIC IMPLE-MENTS, POTTERY, LAMPS, TOILET ARTICLES, JEWELLERY, CLOTHES, AND THE LIKE WERE NOT PRODUCED AT HOME EVEN IN THE VILLAGES. THE EXCAVATIONS OF POOR RURAL GEMETERIES PROVE THIS UP TO THE HILT." (ROME 302)

GOMMERUS

THE AUTHOR OF PROBABLY THE MOST QUOTED ARTICLE ON "INDUSTRIE UND HANDEL" INS QUITE FORTHRIGHT IN HIS ASSERTION OF BIG BUSINESS; ALTHOUGH HE DOES NOT STRESS THE MARKET BAXXE AS MUCH AS ROSTOVTZEFF;

"ES FRAGT SICH NUN, OB NEBEN DEM VORHERRSCHENDEN KLEINBETRIEB AUCH DER GROSBETRIEB ZUR ENTWICKLUNG GELANGT IST. DIE FRAGE MUST ENTSCHIEDEN BEJAHT WERDEN:"I. SKLAVENWIRTSCHAFT: 2. ANHAUFUND DES GELDKAPITALS. (P.W. 1483)

GERTEL

AN AUTHORITY WHO IN MANY WAYS FOLLWOWS ROSTOVTZEFS, DOES NOT AGREE

ON THIS POINT:

"& <u>Hence Large Scale Industry...DID NOT DEVELOP INTO A TRULY TYPICAL</u> FORM OF ECONOMIC ACTIVITY, BUT IF WE DISREGARD THE ALEXANDRINE PAPER INDUSTRY, REMAINED LIMITED TO PARTICULIAR BRANCEHES (THE CERAMIC, METALLURGIC, GLASS AND PERHAPS THE GARUM.)" (CAH X 423)

LOAN

EVEN MORE FORCIBLY PUTS THE CASE AGAINST THE EXISTENCE OF LARGE INDUSTRY.

# NOTES: 1. OPINIONS

LOAN (CONTINUED) "THE EMERGENCE OF PRODUCTION ON A LARGE SCALE DEPENDS ON MANY ADDITIONAL FACTORS: LABOR-SAVING MACIINERY, CHEAP FUEL, THE NEARNESS OF ESSENTIAL RAW MATERIALS AND THE INTEREST OF THE CAPITALIST CLASS IN INDUSTRIAL ENTERPRISE. ROME HAD NONE OF THESE." (63)

# T. FRANK IS ALSO OF THIS VIEW:

"When, However, we look about for the products of this putative industry, they are difficult to find......After so measer a harvest of evidence we are forced to the conslusion that the industrial class, suchas was, could hardly have supplied a vast market. Probably there were only the men needed to make clothes, shoes, and armor for Rome's expanding armies, wagons, plows and hoes for the farmers' pots and pans for the kitchen." (Eco Hist. P. 103 applies to earlier Repub)

# NOTES: 11 LITERARY:

According to Cassell's Latin Dictionary there are four possible words for factory: 1. Fabrica; 2. Officina; 3. Ergastulum; 4. Tabernae Harper's Latin Dictionary gives the following meaning for these words:

> 2. OFFICINA: WORKSHOP, MANUFACTORY: CICERC: DE OFF 1 151 "OPIFICESQUE OMNES IN SORDIDA ARTE VERSANTUR; NEC ENIM QUICQUAM INGENIUM HABERE POTEST OF."

> > 1, 42, 150

VERR 2,4,24, 54

BRUT. 8, 32 "OFF. DICENDI" "STUDIO OF ELOQUENCE.

PLINY: N. H. 35: 143: OF. PICTORIS - STUDIO 35: 155; OF. SCULPTORIS

16:23 AERARIORUM; 34: 175 OFF. PLUMBARIAE - SMITHY

13: 75-6 FOR PAPER: MAY BE LARGE, OFTEN GITED AS SUCH, BUT NO SIZE MENTIONED. 35: 143 OF. FULLONIS

35 : 146 PURBURARIUS " 9: 133 TINGUENTUM.

INSCRIPTIONS: "EX OFFICINA FELICIS" AND EX"EX OFFICINA KAPITONIS" ALSO FOUND ON MANY LAMPS: "

A. DE RIDDER: "LE OFFICINA ETAIT LA FABRIQUE D'OU SORTAIT LA MAMPE ET LE NOM PROPRE QUI SUIT AU GENITIF DESIGNE LE PROPRIETAIRE ACTUEL DE LA FABRIQUE, SOIT PEUT-ETRE CE QUE NOUS APPELONS AUJOURD'HI LA RAIGON SOCIALE." (D.S. VII 1330) THIS SEEMS TO ME TO BE THE BEST PROOF FOR OFFICINA SOMETIMES MEANING "FACTORY" BUT EVEN HERE WE DO NOT KNOW THE SIZE OF THE CONCERNS.

3. ERGASTULUM (FROM GREEK) & BORKHOUSE FOR OFFENDERS, A HOUSE OF CORRECTION SUET: AUG 32 AND TIB 8 - EMPERORS WIGH TO INSPECT PLUT. TIB. GRACCH VIII 9 Spartian: Hadrian XVII : EMPEROR DISBANDS PETRONIUS 81 APUL. MET IX XII

> H. THEDNAT: "LES ERGASTULA ETAIENT DES BATIMENTS LE PLUS GOUVENT GOUTERRAINS, DESTINES DES A SERVIR D'HABITATION A DES ESCLAVES ET AUSSI A DES CONDAMNES QUE L'ON EMPLOYAIT <u>ENCHAINES</u>, A DIVERS TRAVAUX, ET PLUS SPECIALEMENT A LA CULTURE DU SOL<sup>®</sup> FROM THIS IT IS HARD TO TO ACCEPT HIS CONCLUSION: " IL Y EN AVAIT POUR LES CARRIERES, LES MOULINS

NOTES: 11 LITERARYNAX (2) CONTINUED).

ET PROBABLEMENT POUR TOUS LES TRAVAUX OU INDUSTRIES QUI DEMANDAIENT UN NOMBRE DE BRAS ASSES CONSIDERABLE,"

THE ONLY REFERENCE THEDNAT GIVES IS TO THE VTH CENTURY A.D. FOR INDUSTRIES. It is clear that they were thought harmful by Augustus, Tiberings, and Hadrian. And with the two leading characteristics of Being underground and having the men chained, does not suggest conditions where skilled, or even semi-skilled men could work. At least I can find no reference where "ergastulum" refers to anything like a factory. (Thednat D.S. II 8:0)

HARPERS:

4. TABERNAE: "A HUT, SHED, BOOTH STALL, SHOP CONSTRUCTED OF BOARDS.

1. HENCE IN GENERAL ANY SLIGHT STRUCTURE SUBED FOR A DWELLING HUT OR COTTAGE (HOR. C. 1, 4, 13) (VERY RARE. OF STALLS IN THE CIRCUS (CIC. MUR. 35, 73).

II. A BOOTH SHOP, WORK SHOP, INN, TAVERN. Hor. S. 1, 3, 131 "TABERNA SUTOR ERAT" JUV. 13, 45 "TABERNA LIPAREA" - VULCAN'S SHOP.

THE EMPHASIS HERE SEEMS TO BE ON THE ELEMENT OF SMALLNESS, WXXM AND NOTHING TO SUGGEST A PLACE WITH "THOUSANDS& OF WORKERS. "

CONCLUSION: FROM THIS SURVEY I CANNOT FIND ONE LATING WORD WHICH IMPLIES A FACTORY. <sup>11</sup>Officina,<sup>11</sup> if any, seemsxee might indicate such from its use on Lamps, BUT WHETHER THESE ARE JUST THE TRADEMARK OF AN INDIVIDUAL CRAFTSMAN, OR THE MAKER OF A MOULD FOR A SMALL WORKSHOP, WE CANNOT DETERMINE. INVESTIGATION THIS TYPE OF XREMMENX I THINK IS ESPECIALLY VALUABLE TO SOBER OUR TENDENCY TO MODERNIZE THE ANCIENT WORLD. THUS, IF WE THOUGHT IN LATIN TERMS, WE WOULD NOT BE APT TO USE SUCH TERMS AS "INDUSTRIALIST" OR "BOURGEOISIE" FOR WHICH I CAN FIND NO EQUIVALENT IN LATIN.

AUGUSTUS TO SOME EXTENT ALSO FOSTERED INDUSTRY AS A RULER:

Rostov:

"CAMPANIA AND ETRURIA WERE NOT ALONE IN DEVELOPING ITALIAN INDUSTRY IN THE AUGUSTAN AGE. AT THAT TIME A SECOND PUTEOLI AROSE IN AQUILEIA, WHICH BECAME A FLOURISHING CENTRE OF BOTH COMMERCIAL AND INDUSTRIAL LIFE IN THE NORTH....

THUS AQUILEIA GRADUALLY BECAME NOT ONLY A CITY OF VINE-GROWERS AND MERCHANS BUT ALSO ONE OF THEMOST IMPORTANT CENTRES OF INDUSTRY. IN VISITING THE USEUM OF THE TOWN, ONE IS STRUCK BY THE ABUNDANCE OF REFINED AND ORIGINAL GLASS PRODUCTS, EXPECIALLY OF IMITATED ENGRAVED STONES AND CAMEOS AND VASES OF DIFFERENT SHAPES, BY THE MASSES OF AMBER ARTICLES, BY THE QUANTITIES OF IRON IMPLEMENTS, BY SOME VALUABLE PRODUCTS OF BRONZE AND SILVER TOREUTIC ART, WHICH BELOND IN PART TO THE AUGUSTAN AGE. BECOND DOUBT AQUILEIA BECAME THE PUTEOLI OF NORTH ITALY AS EARLY AS THE TIME OF AUGUSTUS, THANKS PROBABLY TO THE EFFORTS OF AUGUSTUS HIMSELF AND OF SOME BEMBERS OF HIS FAMILY WHO OFTEN RESIDED IN THE GITY ...IT IS ENOUGH TO NOTE HERE THAT THE BEGINNING OF THE PROCESS DATES FROM THE REIGN OF AUGUSTUS. TO THE SAME TIME PROBABLY BELONGS THE GROWTH OR THE REVIVAL OF ANOTHER SPECIALITY OF POMPETITO A FAMOUS FISH SAUCE, THE POMPETAN GARUM." 71.

FRANK

"SINCE VESPASIAN SEEMS TO HAVE BEEN RESPONSIBLE FOR CONVERTING THE NERONIAN PORTI -CO INTO A SPICE MARKET AND SINCE HE ALSO MADE SOME EFFORT TO CONTROL THE OUTFLOWING OF MONEY FOR EASTERN LUXURIES, IT IS LIKELY THAT HE HAD OFFICIAL PRICES POSTED AND THAT THESE LISTS WERE PLYNY'S SOURCE. PLINY WARNS US THAT HE GIVES AVERAGE PRICES SINCE PRICES WERE APT TO FLUCTUATE WINH QUALITY AND SEASON" (PLINY 33, 166) (SURV. V P. 284

"OPIFICES AD DUO MILIA HOMINUM ERANT; EOS PUBLICOS FORE POPULI ROMANI EDIXIT, CUM SPE PROPINQUA LIBERTATIS, SI <u>AD MINISTERIA BELLI ENIXÉ R OPERAM NAVASSENT.</u>" XXVI 47, 2. CF. POLYB X 17 9F.

#### TOUTAIN

"ONE CENTRE OF THE ETRUSCAN METAL INDUSTRY SEEMS TO HAVE BEEN ARRETIUM. IN 205 WHEN SCIPIO WAS STARTING FOR AFRICA, ARRETIUM PROVIDED HIM WITH 3,000 SHIELDS, 3,000 HELMETS, 50,000 DARTS, JAVELINS, AND LONG PIKES, BESIDES AXES, PICKS, SCYTHES, ETC." (NOTE P. 212)

# LIVY XXVIII, 45:

Toutain "IN addition to these stationary industries, every army had attached to it Bodies of workmen who repaired swords, shields, helmets, and theengines which were the artillery of the day, and supplied the combatants with the spear heads, of which there was a great expenditure in every campaign. In Rome itself there were smaller workshops, where the legionary obtained his arms before proceeding to the field." (236)

T. FRANK (ECO HIST. 180FF.)

B. MINES: THESE WILL BE MAINLY TREADTED IN PART 11 OF THIS PAPER.

A SUMMARY HERE MIGHT BE HELPFUL:

Toutain "IT would be excessive and therefore untrue to say that mines, quarries, and salt works were legally the property of the Emperor. In the second century of the Empire, under the Antonines, the marble-quarries on Pentelicon belonged to the celebrated rhetorician Herodes Atticos. This however, seems to be an exceptional case. If not legally, at least in practice mines, quarries, and salt works, or at least those of any importance, were part of the imperiall domains." p.289 \$EX.

LOAN

BRICKS ATYPICAL INDUSTRY:

A. ORIGINALLY PART OF FARM WORK - FREE OF STIGMA OF TRADE.

8. EXPENSIVE TO IMPORT - NEARBY ESTATES HAVE GREAT ADVANTAGE.

### ESSENTIAL TO NOTE:

1. UNUSUAL MEANS USED TO EXPAND ANTONINUS FACTORY (IMPLIED BY GOMMERUS'S

"KONFISCATION" ABOVE).

2. FACTORY NOT SO TERRIBLY LARGE - NEVER UP TO 100 EMR WORKERS.

# F. BREAD

AN IMPOSING MONUMENT OF A BAKER IS CERTAINLY XMPOSSIBLE PROOF OF BIG BUSINESS, AS WE SEE INTERPRETED BELOW, ALTHOUGH WE SEE THAT IT WAS FUNCTIONED AS AN AGENT OF THE GOVERNMENT (CF. "REDEMPTOR" BELOW).

ROSTOVIZEFF

C. I.L.

INSCRIPTION READS: "EST HOC MONIMENTUM MARCEI VERGILEI EURYSACIS, PISTORIS, REDEMPTORIS; APPARET ." 1. 1013-15

FICTURE OF TOMB OF EURYSACES PL. IV. ROME

ROSTOVTZEFF

"THE INSCRIPTION MEANS: 'THIS IS THE MONUMENT OF MARCUS VERGILIUS EURYSACES, BAKER, AND CONTRACTOR ;; HE WAS ALSO AN APPARITOR (ATTENDANT OF A MAGISTRATE. ). IT ..... "IT IS A TYPICAL PICTURE OF A BIG BUSINESS CONCERN OF THE LATE REPUBLICAN OR EARLY IMPERIAL PERIOD, IN WHICH SCORES AND PERHAPS HUNDREDS OF WORKING MEN BOTH SLAVE AND FREE, WERE ENGAGED. P.32

PICTURES OF 41 MEN DOING DIFFERENT OPERATIONS IN BAKING. PROBABLY TWO OR THRX

THREE TIMES THAT MANY ON ORIGINAL MONUMENT (PARTLY DESTROYED).

LOAN:

BAKING NOT TYPICAL INDUSTRY: "IN BAKING THERE WAS NEED FOR A MUCH LARGER TYPE OF WORK ROOM THAN THAT OFFERED BY THE NORMAL SHOP .. " P 65

LOAN

"THEX" "AS HIS TITLE OF PISTOR REDEMPTOR IMPLIES (C.I.L. 1958) HE WORKED UNDER CONTRACT EITHER TO SUPPLY BREAD FOR PUBLIC SLAVES AND THE SOLDIERS STATIONED NEAR THE CITY, OR TO MEET THE NEEDS OF MANY SMALL RETAILERS. " PG6 0

# INDUSTRY: (GOVERNMENT) FACTORIES (5)

LOAN (P.66) ALSO USES A REFERENCE (GAIUS 1,34) TO THE REWARDS OFFERED BY TRAJAN TO CONCLUDE THAT EURYSECES HAD AN UNUSUALLY LARGE FACTORY:

LOAN

"THE QUESTION MATURALLY ARISES WHETHER BAKERS WITH SUCH WORKROOMS DOMINATED THE INDUSTRY AT ROME. FORTUNATELY INFORMATION ABOUT THE SIZEOF PRODUCTION IN THE EARLY SECOND CENTURY IS GOVEN BY THE EDICT OF TRAJAN OFFERING SPECIAL PRIVILEGES TO THOSE WHO MILLED 75 BUSHELS A DAY. ADDITIONAL EXEMPTIONS WERE EXTENDED TO THOSE WHO BAKED 25 BUSHELS A DAY. ... SINCE ABOUT 70 LOAVES OF BREAD COULD BE MADE FROM A BUSHEL OF THE FINEST FLOUR, A DAILY OUTPUT OF ABOUT 1,800 LOAVES MAY BE ASSUMED." (P. 66) BUT THE IMPORTANT FACT IS THAT HE WAS A CONTRACTOR FOR THE GOVERNMENT. ANOTHER INTERESTING FACT IN REGARD TO BAKING IS THAT ONLY THE BOOR PEOPLE

BOUGHT BREAD. CICERO DEFINES A MISER AS A MAN WHOSE HOUSEHOLD LACKS A BAKER.

CICERO "PISTOR DOMI NULLUS, NULLA CELLA" (IN PISO 67)

C. I.L. GUILD OF BAKERS IN HOUSE OF STATILIUS TAURUS VI 6219

PLINY 18, 107 POOR PEOPLE BUY BREAD SINCE 168 B.C.

#### SUMMARY

#### SEVERXX

THOSE INDUSTRIES WHICH HAVE MOSTKX NEARLY APPROACHED A LARGE SCALE PRODUCTION WERE AGENTS OF THE GOVERNMENT, EITHER USING RESOURCES OWNED BY THE VEKEX OR WERE GOVERNMENT (PAPYRUS, CUNNABAR, MINES,)BRXEKS, OWNED BY THE EMPEROR PERSONALLY (BRICKS), OR WERE SUPPLYING THE GOVERNMENT(ARMS, BAKING, SHIPPING). UNDER THESE CONDITIONS, IN THESE FIELDS THERE WAS LITTLE CHANCE FOR THE COMPETITION BETWEEN BUYER AND SELLER, WHICH WOULD GIVE RISE TO A MODERN PRICE MAKING MARKET.

# INDUSTRY: (PRIVATE) FACTORIES

ROSTOVTZEFF: PUTEOLI BAB BETTER AND MORE PROSPEROUS THAN OSTIA BEFORE CLAUDIUS IMPROVED THE HARBOR OF THE LATTER: "IT WAS A BETTER PLACE BECAUSE THE CAMPANIAN MARKET WAS MORE VALUABLE FOR THE MERCHANTS THAN THE ROMAN AND BECAUSE A RETURN CARGO WAS EASILY FOUND THERE, WHEREAS NONE WAS AVAILABLE AT OSTIA, SINCE ROME NERY NEVER WAS AN INDUSTRIAL CENTRE OF IMPORTANCE." ROME P. 151

# A. TANNING

LOAN:

"BECAUSE OF THE NEED OF WORKROOMS OF CONSIDERABLE SIZE AND OF ELABORATE AND EXPENSIVE EQUIPMENT, TANNING WAS NATURALLY CODUCTED ON A LARGE SCALE #.77 (FLSO T. FRANK "ECO. HIST." 259).

#### SNEEXTHEXEEXTHERXWARXFROEX

### BXXXEXXXEX

ONCE THE LEATHER WAS MADE, IT WAS SOLD TO THE SMALL ARTIGAN:

LOAN

"HAVING SECURED THEIR LEATHER FROM THE TANNER, THE COBBLER REPAIRED TO THE SMALL BOOTH WHICH SERVED BHEM BOTH AS WORKSHOP AND SALESROOM." P. 78

### B. TEXTILES

GOMMERUS

"Die Zahl der Arbeiter" muss in diesen Webereien ziemlich großs gewesen sein; da man die Massenproduktion nur durch anhaufung menschlicher Arbeitskraft erzielen konnte."

THEN GOMMERUS SUPPLIES THE PROOF:

"VGL. DAS POMPIANISCHE GRAFFITI C. I.L. 1507 MIT DEN NAMEN VON 13 SKLAVEN DIE IN WEBEREI GEARBEITET HAMEN."

HE THEN RETURNS TO MENTION OF GOVERNMENT TRADE MENTIONED ABOVE:

"NAMENTLICH DIE WERKSTATTEN DIE FUR DIE ARMEE LIEFERUNGEN UBERNAHMEN, DIE IN DER SPATER ZEIT DURCH DIE KAISERLICHE WEBEREIEN AUSGEFUHRT WURDEN, KOMMEN <u>NUR IM GROSSEN GEWIRTSCHFTET HABEN.</u>"... 1491

EVEN THIS IS NOT ESSENTIALLY TRUE. LARGE AMOUNTS OF GOODS CAN BE PRODUCED

BY SMALL SHOPS.

INDUSTRY: (PRIVATE) FACTORIES (2)

B. TEXTILES (CONT.)

ROSTOVTZEFF:

11

"IN THE EARLIER PERIOD (DOWN TO THE END OF THE IST CENTURY B.C.) POMPETI WAS MAINLY A CITY OF LANDOWNERS AND OF RESIDENTIAL HOUSES. WITH THE ESTABLISHMENT OF THE EMPIRE INDUSTRIALIZATION SETS IN AND REACHES ITS CLIMAX IN THE PERIOD JUST BEFORE THE DESTRUCTION OF THE CITY. IN THE EARLY PART OF THE IST CENTURY, A.D. THE STRADA DELL'ABBONDANZE WAS STILL A STREET OF RESIDENTIAL HOUSES. AT THE TIME OF THE ERUPTION MOST OF THE RESIDENTIAL HOUSES WERE OWNED BY INDUSTRIALSISTS AND SHOPKEEPERS, AND THE STREET BECAME ONE OF THE BUSIEST PARTS OF POMPEIL. THE MOST IMPORTANT CONCERNS WERE THOSE CONNECTED WITH CLOTHING. IT IS NO ACCIDENT THAT THE ONLY LARGE EXCHANGE BUILDING WAS BUILT BY EUMACHIA FOR THE FULLONES AND THAT THIS BUILDING IS CONNECTED WITH THE STRADA DELL ABBONDANZA. NEXT IN IMPORTANCE TO THE PRODUCTION OF WOOLLEN CLOTHES (FA VOURED BY THE NEIGHBORHOOD OF THE LARGE GRAZING REGION OF SAMNIUM AND APULIA) WAS THE MAKING OF PERFUMES (CAMPANIA WAS RICH IN GLOWERS, ESP ROBES) AND OF FISH SAUCE (GARUM) A NATURAL PRODUCT OF A CITY BY THE SEA." PROME P. 514

THE FACT THAT AN INDIVIDUAL HAD TO BUILD THE HALL WOULD SUGGEST THAT THE WORK WAS CARRIED ON BY INDEPENDENT WORKERS RATHER THAN LARGE INDUSTRIALSITS. IN FULLING, DYING, TEXTILE MANUFACTUING, ETC. WE HEAR OF IMPORTANT PARTS PLAYED BY GUILDS.

C. I.L. VI 10298 FULLERS GUILD

- 266 GUILD WINS LAWSUIT. BULLER HAS TO PAY FOR USE OF 2 PUBLIC LACUS. JUDGEMENT REVERSED. "EX EO TEMPORE EX QUO AUGUSTUS REM PUBLICAN OBTINERES COEPIT USQUE IN HODIE NUMQUAM HAEC LOCA PENSIONES PENSITASSE." CF. MAU 412-416

BUT CRASSUS GROUP WAS FAR MORE LIKE A CONTRACTING GANG THAN A FACTORY FORCE.

G. VILLAS

THESE ARE SOMETIMES USED AS EXAMPLES OF FACTORIES; BMXXXMKXKAEXXXMAX XNEX

TOUTAIN

"THERE WERE ALSO BIG WORKSHOPS, LARGE MANUFACTUREBSEM ONE MIGHT ALMOST SAY FIRMS, CORRESPONDING TO THE BIG INDUSTRY OF OUR OWN TIMES. THIS, INDEED WAS THE ONLY FORM IN WHICH CERTAIN INDUSTRIES COULD BE CONDUCTED. "MANY OF THESE BIG WOR SHOPS WE KNOW TO HAVE BEEN ORGANIZED ON HUGE LANDED ESTATES, IN WHICH INDUSTRY WAS COMBINED WITH AGRICULTURE AND STOCK BREEDING. IN THE VILLA AT MARTRES-TOLOSANES, SOUTH OF TOULOUSE, A WEAVING MILLM HAS BEEN IDENTIFIED. SINCE THE STAFF EMPLOYED IN THE VILLA AMOUNTED TO 200 OR 300 PERSONS, IT IS POSSIBLE THAT THE MILL WAS SET UP BOLELY TO SUPPLY THEIR NEELDS. BUT THERE IS NO PROOF TH T THE CLOTH MADE HERE WAS NOT SOLD OUTSIDE, AT LEEST IN PART, THUS FIGURING AMING THE REVENUES OF THE ESTATE." P. 301

SEVERAL EXAMPLES ARE GIVEN, ALL VILLAS, FAR FROM LARGE TOWNS.

SUMMARIZES "IT IS PROBABLE, HOWEVER, THAT THE WORKSHOPS THUS MAINTAINED SUPPLIED ONLY LOCAL NEEDS OR AT THE MOST THOSE OF THE SURROUNDING DISTRICT." . 302 THUS THERE WAS NO CONTRIBUTION TO A GENERAL MARKET.

### INDUSTRYR REVIEW

LOAN

ROME: FROM THE MATERIALS CONSIDERED IN THIS CHAPTER IT A PEARS THAT THE CLE AREST EXAMPLE OF AN INDUSTRY EMPLOYING HUNDREDS OF WORKMEN WAS THE MAKING OF BRICKS, THOUGH THERE IS ALSO SLIGHT EVIDENCE FOR THE LARGE SCALE PRODUCTION OF CLAY LAMPS.FOR THESE TWO INDUSTRIES ROME BORE SLIGHT RESEMBLANCE TO POMPEII. AGAIN, IN THE MAKING OF BREAD, IN TANNING AND IN FULLING, CONCENTRATION INTO LARGE SHOPS WAS DICTATED BY THE NEED OF MACHINERY AND CAPITAL...GROUPS SUCH AS THESE, HOWEVER, EXISTED AT POMPEII WHERE THE SMALL ARTISAN SALES SHOP REMAINED THE ESSENTIAL METHOD OF PRO-DUCTION.

FURTHERMORE, AT ROME, AS AT POMPEIL, NO TRACES OF FACTORIES HAVE APPEARED FROM THE EXCAVATIONS, AND WE BEARCH THE SOURCES AND THE IN-SCRIPTIONS IN VAIN FOR REFERENCES TO METAL FOUNDARIES AND SHOE FACTORIES." P. 112

TARN

THE EAST: "THE FEW INDUSTRIES OF HELLENISM WERE SMALL AND SCATTERED, AND THERE WAS NO CLASS CONSCIOUS PROLETARIAT OF PRODUCERS." P. 110.

- E. ALBERTINT: <u>Gaul</u>: "Industrial activity is the distinguishing mark of "oman Gaul an activity embracing its innumerable workshops articles of every kind for consumption at home or abroad, it is most often in the hands of men working at home for their own account. <u>A workshop is run by the members</u> <u>of one family with at the most, a few paid workmen</u> in addition. Only a few cases notably in the pottery and glassx industries did the industrial system develop so as to include a number of real factorses Employing many workmen, wherher free Labourers or Slaves. CAH X11 504-5 Egypt:
- BELL

AKEXXMORXX: "IN THE COUNTRY D STRICTS INDUSTRY WAS USUALLY ON A SMALL SCALE AND SEXERXEXEGEXE SERVED LOCAL NEEDS ONLY BUT AT ALEXANDRIA AND PERHAPS IN THE DELTA CAPITALISTIC ENTERPRISE WAS DOUBTLESS COMMON ENOUGH, THOUGH THE PAUCITY OF THE EVIDENCE FORBIDS ANY INSIGHT INTO ITS METHODS." CAH X P. 306

CERTEL

GENERAL SUMMARY: "BUT, IF WE DISREGARD THE ALEXANDRIAN PAPER, INDUSTRY, REMAINED LIMITED LIMITED TO PARTICULIAR BRANCHES (THE CERAMIC, METALLURGIC, GLASS AND PERHAPS THE GARUM INDUSTRIES, BRANCHES WHICH WERE BASED ON THE POSSESSION OF A CERTAIN TECHNIQUE, ON THE EXERCISE OF A CERTAIN ARTISTIC SKILL, AND APART FROM THESE AT BEST ON THE SPECIAL ENTERPRISE OF INDIVIDUAL INDUSTRIALISTS, I NSTEAD OF ON THE IMPULSE <u>INMERRENT IN A</u> DEFINITE WORKING METHOD TOWARDS THE ATTAIN MENT OF <u>PROGRESSIVELY GREATER</u> EFFICIENCE--A DEVELOPMENT WHICH IS FOUND ONLY WITH THE COMING OF FACTORIES." CAH X 423

#### INDUSTRY

UNLIKE AGRICULTURE, FOR INDUSTRIAL PRODUCTS WE HAVE NO MENTION OF A RECOGNIZED MARKET. WE SHALL THEN HAVE TO SEARCH FOR SIGNS OF IT INDIRECTLY IN: <u>1. PRODUCTION</u>: WERE THERE LARGE FACTORIES PRODUCING GOODS WHICH WOULD REQUIRE A LARGE MARKET TO DISPOSE OF THEM?

11. DISTRIBUTION: WHAT KNOWN WAYS WERE GOODS DISPOSED OF? DO THESE POINT TO THE DEVELOPMENT OF A MARKET, OR ARE THEY A SUBSTITUTE FOR IT?

111. THE INDUSTRIALISTS: DID PRODUCTION AND BUYING AND SELLING OF GOODS MAKE MEN VERY RICH AND POWERFUL AS TODAY?

IV. POLICY: Was THE IMPORTANCE OF INDUSTRY SHOWN BY ITS INFLUENCE ON GOVERNMENT POLICY IN INTERNATIONAL AFFAIRS OR TAXING POLICIES?

\* \* \* \* \* \* \* \* \* \*

1. PRODUCTION: GOMMERUS DECLARES THAT THERE WAS A DEVELOPMENT OF BIG BUSINESS BASED ON SLAVERY AND CAPITAL. HOWEVER WHEN WE LOOK FOR SPECIFIC LARGE INDUSTRIAL CONCERNS WE HAVE SOME TROUBLE.

A. VERBAL EVIDENCE: IT IS A STRIKING FACT THAT WE HAVE NO CLEAR PROOF OF A WORD WHICH MEANS "FACTORY." "FABRICA" SEEMS TO REFER MOSTLY TO A DIVISION OF THE MILITARY ORGANIZATION. "ERGASTULUM" TO A SLAVE'S WORKHOUSE. "TABERNAE" TO A SELLER'S STALL, SMALL IN SIZE. "OFFICINA", THE MOST LIKELY CANDIDATE BECAUSE IT IS FOUND ON SOME LAMPS, OFTEN MEANS"STUDIO" OR WORKSHOP" OF AN INDIVIDUAL.

B. GOVERNMENT FACTORIES: IF OUR ULTIMATE GOAL IS TO FIND EVIDENCES OF A MARKET, WE MUST EXEMPT PRODUCTS WHICH WOULD NOT BE SOLD IN A MARKET. THESE GOODS COULD BE DISTRIBUTED BY ADMINISTRATIVE MEARS SUCH AS RATIONING (ARMY) OR SOLD AT SET PRICES. THIS INCLUDES MOST OF THOSE INDUSTRIES WHICH APPROACHED LARGE SCALE PRODUCTION. IN THESE THE GOVERNMENT WAS EITHER THE PURCHASER (ARMS, BAKING, SHIPPING) OR THE SELLER (PAPYRUS, CINNABAR, MINES, BRICKS). IN EITHER CASE NO PRICE WAS LIABLE TO FORM THROUGH COMPETITIVE BIDDING OF BUYING AND SELLING CROWDS WHICH IS THE CHARACTERISTIC OF THE MODERN MARKET.

C. GUILD INDUSTRIES: THERE WAS LARGE SCALE TEXTILE PRODUCTION. FROM THE

INDUSTRY (2)

### PRODUCTION: GWILD INDUSTRIES:

NECESSITY OF A LARGE WORKROOM, MACHINERY, UTILITIES SUCH AS WATER, IT HAB BEEN SUPPOSED THAT IN WEAVING, TANNING, FULLING, AND DYEING, WE MUST HAVE HAD LARGE FACTORIES, WITH EQUIPMENT SUPPLIED BY CAPITALISTS. I HOWEVER WOULD LIKE TO PROPOSE THAT THESE WERE SUPPLIED BY THE RESPECTIVE GUILDS. WE DO KNOW THE GUILDS EXISTED AND WERE INFLUENTIAL. WE KNOW OF NOT MORE THAN ONE "CAPITALST" WHO IS CALLED SUCH BECAUSE OF A LARGE DONATION OF MONEY HE MIGHT HAVE ACQUIRED IN SOME OTHER WAY. IN GENERAL, WE KNOW OF NO LARGE FORTUNES MADE IN THESE INDUSTRIES. IN POMPETI WE KNOW OF A GUILD HALL OF THE FULLERS, WHICH WAS GIVEN BY EUMACHIA OFFICE TO THE FULLONES. THIS SEE ALSO PROOF OF GUILD OWNED UTILITIES.

D. METALG INDUSTRY: HERE ALSO THE RAW GOODS WERE CONTROLLED BY THE GOVERNMENT, WHICH ALSO BOUGHT MUCH OF THE WARES FOR THE ARMY. BUT EVEN HERE THERE IS LITTLE EVIDENCE FOR LARGE SCALE FACTORIES. THE GOLDSMITHS WERE INDIVIDUAL CRAFTSMEN. IN BRONZE FROM THE FACT WE KNOW OF ONE FACTORY OF S FREEMEN AND 3 IN ANOTHER, PEOPLE HAVE CONJECTURED WE THE EXISTENCE OF AN INDUSTRY WITH THOUSANDS OF SLAVES. THIS ISCLEARLY WITHOUT FOUNDATION. LIKEWISE IN IRON, IN ROME, THE LARGEST GROUP WE KNOW OF IS 7 GREEDMEN! THE LEAD PIPES FOR AQUEDUCTS WERE MADE BY SMALL GROUPS. WHILE THERE WAS DOUBTEESS A VERY HIGH VOLUME OF PRODUCTION IN THESE GOODS, IT MEE IS FALSE TO ASSUME THIS NECESSITATED LARGE UNITS OF PRODUCTION. MANY SMALL, INDEPENDENT WORKERS, CAN ALSO TURN OUT GREAT AMOUNTS OF MATERIAL.

E. GLASS AND POTTERY WERE ALSO PRODUCED IN GREAT QUANTITY. BUT THE LARGEST UNITS OF PRODUCTION ARE VERY SMALL (14 OR 15 MEN). IN ONE CASE 58 MEN ARE MENTIONED IN A POTTERY FIRM, BUT THIS SEEMS TO BE THE ACME OF THE DEVELOPMENT. GAUL ALSO OFFERS THE POSSIBILITY OF LARGE FACTORIES IN THE RUINS OF GRAUFESENQUE AND LEZOUX, WHICH GOVER ONE AND NINE KILOMETERS RESPECTIVELY. THIS ALSO MAY, HOWEVER, HAVE BEEN A GOLONY OF INDIVIDUAL WORKERS. AT ANY RATE IT DOES NOT SEEM LIKELY THAT THIS WAS LINKED WITH SLAVERY, WHICH WAS ALMOST NON-EXISTENT IN

# INDUSTRY (3)

## E. GLASS AND POTTERY (CONTINUED)

THAT PROVINCE ALSO TO BE DISCOUNTED HERE ARE THE WORKSHOPS ON VILLAS, WHICH PRODUCED MAINLY FOR THEMSELVES, AS FORERUNNERS OF THE MEDEVAL MANOR, OR AT THE MOST SUPPLIED THE NEIGHBORING TOWNS.

THERE IS THUS LITTLE EVIDENCE FOR LARGE AMOUNTS OF CAPITAL ENVESTED IN FACTORIES FOR SLAVES AND MACHINERY, WHICH WOULD REQUIRE WIDESPREAD MARKETS FOR DISTRIBUTION. RATHER PRODUCTION SEEMS TO BE ALMOST ENTIRELY IN THE HANDS OF THE SMALL MXNUKXXXXNRER ARTISAN WHO EITHER SELLES TO OR FOR THE GOVERNMENT AT RATES FIXED BY IT, OR WHO DISPOSES OF HIS GOODS PERSONALLY BY THE WELL KNOWN METHOD OF THE BAZAAR WHICH IS XXSMBSXXXM NOT A PREDECESSOR OF, BUT A SUBSTITUTE FOR A PRICE MAKING MARKET. GENERAL CONSIDERATIONS:

NEED FOR ONE SPECIFIC QUESTION: WAS BUSINESS LIFE IN ROME QUALITATIVELY DIFFERENT THAN TODAY.

NOT NECESSARY TO TELL EXACTLY HOW IT FUNDTIONED.

DESIRE TO GIVE WHOLE PICTURE OF ECONOMIC LIFE, Avoid controversial details.

### OUTLINE

INTRODUCTION: WE HEAR MUCH ABOUT THE BUSINESS LIFE IN ANCIENT ROME IN CICERO'S LETTERS, ETC. WAS IT ONLY QUANTITATIVELY DIFFERENT AS ROSTOVTZEFF SAYS, OR WAS IT QUALITATIVELY DIFFERENT?

WHERE SHOULD WE LOOK: FOLLOWIN & THE ANALOGY OF MODERN BUSINESS:

#### A. COMMODITIES:

A. GRAIN SUPPLY - STATE CONTROLLS SUPPLY, PRICES(EXAMPLES OF AUG, TID) B. LITTLE INFORMATION ON OTHER COMMODITIES:

(WHATEVER EXISTS | WILL SUMMARIZE)

B. INDUSTRY:

- A. HANDICRAFT- NO FACTORIES LIMITED PRODUCTION
- B. BAZAAR, STORE FRONT SHOPS- NO MIDDLEMAN OR RESALE
- C. EXPENSIVE TRANSPORTATION.
- D. INDUSTRY LITTLE POLITICAL OR SOCIAL INFLUENCE
  - L.BRICKLAYING OF ANOTNINES ONLY WEALTH FROM INDUSTRY IN 1,000 YEARS THAT CONTRIBUTES TO POLITICAL POWER.
    - 2. NO PROTEST AGAINST VERY LOW TARRIFF.
    - 3. CORN DOLE: (CITIZENS NOT ESSENTIAL TO INDUSTRIAL

PRODUCTION)

Se . 3

14. Titll evidence I colonie read an emperite

. C. TRANSPORTATION: (MODERN RAILROADS SOURCE OF MANY FORTUNES)

- A. LEX CLAUDIA
- B. MOSTLY ALL SKIPPER MERCHANTS
- C CERLAUDIUS' APPEAL TO FREEDMEN.

D. BANKING:

A. ARGENTARIUS- PROFFESIONAL- SMALL SCALE - SHOP.

- L. EXCHANGES COINS; WITNESSES PAYMENT, SAFEGUARDS WEALTH, PAWNBROKING 2. SELDOM LENDS OTHER PEOPLE'S MONEY.
- BM MONEY LENDING OTHERWISE:
- B. L. USURY PROHIBITED SINCE L2 TABLES TO CAESAR & LAWE
  - 2. SOME RICH MEN DO IT (CATO)
    - A. NOT THROUGH INSTITUTION OF BANK
    - B NO BANK CREDIT BASED ON ECONOMIC RESOURCES.

E. SUMMARY PART 1

MOST PEOPLE ENGAGED IN WHAT WE CONSIDER FUNDAMENTAL BUSINESS ACTIVITIES FREEDMEN OR SLAVES OR FOREIGNERS. UNDERPRIVILEGED (ROMAN LAW) LITTLE TO SAY IN POLITICS OR CULTURE.

PART 11

WHAT BUSINESS WAS THERE?

A. PUBLICAN SHARES ON GOV TAX COLLECTION: ONLY INCORPORATED BODY BASED ON BOOTY B. AGRICULTURAL CAPITALISM: CATO: CREDIT PANIC.

C. MONEY LENDING BASED ON POLITICAL ADVANTAGE: BRUTUS, VERRES

D. SLAVE LABOR: ATTICUS GLADIATORS: CRASSUS. ( holing

ROMAN BUSINESS LIFE 200 B c. - 50 A.D.

INTRODUCTION: WAS THEN BUSINESS LIFE OF ANCIENT ROME DIFFERENT FROM THAT OF TODAY?

Francette

A QUANTITATIVELY: GENERALLY ADMITTED THAT IT WAS MUCH LESS. THEREFORE THIS WILL BE BRIEFLY DISCUSSED WITH SPECIAL REFERENCE TO QUANTITATIVE DIFFERENCES WHICH MIGHT INDICATE: IT WAS: QUALITATIVELY DIFFERENT

- A B. QUALITATIVE: MORE DETAILED AS IT CONTAINS THE ORIGINAL CONTRIBUTION OF THIS THESIS. CRITERIA & KORXEVALXXXXX TO BE DRAWN FROM THE MOST IMPORTANT INSTITUTION IN MODERN ECONOMIC LIFE: THE MARKET. WE SHALL ASK:
  - L. WERE THERE MARKETS? THE MODERN MARKET SYSTEM HAS MARKETS FOR ALL TYPES OF THINGS, ALL FACTORS OF PRODUCTION, LAND, LABOR, AND CAPITAL.
  - 2. WERE THESE INTERRELIED BY BR PRICE? MAD THE MODERN MARKET MAKES POSSIBLE THE TRANSLATION OF ONE PRODUCT FOR ANOTHER WITH A PROFIT ARISING FROM PRICE, THE TERMS OF EXCHANGE.
  - 3. WAS CAPITAL INVESTED IN BUSINESS? THE MODERN MARKET SYSTEM BASED ON ECONOMIC FACTORS, MAKES POSSIBLE RATIONAL PREDICTION AND THE INVESTMENT OF CAPITAL.

UNDERLYING ASSUMPTIONS: ROSTOVIZEFF DEFINED PRODUCTION & FOR UNKNOWN CONSUMER PRODUCTION FOR THE MARKET. MORE RECENTEN SECONOMISIS NAME ESEMAN REBEARCH IN ECONOMICS HAS SHOWN THAT THERE MAY BE BARRENEWERE PRODUCTION FOR DIFFERENT 

ORDER OF PRESENTATION: TO HIGHLIGHT THE ANTICIPATED DIFFERENCES SECTION I OF THIS PAPER WILL BE DEVOTED TO SPECIFICALLY ECONOMIC ACTIVITIES WHICH ARE MOST IMPORTANT IN MODERN BUSINESS LIFE.

SECTION II WILL BE DEVOTED TO PRIVATE, SEMI-PUBLIC AND 

# 11. POLITICAL BUSINESS

INTRODUCTION: IN THE PRECEDING CHAPTERS WE HAVE EMPHASIZED THE LIMITATION OF ROMAN BUSINESS ACTIVITY IN BANK& INDUSTRY, TRANSPORTATION, AND BANKING. YET CLEARLY THERE WAS MUCH BUSINESS ACTIVITY AS WE WEE SEE FROM CICERO'S LETTERS, ETC. THE PURPOSE OF THIS WORK IS TO SHOW THAT THIS ACTIVITY WAS MAINLY IN THE SPHERE OF FINANCE CONNECTED WITH THE GOVERNMENT WORK OF CONTRACTING AND TAX COLLECTION WHICH INCREASED ENORMOUSLY WITH THE GROWTH OF THE EMPIRE.

Mat that More were established to only the severely bondy to much the that in the me were where established to only them the severe start of the first of the the second of the second

# NOTES: (1)

TO PROFESSOR POLANYI: THESE NOTES ARE MUCH FULLER THAN NECESSARY, BUT I HOPE THAT THEY MAY SUPPLY YOU WITH MATERIAL THAT WILL BE USEFUL TO JUDGE MY TEST. I HAVE ALSO KEPT MOST OF MY PROBLEMS AND CONTROVERSIES OUT OF THE TEXT, BUT HAVE AIRED THEM QUITE FRANKLY IN THE NOTES.

REFERENCES ARE MADE BY CITING THE AUTHORS LAST NAME UNDER WHICH TITLE CAN BE FOUND IN BIBLIOGRAPHY AT END OF PAPER. IN CASE MORE THAN ONE WORK OF SAME AUTHOR IS USED, TITLE WILL BE ABBREVIATED.

#### PREFACE

#### ROSTOVTZEFF'S VIEW OF ANGIENT CAPITALISM:

"THEY (THE HELLENISTIC CITIES OF THE EAST) EMPLOYED BOTH IN AGRICULTURE (INCLUDING CATTLE-BREEDING) AND IN INDUSTRY THE METHODS OF PURE CAPITALISTIC ECONOMY BASED ON BLAVE-LABOUR. THEY INTRODUCED FOR THE FIRST TIME A MASS PRODUCTION OF GOODS FOR AN INDEFINITE MARKET." (ROME P.J. ITALICS AND FIRST PARENTHESIS MY OWN.)

BUT ROSTOVTZEFF SEEMS TO SEE THE NEED FORK ADMINISTRATIVE (I.E. GOVERNMENT) ACTION IN PROCURING FOOD, BUT INSISTS THIS MUST HAVE BEEN DONE THRU A MARKET:

"ONE OF THE MOST COMPLICATED TASKS OF THE CITIES AND THE CITY MAGISTRATES WAS TO SECURE 'ABUNDANCE' (ABUNDANTIA) OF FOODSTUFFS, ESPECIALLY OF CORN (ANNONA, EUTHENIA), FOR PUBLIC CONSUMPTION. IN ROME THE EMPEROR UNDERTOOK THIS TASK. IN OTHER CITIES IT WAS ONE OF THE MAIN DUTIES OF THE CITY COUNCIL AND THE CITY MAGISTRATES. THE CONDITIONS UNDER WHICH A PLENTIFUL SUPPLY OF FOOD HAD TO BE SECURED WERE NOT VERY FAVORABLE. IN MANY CASES THE CITY TERRI-TORIES WERE NOT LARGE ENOUGH TO PROVIDE A SUFFICIENT SUPPLY, MOREOVER, THE VARIABILITY OF CROPS WAS AN OUTSTANDING FEATURE OF ECONOMIC LIFE IN THE ANCIENT WORLD, EVEN IN SUCH LANDS A & EGYPT. THUS ALL THE CITIES DEPENDED MORE OF LESS ON A REGULAR OR EMERGENCY IMPORT OF FOODSTUFFS. NONE OF THEM WAS PER-MANENTLY SELF-SUFFICIENT. THE ORGANIZATION OF A MARKET AND ESPECIALLY OF THE TRANSPORTATION OF LARGE MASSES OF FOODSTUFFS WAS, THEREFORE, A QUESTION OF PRIME IMPORTANCE FOR THE CITIES OF THE EMPIRE THE PROBLEM OF REGULATING THE MARKET WAS NOT TACKLED BY THE CENTRAL GOVERNEMENT. ON THE CONTRARY, MANY SERIOUS OBSTACLES WERE PLACED IN THE WAY OF THE FREE DEVELOPMENT OF TRADE CONCERNED WITH THE NECESSITIES OF LIFE," (ROME P. 137).

A SOMEWHAT GREATER APPRECIATION AND MORE CONSISTENT VIEW OF THE ROLE OF

ADMINISTRATIVE TRADE IS FOUND IN LOUIS

"THE THEORY OF FULL ECONOMIC FREEDOM WHICH FOUND SUCH FAVOUR IN FRANCE AT THE BIDDE TIME OF THE REVOLUTION AND IN ENGLAND IN THE MIDDLE OF THE NINE-TEENTH CENTURY TOOK NO ROOT IN ROME. THE INTERVENTION OF THE MAGISTRATES CONTINUED UNDER A THOUGAND ASPECTS AND IN THE MOST VARIED SPHERES OF ACTIVIEY

"THE UNDERTAKINGS ASSUMED BY THE PUBLIC POWERE ARE INNUMERABLE AND ASTON-ISH US BY THE COMPLEXITY WHICH THEY SOMETIMES REVEAL. BY MEANS OF AGRARIAN LAWS THEY CHANGED THE DISTRIBUTION OF PROPERTY; BY THE INTRODUCTION OF THE ANNONA AND THE OFFICIAL IMPORT OF CORN THEY ASSURED A SUBSISTENCE FOR THE CITIZENS OF ROME AND PROCURED WHEAT FOR THEM AS T LOW PRICE OR EVEN FREE OF CHARGE, ABOLISHING THUS A WHOLE BRANCH OF TRADE--AND THAT ONE OF THE MOST NOTES (2)

PREFACE (CONTINUED)

ESSENTIAL. WE FIND WHEAT DISTRIBUTED BY THE OFFICIALSO OF THE REPUBLIC; THOSE OF THE EMPIRE DISTRIBUTED FLOUR, BREAD, WINE, OIL AND EVEN MEAT." P.20

# NOTES (3)

ORIGINS: MANY AUTHORITIES SEEM TO BELIEVE THE BUTCHERSHOPS WERE COMPLETELY

REMOVED FROM THE FORUM BY THE END OF THE THIRD CENTURYS

460 PLATNER P. 369 "THE ROMAN MARKETS WHICH HAD ORIGINALLY BEEN HELD IN THE FORUM ITWELF WERE GRADUALLY REMOVED TO MAKE ROOM FOR MORE IMPORTANT INTERESTS."

- P. 169 "WE ARE TOLD THAT AT SOME TIME BEFORE 310 B.C. THE BUTCHERS WERE BANISHED FROM THESE SHOPS AND THAT THEY WERE OCCUPIED BY MONEY-CHANGERS AND BANKERS, BEING THENCEFORTH KNOWN AS TABERNAE ARGENTARIAE."
- JONES P. 96 "AND MEAT WAS BOLD IN THE MAGELLUM WHICH (TOGETHER WITH THE FORUM PISCARIUM WAS ESTABLISHED IN THE NORTH OF THE FORUM PROPER, PERMAPS TOWARDS THE GLOSE OF THE FOURTH CENTURY B.C. AFTER THIS DATE THE ONLY TRADE CARRIED ON IN THE FORUM PROPER WAS THAT OF THE BANKERS AND NONEY-CHANGERS (ARGENEARII), WHOSE OFFICES (TABERNAE) GORDERED ITS NORTHERN AND SOUTHERN SIDES; THE SAME PROCESS TOOK PLACE IN OTHER CITIES."
- HUELSENT P. 10 "AS CONSUL (C. MAENIUS) HE CONQUERED THE PEOPLE OF ANTIUM IN 338 B.C. AND HE DEGORATED THE SPEAKERS' PLATFORM WITH THE BEAKS OF THE WARSHIPS HE CAPTURED, WHEREUPON IT RECEIVED THE NAME OF ROSTRA; TWENTY YEARS LATER, AS CENSOR, HE REMOVED THE STALLS OF THE BUTCHERS AND THE GREEN GROCERS FROM THE FORUM-A FOOD MARKET, MAGELLUM WAS BUILT ESPECIALLY FOR THEM NORTH OF THE FORUM-AND RESTORED THE BOOTHS IN WHICH THEREAFTER MONEY CHANGERS AND BANKERS WERE ACCOMODATED (TABERNAE ARGENTARIAE). THE TWO ROWS OF SHOPS, CALLED VETERES ON THE NORTH SIDE AND NOVAE ON THE SOUT, WERE PROBABLY IDENTICAL IN APPEARANCE;..."

I AM, HOWEVER, MORE SYMPATHETIC WITH THE VIEW OF THE THAT THE BOOTHS REMAINED

TILL 171 B.C. AS IS STATED BY THEDNATE

D.S. P. 1457 "C'EST AINSI QU'A ROME, LES BOUCHERS D'ABORD, CONT LA BASILIQUE SEMPRONIA FIT DISPARAITRE, EN L'AN ROME 583 (171 B.C.) LES DERNIERES BOUTIQUES...."

THIS I THINK, IS CONFIRMED BY LIVY:

LIVY XLIV 16110,111 "TI. SEMPRONIUS EX EA PEGUNIA QUAE IPSI ATTRIBUTA ERAT, AEDES P. AFRICANI PONE VETERES AD VORTUMNI SIGNUM LANIENASQUE ET TABERNAS CONJUNCTAS IN PUBLICUM EMIT, BASILICAMQUE FACIENDAM CURAVIT, QUAE POSTEA SEMPRONIA APELLATA EST."

## NOTES (4)

### 11. SEPARATE MARKETS:

HARPER'S LATIN DICTIONARY UNDER "FORUM" GIVES REFERENCES TO THE VARIOUS EARLY MARKETS! THE MOST INTERESTING OF THESE IS: (ABOUT 250 8.C.)

TAC. ANNALS 11 49 " ... TANO TEMPLUM QUOD APUD FORUM HOLITORIUM C. DIVILIUS STRUXERAT QUI PRIMUS REM ROMANAM PROSPERE MARI GESSIT TRIUMPHUNQUE NAVALEM DE POENIS MERUIT."

SEE ALSO JONES P. 95 "IN ROME INDEED THE FORUM BOARIUM OR CATTLE MARKET PROBABLY GOOUPIED THE SITE BY THE RIVER FROM THE EARLIEST TIMES AND WAS IN FACT OUTSIDE THE GATES OF THE EARLIEST SETTLEMENT, JUST AS THE FORUM HOLITORIUM (VEGETABLE MARKET) WAS OUTSIDE THE SERVIAN WALL. BESIDES THESE WE HEAR OF THE FORUM SUARIUM, F. PISCARIUM (OR PISCATORIUM) F. VINARIUM AND F. CUPPEDINIS, THE LAST NAMED THE PROVISI-ION MARKET

### \*

THOSE OF THE EMPIRE DISTRIBUTED FLOUR, SAEAD, WINE, OIL AND EVEN MEAT. SUBH WAS THE MARKET AT ROME. FROM ITS SIZE AND BASIC PRODUCTS, MEAT AND

VEGETABLES, I GET THE IMPRESSION IT WAS MORE OR LESS OF A LUXURY MARKET WHERE WELL TO DO MIGHT PICK UP FOOD OR A POORER PERSON MIGHT PICK UP MEAT FOR SOME ALTHOUGH MAU FOUND WHEAT IN THE MARKET AT POMPELL, SPECIAL OCCASION

# Notes (5)

### 111. THE MACELLUM (CONTINUED)

I FIND IT DIFFICULT THAT TO BELIEVE THAT MOST OF THE GRAIN WAS SOLD THERE. IT SEEMS MORE LIKELY THAT ONLY SMALL QUANTITIES OF SURPLUS GRAIN WAS SOLD HERE, WHILE MOST OF IT WAS DISTRIBUTED FROM THE TEMPLE OF DEMETER, OR SOME OTHER PLACE. IN THE TIME OF CLAUDIUS IT WAS DISTRIBUTED FROM THE PORTICUS MINUGIUS. HOWEVER, IF THERE WAS A MARKET FOR GRAIN, THE MACELLUM WOULD HAVE TO BER IT.

(ANNONA DARDANARIATUS)

THE ABOVE IS VERY IMPORTANT, BECAUSE IT MAY INDICATE ANY TEN-

DENCY TOWARD THE MARKEY PRICE MAKING MARKET WAS OPPOSED.

NOTES (10)

VII PRICE (CONTINUED )

THOSE WHO TRIED TO PROFIT BY A SHORTAGE OF WHEAT WERE CALLED "DARDANARII"

IT THIS WORD SEEMS TO HAVE AN INTERESTING ETYMOLOGY:

HUMBERT 26: "TURNEBE (ADV IC 17) CROIT QU'ON A TIRE CE NOM DE DARDANUS CELEBRE MAGICIEN, PARCE QUE LE PEOPLE CROVAIT A LA POSSIBILITE D'ANEANTIR LES RECOLTES DANS LES GRENIERS, AU MOYEN DE MANDEUVRES MAGIQUES OU DE SORTILEGES OU DE TROMPER L'ACHETEUR DANS LE MESURAGE ...

T IS MORE PRECIBELY DEFINED:

IBID: "ON APPELAIT AINSI EN DROIT ROMAINJ TOUS CEUX QUI, PAR LEURS ACTES OPERAIENT UNE RARETE ARTIFICIELLE, ET, PAR CONSEVENT, UNE HAUSSE FACTICE DANS LE PRIX DENREES." ... PUNIES D'UNE AMEND PAR LES EDILESOU PAR LE PEUPLE SANS DOUTE EN VERTU D'UN LOI SPECIALLE ....

THE AEDILE FUNCTIONED AS THE ARCH ENEMY OF THE DARDANARII

Whiteday 462 "GEGEN PREISVERTEURER GENT DER A. STRAFEND VOR, INDEM ER THRE WARE VERNICHTET ODER THNEN KORPERLICHE ZUCHTIGUNG ZUERKENNT. " (I CANNOT FIND THE REFERENCE GIVEN TO SUPPORT THIS: CALLISTR, DIG. L 2, 12)

Ochler 2317 "DIE ERHALTUNG INER EINES MASSIGEN MARKT PREISES WIRD AUCH BEZWECHT DURCH DAS VERBOT DES GETREIDEWUCHERS, GEGEN DEN DIE AEDILEN EINAUSCHREITEN HATTEN."

FOR THE OTHER BOURCES: I CANNOT ATTACH INE MUCH IMPORTANCE TO PLAUTUS CAPT. 111 1, 32 FOR REASONS GIVEN AGAINST USE OF THE REMAN EARLY ROMAN PLAYS GIVEN ELSEWHERE, THERE IS, HOWEVER, ANOTHER MORE IMPORTANT PASSAGE ABOUT THE AEDILES ACTION IN PUNISHING PROFITEERS:

LIVY: XXXVIII 35:5 "ET DUODECIM CLIPEA AURATA AB AEDILIBUS EN CURULISUS P. CLAUDIO PULCHRO ET SER, BULPICIO GALBA SUNT POSITA EX PECUNIA QUA FRUMENTARIOS DE ANNONAN COMPRESSAM DAMNARUNT.

# NOTES (11)

### VIII. GRAIN SUPPLY:

1. THE GREEK WORLD:

EVERY GREEK CITY HAD A STRUGGLE TO MAINTAIN ITS GRAIN SUPPLY:

ROSTOVTZEFF "FRUM" 182-3 "UND WIR TREFFEN, HAUPTBACHLICH IN DEM BEREICH DER FRUM UND SPATHELLENISTISCH ZEIT, DER ZEIT DER HOCHSTEN W WIRTSCHAFT-LICHEN BEUTE DES HELLENENTUMS UND ZUGLEICH DER AUSBERSTEN STEIGERUNG DER POLITISCHEN UND WIRTSCHAFTLICHEN GEGENSATZE EINE GROßbe Reihe von Massregeln, welche <u>Die Stete Gefahr eines Hungernot</u> oder Steigerung DER Kornpreise Fernhalten Bollten, Die getroffenen Massregeln sind Auch fur die Romische Zeit Charakteristisch." (cf. Francotte <sup>M</sup>el. Nicole

135FF)

## XBXXXXAQX

EVERY POLITICAL OR ADMINISTRATIVE MEANS WAS USED:

IBID 140 "DIE GESCHILDERTE UNSICHERHEIT DES HANDELS ZWANG DIE STADTE IM MITTELMEERGEBIET, SO BALD DIE MITTEL DES STADTTERRITORIUMS MIT DEM Wachstum der Stadt nicht mehr ausreichten <u>zu Allerlei Hillfsmitteln</u> zu greifen, um ihre Burger nicht verhungern zu Lassen." CF. Privlle Ditt. Syll 2 547, 5)

OF COURSE BUCH & COMPLICATED MEASURES WOULD NOT HAVE BEEN TAKEN IF ANY

MORE CONVENIENT AND DEPENDABLE MEANS (I.E. A MARKET) WERE AVAILABLE;

ROME TAKES OVER EGYPTIAN AND AFRICAN SUPPLY OF CORNI

JOSEPH. BELL. JUD 11 383, & AFRICA FEEDS PEOPLE OF ROME & MOS A YEAR

386 EGYPT FEEDS THEM 4 MOS.

2. ADMINISTRATION: A GOOD PICTURE OF HOW THE SUPPLY WAS ORGANIZED BY ADMINISTRATIVE AND POLITICAL MEANS, (NON-MARKET) IS SEEN BELOWI ROSTOY: ROME 241- 22MEXEERN SPEAKING OF SOUTH RUSSIA

THE CORN COLLECTED BY THE LANDOWNERS WAS SOLD TO MERCHANTS FROM GREECE AND FROM ASIA MINOR. A LARGE PROPORTION OF IT, PARTLY PAID AS A TAX BY THE LANDOWNERS AND PARTLY GARNERED FROM THE ROYAL DOMAINS, BELONGED TO THE KING WHO, INDEED WAS THE LARGEST LANDOWNER AND CORN-MERCHANT IN THE KINGDOM. SOME OF HIS CORN WAS BHIPPED TO THE ROMAN ARMIES, ESPECIALLY THOSE OF PONTUS, CAPPADOGIA, AND ARMENIA, AND IN PAYMENT HE REGIEVED AN ANNUAL SUBSIDY FROM THE GOVERNOR OF BITHYNIA. "ON THE STEEPES OF THE CRIMEA THE SCYTHIAN KING WHO HAD HIS

REBIDENCE IN THE HALF-GREEK TOWN OF NEAPOLIS, NEAR THE MODERN SIMPEROPOL

### CAPITAL INVESTMENTS

#### I. IN AGRICULTURE:

- A. NOT ONLY RICHEST, BUT MIDDLE CLASSES (I.E. BULLA' VERERANS) INVEST IN LAND. B. THESE LIVE IN CITIES ON THEIR INCOME FROM LANDS.
- C. SLAVES EXTENSIVELY USED TO WORK FARMS.
- D. RATIONAL EXPLOITATION OF FARME: HELLENISTIC SCIENCE : HANDBOOKS.

# IL. IN INDUSTRY

- A. LARGE SCALE PRODUCTION FOR MARKETS.
- B. RICH INVEST IN BLAVES AND PUT THEM IN BUSINESS.
- C. THESE DRIVE OUT SMALL INDEPENDENT BUSINESS
- D. RATIONAL EXPLAITATION OF BLAVES ("MUST HAVE BEEN HANDSOCKS")
- E FAILURE OF PURCHASING POWER OF BOURGEOISIE IS CAUSE OF END OF INBUSTRIALSIN.

#### QUESTIONS:

#### IL. ON AGRICULTURE

- A. DOMINANCE OF POLITICAL PRESTIGE IN ACQUIRING LANDS.
- B. ONLY K IN GREEK WARE DO WE HEAR OF MASSES OF SLAVES.
- C. PEASANTS STILL PRODOMINATE (Ros.)
- D. EVEN C TO'S FARM PROBABLY MORE PEASANTS USED. E. CATO'S SLAVES NOT LIKELY TO REPRODUCE CHILDREN.

# INI ON INDUSTRY

- A. FACT: LITTLE PRODUCED IN REPUBLICAN ROME
- B. ALL (?) REMAINS OF SHOPS SMALL SHOPS OR BAZAARS.
- C. IF SLAVES USED, COULD SOON BUY FREEDOM IF SUCCESSFUL.
- D. FACT NO HANDBOOKS ON INDUSTRY HEARD OF. BETTER CLASSES NOT INTERESTED IN,
- NO TRADITION OF INTEREST IN, AS THERE WAS FOR AGRICULTURE.
- E. "PURCHASING POWER" MAINLY DEPENDS ON BOOTY FROM ASIA.
- D. KNOWN NO MEN RICH FROM INDUSTRY.

\*\*\*\*\*\* HOW COULD "MIDDLE CLASS" INVESTMENT BE POSSIBLE WITHOUT BANK OR STOCK FIRMS?

#### VIII. GRAIN SUPPLY (CONTINUED 2)

#### 2. ADMINSTRATIVE TRADE

SEMPEROPOL, LIVED MORE OR LESS THE BAME LIFE AS THE KING OF THE BOSPORUS. HERE THE LANDOWNERS WERE THE MEMBERS OF THE DOMINANT TRIBE, THE GORN WAS SHIPPED FROM THE HARBOUR OF EUPATORIA TO OLSIA AND THENSE TO GREEGE AND TO THE ARMIES OF THE DANUBE; SOME OF IT WAS BOUGHT UP BY THE MERCHANTS OF CHERSONESUS, NOT VERY DIFFERENT, IN ALL PROBABILITY, WAS THE LIFE OF THE MAESTIAN AND SARMATIAN TRIBES IN THE PENINGULA OF TAMAN, ON THE RIVER KUBAN ON THE SHORES OF THE SEA OF AZOV, AND THE RIVER DON. THE SARMATIANS, FOR EXAMPLE GERTAINLY ENGLAVED THE POPULATION OF THE VALLES OF THE KUBAN AND FORCED IT TO WORK FOR THEM. THE PRODUCE WAS SHIPPED DOWN THE KUBAN TO THE GREEK CITIES OF THE TAMAN PENINSULA AND DOWN THE DON TO TANAIS AND RE FROM THERE TO PANTICAPACUM. THE SAME ORGANIZATION PROBABLY APPLIED MUTATIS MUTANDIS TO THE FISHERIES AT THE MOUTHS OF THE GREAT RUSSIAN RIVERS, IN THE SEA OF AZON, AND IN THE STRAIDS OF KERCH. MERCHANTS FROM THE GREEK CITIES ULTIMATELY SECURED THE PRODUCE AND EXPORTED GREAT QUANTITIES OF SALTED AND DRIED FISH TO THE GREEK AND ROMAN MARKETS, INCLUDING THOSE OF THE WESTERN PROVEINCES.

OTHER EXAMPLES OF ADMINISTRATIVE TRADE!

#### 3. EARLY ROMES

LIVY: HIS IMPORTANCE AS A SOURCE:

I. EITHER A MALID REFLECTION OF THE EARLY REBUBLIC

2. OR A PROJECTION OF LATER REPUBLIC WHICH HE KNEW

IN EITHER CASE IT PORTRAYS AN IMPORTANT GASE OF ADMINISTRATIVE RRADE.

WHAT DO PROPLE DO WHEN THEY NEED GRAIN AND HAVE NO MARKET TO BUY IT ONT

LIVY 11 9 "ANNONAE IN PRIMIS HABITA GURA ET AD FRUMENTUM COMPARANDUM MISSI AKER ALII IN VOLGCOS, ALLI CUMAS" a single to be a

### 3. EARLY ROME (CONTINUED)

A GOOD EXAMPLE OF THE EARLY STAGES OF ADMINISTRATIVE TRADE IS SEEN INT

LIVY 11 34: "EC ANNO; CUM ET FORIS QUIETA OMNIA A BELLO ESSENT ET DOMI SANATA DISCORDIA; ALIUD MULTO GRAVIUS MALUM CIVITATEM INVASIT, CARITAS PRIMUM ANNONAE EX E INCULTIS PER SECESSIONEM PLEBIS AGRIS, FAMES DEINDE, QUALIS CLAUSIS SOLET. VENTUMQUE AD INTERITUM SERVITIORUM UTIQUE ET PLEBIS ESSET, NI COMBULES PROVIDISEENT DIMISELS PASSIM AD. ERUMENTUM COEMENDUM NON IN ETRURIAM MOOD DEXTRIS ABOSTIA LITORISUS LAEVOQUE PER VOLSCOS MARI USQUE AD CUMAS, SED QUAESITUM IN SICILIA QUOQUE; ADEO FINITIMORUM ODIA LONGINQUIS COEGERANT INDIGERE AUXILIIS. FRUMENTUM CUMIS CUM COEMPTUM ESSET, NAVES PRO SONIS TARQUINIORUM AB ARISTODEMO TYRANNO, QUI HERES ERAT RETENTAE SUNT; IN VOLSCIS POMPTINOQUE NE EMI QUIDEM POTUIT; PERICULUM QUOQUE AS IMPETU HOMINUM IPSIS FRUMEN-TATOTORIBUS FUIT; EX TUSCIS FRUMENTUM TIBERI VENIT; MEO SUBTENTATA EST PLEBS."

WE ALSO FIND EXPLICIT PROOF, OF WHAT WE WOULD NORMALLY EXPECT: I.E. THAT THESE EMBASIES SENT TO BUY GRAIN WERE LED BY SENATORS AND KNIGHTS:

LIVY IN 52 "SOLITUDINEN IN CIVATATE AEGRA EXPERTI CONSULES BUNT, CUM IN LEGATIONES NON PLUS SINGULIS SENATORIBUS INVENIENTES COACTI BUNT, BINOS EQUITES ADICERE."

OFTEN THE JEALOUSY OF NEIGHBORS WOULD DENY THEM THE NEEDED CORN.

THUS ROME OFTEN FOUND IT NECESSARY TO GO EVEN AS FAR AS SIGILLY FOR CORN. LIVY 11 34, 1810 , IV 25 AND IV 52. (BUT NOT THE EARLIEST 11 9)

A CASE WHERE A PRIVATE INDIVIDUAL BUYS GRAIN IS GIVEN IN

LIVY 41-54 WHERE SP. MEELIUS SUVE CORN AND TRYS TO SECOME DIGTATOR BY

HE DOES NOT BUY IT ON A MARKET (THERE RREABEN IS NONE) BUT BUYS IT

THE PRINCIPLE THAT THE STATE HAD TO BUY GRAIN IS WELL STATED BY

Ostos 2317 "DAHER WIRD IN DER ZEIT EINES HUNGERSNOT IM AUFTRAGE DESS STAATES GETREIDE IN DER UMBUNG ROMS, DANN AUCH IN ENTFERNTERED LANDSCHAFTEN EINGEKAUFT UND AN DIE BURGER ZU MASSIGEN PREISEN VERKAUFT."

"mgesung

THE PRICE WAS OF COURSE PARTICULARLY IMPORTANT .

WE HAVE A RECORD OF AN EARLY DEBATE OF IT GIVEN BY LIVY, WHO SEEMED TO REALIZE THAT HERE WAS AN IMPORTANT WEAPON OF THE RULING CLASS IF THEY HAD CARED TO USE IT: FOR NOW THE PRICE WAS SET IN ADMINISTRATIVE TRADE :

LIVY 11 34 "M. MINUCIO DEINDE ET A. SEMPRONIO CONSULIBUS MAGNA XX VIS FRUMENTI EX SIGILIA ADVECTA, ADITATUMQUE IN SENATU QUANTI PLEBI PLEBI DARETUR, MULTI VENISSE TEMPUS PREMENDAE PLEBIS PUTABANT RECUPER -ANDIQUE IURA QUAE EXTORTA SECESSIONE AC VI PATRIBUS ESSENT, IN PRIMIS MARGIUS CORIOLANUS, MOSTIS TRIBUNICIAE POTESTATIS, "SI ANNONAM, INQUIT, "VETEREN VOLUNT, IUS PRISTINUM REDDANT PATRIBUS, CUR EGO PLEBEIOS MAGISTATUS, CUR SICCNIUM POTENTEM VIDEO SUS LUGUM MISSUS, ET TANQUAN AB LATRONIBUS REDEMPTUS? EGONE HAS INDIGNITATED DIUTIUS PATIAR QUAM NECESSE EST? TARQUINIUM RECEN QUI NON TULERIM SIGINIUM FERAM? SEGEDAT NUNC, AVOCKE PLEBENS PATEY VIA IN SACRUM MONTEM ALIOSQUE COLLES. RAPIANT FRUMENTA EX AGRIS NOSTRIS, QUEM AD MODUM TERTION ANNO RAPUERE; FRUANTUR ANNONA QUAM FURORE SUO FECERE, AUDEO DICERE HOC MALO DOMITOS IPSOS POTIUS CULTORES AGRORUM FORE QUAM UT ARMATI PER SECESSIONEM COLI PROHIBEANT.

AFTER THIS, HOWEVER, IT SEEMS A SETTLED PRINCIPLE THAT THE GRAIN SHOULD SE DISTRIBUTED AT A LOW PRICE, ALTHOUGH LIVY MENTIONS THAT THE BENATORS MIGHT HAVE UBED THIS TO GET BACK THEIR LOST PRIVILEGES, HE ALSO STATES THAT THE PEOPLE THREATENED ARMED REBELLION IF THIS WAS TRIED. THE SENATORS PROBABLY KNEW THAT TO MONOPOLIZE SO ESSENTIAL A PRODUCT AS FOOD WOULD COMPLETELY DISRUPT THE STATE.

THERE ARE MANY LATER REFERENCES TO THE AEDILES SELLING GRAIN AT LOW PRICES; LIV. XXX 26,6; XXXI 4,6; XXXI 38; XXXI 50:1

EVEN CIGERO MENTIONS & DISTRIBUTION BY AN AEDILE:

CIC. DE OFF 11 58 "NE QUIDEM SETO VITIO DATUM EST, QUOD IN CARITATE ASSE MODIUM POPULO DEDIT, MAGNA ENIM SE ET INVETERATA INVIDIA NEC TURFI IACTURA, QUANDO ERAT AEDILIS NEC MAXIMA LIBERAVIT.

THE LAST THREE WORDS WOULD IMPLY HE CERTAINLY DID NOT BUY THE GRAIN ON AN OPEN MARKET (WHICH WOULD INDEED HAVE BEEN VERY COSTLY) BUT USED ADMINISTRATIVE RESOUCES. SEE ALSO!

CIC. AD FAM VIII 6 (BURIC) TRANSFUGIT AD POPULUM ET PRO CAESARE LOQUI COEPIT. LEGENQUE VIARIAM NON DISSIMILEM AGRARIAE RUTILI ET & ALIMENTARIAM, QUAE IUBET AEDILES METIRI IACTAVIT."

> ("AEDILES METIRI" MEANS DISTRIBUTE CORN. CF. CAES B.G. + 16 T 23

and the state of the

# EARLY ROME (CONCLUDED)

1993

FOR THE INFLUENCE OF THE DESIRE FOR CAMPANIAN WHEAT WHICH LED TO THE BREAKING OF THEIR TREATY WITH THE SAMNITES DEE LIVY VII JII I AND S.

HONO SUMMARIZES IT: "STRIPPED OF PIOUS WORDS AND PHRASES, INTERVENTION IN CAMPANIA MEANT TO ROME POLITICALLY THE ENGIRCLEMENT OF THE LATING, MILITARILY CAVALRY, AND ECONOMICALLY WHEAT." P. 182

## NOTES (16)

### OUTLINE OF THE ROMAN CORN SUPPLY

I. THE BOURCES OF SUPPLY WERE CONTROLLED BY THE GOVERNMENTS

2317 "ES WURDEN DIE BIGILISCHEN ZEHNTEN NACH ROM GEBRACHT UND ZU EINEM MASBIGEN PREISE FUR REGINUNG DES STAATES VERKAUFT, DEN SIGULERN JEDE AUSFURR VON GETREIDE NACH ANDERN LANDEN VERBOTEN (POLYB XXVIII 2) AUF DIESE WEISE DAS GIGILISCHE GETREIDE FUR ROM MONOPOLISIERT."

FRANK (SURVEY ) CHALLENGES THIS, AND CLAIMS THE PROMIBITIONS MENTIONED BY POLYBIOS ARE NECESSARY ONLY BEGAUGE ROME WAS AT WAR. A GREAT, INDEED ALMOST ALL OF THIS PERIOD, MOWEVER, WHE WAS FIGHTING. IN ANY CASE WE HAVE NO RECORD OF OTHERS FREELY BUTING THE CORN OF SIGILLY, AND INDEED, AFTER THE SECOND TITHE WAS LEVIED THERE WAS PROBABLY LITTLE TO BE EXPORTED. CIC VERRES 11 3, 163: ROSTOV. "FRUM" 130 "DA DER PREIS DES MODIUS DIESES KORNES AUF 3 SESTERCES VOM STAATE

FIXIERT WAR."

2. THE BABIC SUPPLY CAME TO THE ROMAN ODVERNMENT AS THE TRADITIONAL TITHE. THIS MIGHT BE INCREASED BY THE FORCED PURCHASE OF A SECOND TITHE AT A PRICE FIXED BY THE ROMAN GOVERNMENT.

LIVY XXXVI 2 (BEGINNING OF WAR WITH ANTIOCHUS 191 B.C.) "EIDEN PRAETORI MANDATUM UT DUAS DECUMAS FRUMENTI EXIGERET; ID AD MARE COMPORTANDUM DEVEHENDUMQUE IN GRAECIAM CURARET (FOR ARMY). IDEM L. OPPIO <u>DE ALTERIS DECUMIS</u> EXIGENDIS IN SARDINIA IMPERATUM; CETERUM NON IN GRAECIAM SED IN FRUMENTUM PORTARI PLACERET." (1.E. FOR ROMAN CITY CONSUMPTION).

- LIVY XXXVI12 "SIGILIAE SARDINIAEQUE BINAE AEQUE AG PROXIMO ANNO DECUMAE FRUMENTI IMPERATAE; SICULUM OMNE FRUMENTUM IN AETOLIAM AD EXERCITUM PORTARI IUSSUM, EX SARDINIA PARS ROMAM PARS IN AETOLIAM, ECDEM QUO SICULUM."
- LIVY XLII 31 "ALTERAS DECUMAS SIGULIIS SARDISQUE IMPERARET QUOD FRUMENTUM AD

FOR THE IMPORTANCE OF SIGILLY ASE THE SOURCE OF ROMAN GRAIN SEE:

LIVY XXVII (REPORTED VICTORY OF MARCUS VALERIUS IN SICILY 210 B.C.) \*DESERT IN RECOLI TERRAM, TANDEM FRUGIFERAM IPSIS CULTORIBUS, POPULOQUE ROMANO PACE AS BELLO FIDISSIMUM ANNONAE SUBSIDIUM."

ROSTOVTZEFF "FRUM" 128 BELIEVES THIS WAS SO DVEN UNTIL THE END OF THE REPUBLIC.

LUCAN 111 52KK 65-8 "UTRAQUE FRUGIFERIS EST INSULA NOBILIS ARVIS; NEC PRIUS HESPERIAM LONGINQUIS MESSIBUS ULLAS NEC ROMANA MAGIS CONPLETINT HORREA TERRAE."

THE GOVERNMENT WOULD ALSO OCCASIONALLY BUY CORN:

LIVY XXXVI 3 "LEGATI TERNI IN AFRICAM AD GARTHAGENIENSES ET IN NUMIDIAM AD FRUMENTUM ROGANDUM QUOD IN GRAECIAM PORTARETUR MISSI, PRO PRETIUM SOLVERET POPULUS ROMANUS

MORE OFTEN ALLIES WOULD GIVE THE CORNE (& GOOD ILLUSTRATIONS OF ADMINSTRATIVE TRADE)

NOTES (17)

OUTLINE OF THE ROMAN CORN SUPPLY: SOURCES (CONTINUED)

GIFTS OF ALLIES: 3.

DIONYSIUS VII I ROMANS SEND AMBASSADORS TO BUY CORN IN SICILLY (5TH CENTURY). TYRANT THERE MAKES THEM A PRESENT OF IT.

LIVY XXII 37 (216 B.C.) GIFT OF HIERO OF SYRACUSE TO ROMANS: 300,000 MODIL OF WHEAT 200,000 BARLEY TURNED OVER TO CONSULS "FRUMENTUM TRADITUM CONSULIBUS"

LIVY XXVIII 45 (205 B.C.) ETRUSCANS PROMISE SCIPIO GRAIN AND MATERIAL FOR FLEET.

LIVY XXXVI 4 PTOLEMY, PHILIP, CARTHAGE, MASSISINISSA OFFER SEVERAL MILLION MODII OF WHEAY AND BARLEY, ALTHOUGH HERE ROME INSISTED ON PAYING (PRICE SET BY SELF) "DE FRUMENTO UTRIS RESPONSUM, ITA USURUM EO POPULUM ROMANUM, <u>81 PRETIUM</u> ACCIPERENT."

LIVY XLITI 6 EVEN THE ACHEXNEXERM ATHENTANS CONTRIBUTE."

11. TRANSPORTATION OF CORN: THE GOAN WAS TRANSPORTED SOMETIMES BY THE NATION GIVING IT (LIVY ) SOMETIMES SENT BY GENERAL WITH THE FLEET, PERHAPS SENT BY SHIPS CONTRACTED FOR THE PURPOSE:

HUMBERT: 99: "LES EDILE CURULES SURTOUT PARAISSENT S'ETRE OCCUPES DU TRANSPORT DES BLES DES PROVINCES & ROME." REFERENCES BELOW.

SENT BY GENERALI

LIVY XXXI: 4 (204 B.C.) "AEDILIBUS CURULIBUS L. VALERIO FLACCO ET L. QUINCTIO FLAMININO .....FRUMENTI VIM INGENTEM, QUOD EX AFRICA P. SCIPIO MISERAT, QUATERNIS AERIS POPULO CUM SUMMA FIDE GRATIA DIVISERUNT."

SOLDIERS TRANSPORT IT BY LAND!

LIVY XXVII 3 "M. OQULINGUE ET P. AQUILIUIS IN ETRURIAM LEGATI AD FRUMENTUM OCEMENDUM QUOD TARENTUM PORTARETUR PROFECTI; ET MILLE MILITES DE EXERCITU URBAND, PAR NUMERUS ROMANDRUM SUCIORUMQUE, EDDEM IN PRAESIDIUM CUM FRUMENTO MISSI."

CONSULS SUPERVISE IT AT TIMES!

LIVY XXXVI 2 (191 B.C.) EIDEM PRAETORI MANDATUM UT DUAS DECUMAS FRUMENTI EXIGERET; ED AD MARE COMPORTANDUM DEVEHENDUNQUE IN GRAEGIAM GURARED (I.E. FOR ARMY). IDEM L. OPPID DE ALTERIS DEGUMIS EXIGENDIS IN SARDINIA IMPERATUM; GETERUM NON IN GRAEGIAM SED ROMAM IN FRUMENTUM FORTARI PLACERET (I.E. FOR GITY CONSUMPTION).

THE AEDILES SUPERVISE TRANSPORTATION:

LIVY XXVI 10: (211 B.C.) "FULVIUS FLACCUS... INTER ESQUILINAM COLLINAMQUE PORTAM POSUIT CASTRA. AEDILES PLEBIS COMMEATUM ED COMPORTARUNT."

LIVY XXXIII 42 (196 B.C.) "EO ANNO <u>AEDILES CURULES</u> M. FULVIUS NOBILIOR ET C. FLAMINIUS TRITICI DECIENS CENTENA MILIA BINIS AERIS POPULO DISCRIPSERUNT. ... 1D C. FLAMINI HONORIS CAUGA IPSIUS PATRIBQUE ADVEXERANT SICULI ROMAM." OUTLINE OF THE ROMAN CORN SUPPLY: SAUREER (CONTINUED)

11. TRANSPORTATION: (CONTINUED)

INDIVIDUAL MERCHANTS ALSO DELIVERED IT, BUT THEY RECEIVED LITTLE CONSIDERATION:

LIVY XXX 38 "PER EOS DIES COMMEATUS EX SICILLIA SARDINIAQUE TANTAM VILITATEM ANNONAE EFFEGERUNT UT PRO VECTURA FRUMENTUM NAUTIS MERCATI RELINQUERET."

SEE ALSO BELOW: LIVY X 11 , XXXI 50, FOR EXAMPLES ARRANGED FOR TRANSPORT OF GRAIN,

111, STORAGE: VERY PROBABLY STATE CONTROLLED.

HUMBERT 275 "IL DUT AVOIR DE TRES BONNE HEURE DES GRENIERS PUBLICS (HORREA PUBLICA) ETABLIS A ROME ET A ÚSTIE POUR Y EMMAGASINER LES GRAINS ACHETES PAR LES EDILES OU PAR LES CURATORES ET ANNONAE PREFECTI, IN VUE D'UNE DISETTE OU DE L'EVENTUALITE D'UN SIEGE. Capitalism in Antiquity

I. Three Areas We Know of it in Rome: a. Tax Farming (Domainal Farming and Contracting)

With heyer that Potherann.

b. Corn Trade

c. Banking and Finance

II. Transitional : Culture Traits (To what extent are any of these as a rule called a. Speculation Differenting future profiles is which they show: b. Lobby " intruck, willief corruption connected with c. Credit Structure ; collapse of nominal values; business dall capitalistic? To the extent to which they show:

III. Institutional Analysis: (The above factors must be accompanied by:

- 1 a. Economic management employed 3 C. The Market must set the price. z 6. Profits must be made by fluctuating prices on the market.

The role of market elements in making the profit determines the Summary: extent of capitalism.

If production and distribution is controlled by and for the profit of the state, it is not capitalism.

## The Authorities

Rostovtzeff:

- a. Large scale production for the market: i.e. for unknown consumer. Therefore there was capitalism . Fall of capitalism in the fall of the empire.
- b. Admits there is no private trade to speak of.

Weber:

- a. Profits mostly of political origin.
- b. World peace and empire ends "capitalism" of equites. Fall of Empire a separate question. (Due to coastal theory.)

reliented and fin to price Afra his.

Memorandum:

Information to be derived from Aristophanes concerning the Athenian city market.

Translation used:

The Eleven Comedies, Liveright Pub. Corp., N. Y. 1943.

We are here concerned with the play "The Acarnians" which was first presented in January 426 B.C. This was the sixth year of the Peloponnesian War.

Plot:

"The plot is of the simplest. Dicaeopolis, an Athenian citizen, but a native of Acharnae, one of the agricultural demes and one which had especially suffered in the Lacedaemonian invasions, sick and tired of the ill-successes and miseries of the War, makes up his mind. if he fails to induce the people to adopt his policy of 'peace at any price.''to conclude a private and particular peace of his own to cover himself, his family, and his estate." The country people have been driven by the war to take refuge within the walls of Athens. The following passage reveals how much greater role the market normally played in the lives of the townspeople than in that of the peasants:

"... I make sketches in the dust, pull out my loose hairs, muse, think of my fields, long for peace, curse town life and regret my dear country home, which never told me to 'buy fuel, vinegar or oil'; there the word 'buy,' which cuts me in two, was unknown; I harvested everything at will."

Dicaeopolis, having made peace for himself and his family and his estate, proceeds to open up a market. Whether one could actually >>) open a market on ones own estate can not be determined from a play of this sort, but the market which Dicaeopolis sets up in the play throws light on the actual Athenian market.

"For my own part, I make proclamation to all Peloponnesians, Megarians and Boeotians, that to them my markets are open; but I debar Lamachus from entering them."

The above reflects sharply the way in which in ancient Greece admission to, or exclusion from, a market always was a matter of political decision.

Hit would hardly be a jite if are eved actively down. Any? maybe trapplans (a) that this cases be the case it's that in the Athens of 431 Be it admally was the case. "These are the confines of my market-place. All Peloponnesians, Megarians, Boeotians, have the right to come and trade here, provided they sell their wares to me and not to Lamachus. As market-inspectors I appoint these three whips of Leprean leather, chosen by lot. Warned away are all informers and men of Phasis. They are bringing me the pillar on which the treaty is inscribed and I shall erect it in the center of the market, well in sight of all."

We see that a market-place has specific boundaries. Certain foreigners have the right to come and trade, provided they do not trade certain other places. There are market-inspectors, chosen by lot, and the statement that market spies will not be tolerated reveals that market spies were a definite feature of the Athenian market. The market is regulated by a treaty which is posted on a pillar.

Megara had, up to this time, suffered more terribly from the war than any other city in Greece. A Megarian disguises his two daughters as little pigs and brings them to sell in the market Dicaeopolis is conducting.

A question arises as to whether the activities of Dicaeopolis are to be regarded as those of a typical <u>kapelos</u>. This possibility should be kept in mind throughout.

### conversation:

Dic.: "What is wheat selling at?"

Megarian: "With us it is valued as highly as the very gods

in heaven!"

Dicaeopolis buys the "little pigs" from the Megarian:

"Ah! what funny creatures! For what sum will you sell them?" "I will give you one for a bunch of garlic, and the other, if you like, for a quart measure of salt."

The above suggests that barter played a considerable role in such transactions.

Aristophanes describes the blessings which come to Dicaeopolis as a result of his peace which he has made.

"Here is a man truly happy. See how everything succeeds to his wish. Peacefully seated in his market, he will earn his living. . . "

A Boeotian comes to the market of Dicaeopolis:

D. "Ah! good day, Bosotian, sater of good round loaves. What do you bring?"

"All that is good in Boeotia, marjoram, penny-royal, rush mats, lamp-wicks, ducks, jays, woodcocks, water-fowl, wrens, divers."

D. "Tis a very hail of birds that beats down on my market."

"I also bring geese, hares, foxes, moles, hedgehogs, cats, lyres, martins, otters and eels from the Copiac lake."

"Ah! my friend, you, who bring me the most delicious of fish, let me salute your cels."

"Come, thou, the eldest of my fifty Copiac virgins, come and complete the joy of our host."

".... Slaves, hither with the stove and the bellows. Look at this charming eel, that returns to us after six long years of absence. Salute it, my children; as for myself, I will supply coal to do honor to the stranger. Take it into my house; death itself could not separate me from her, if cooked with beet leaves."

"And what will you give me in return?"

"It will pay for your market dues. As to the rest, what do you wish to sell me?"

"why, everything."

"On what terms? For ready-money or in wares from these parts?" "I would take some Athenian produce, that we have not got in Bosotia."

If Dicaeopolis is a <u>kapelos</u> it is to be noted that (whether <u>kapeloi</u> had to be citizens or not) Dicaeopolis is an Athenian citizen. Foreigners come to do trading and sell their produce to him. He buys produce like eels fresh and cooks them. He collects market dues from the Boeotian. It is doubtful that a <u>kapelos</u> did this, but Dicaeopolis may have a combined character of independent administrator of a market and <u>kapelos</u>. Again we note that it is a barter transaction -- though money is offered to the Boeotian, which he refuses.

Aristophanes repeatedly mentions and attacks the market informers, who continuously try to interfere in everything that Dicaeopolis does.

The following passage is of some interest because of the way in which a would-be purchaser "bids" a certain amount for what he wishes to buy:

"Lamachus wants to keep the feast of cups, and I come by his order to bid one drachma for some thrushes and three more for a Copiac eel."

Assuming that Dicaeopolis is a kapelos we have the following picture of what the activities of such a person were:

"Women, children, have you not heard? Faith! do you not heed the herald? Quick! let the hares boil and roast merrily; keep them a-turning; withdraw them from the flame; prepair the chaplets; reach me the skewers that I may spit the thrushes."

"Slave! stir up the fire."

"See, how he knows his business, what a perfect cook! How well he understands the way to prepair a good dinner!"

" You are killing me with hunger; your smoke is choaking your neighbors, and you split our ears with your bawling."

THE ROLE OF ARKET INSTITUTIONS IN TRADE AND BUSINESS IN THE LATE ROMAN REPUBLIC

Inhader then

WAS THE EUSTRESS FIFE OF THE LATE ROMAN REPUBLIC ESSENTIALLY DIFFERENT FROM THAT OF TODAY MICHAEL ROSTOVTREFT INSESTED THAT THE AISWER TO THIS QUESTION WAS IN THE REGATIVE. ECONOMIC LIFE IN THE LATE ROMAN REPUBLIC AND THE PARTY EMPIRE HE WROTED DIFFERED ONLY QUANTITATIVELY BUT NOT QUALITATIVELY FROM THAT OF NODERN TIMES; THERE WAS, AS HE PUT IT, CONSIDERABLE AMOUNT OF TREDING CAFRIED ON IN REGARD TO MANUFACTURED ARTICLES PRODUCED "FOR AN UNKNOWN ONBUMER. BY THE LATTER PHRACE TOSTOVICEFF DEANT THAT TRADE ANDBUSINESS PAS ORGANIZED, AS IT IS TODAY, THROUGH MARKETS, AND THE HE ARDED THIS The or alically, Rostorkef the right. the ada played by ORGANIZATION OF TRACE AND BUSINESS MUST BE EMPHATICALLY ENDORSED. MODERN ECONOMIC LIFE IS CARRIED ON IN AND THROUGH MARKETS, AND THE EXTENT TO WHICH more precisely, if herefore THIS WAS THE CASE IN ROME IS THE QUESTION AT ISSUE. IF MARKET INSTITUTIONS ARE FOUND TO HAVE PLAYED AN IMPORTANT ROLE IN TRADE AND BUSINESS IN THE PERIOD IN QUESTION, ITS ECONOMIC LIFE COULD NOT HAVE BEEN QUALITATIVELY DIFFERENT times FROM THAT OF MODERN BUSINESS; IN THE OPPOSITE CASE, THE OBVERSE CONCLUSION WOULD HAVE TO BE DRAWN. So far the theoretical aspect of the mater. mestion. serions HOWEVER, STAR DOUBTS MUST ARISE AS TO ROSTOVTZEFF'S METHOD OF DEALING sike WITH THE FACTUAL ASPECT OF. THE PROBLEM. THE PRESENCE OR ABSENCE OF MARKETS SHOULD DE DE THEREED BUT RATHER APPROACHED AS A QUESTION REQUIRING EMPIRICAL best existence think not be inferred from the more presence RESEARCH, RECENT INQUIRY HAS SHOWN THAT IN ANTIQUITY, TRADE, EVEN SUCH TRADE TE as of trade and business Described as designed FOR THE UNKNOWN CONSUMER, WAS and in do for as anachest nishitu his interviewed They were of a Typ OFTEN CARRIED ON NOT THROUGH MARKETS BUT BY ADMINISTRATIVE METHODS, SUCH SUL to reduced them role to a minimum. Such TRADE DE CTUROES IS QUALITATIVELY DIFFERENT FROM TRADE CARRIED ON THROUGH for mi stance, IN RECENT TIMES AN INCREASING AMOUNT OF GOVERNMENTAL MARKET INSTITUTIONS. other than TRADING HAS BEEN ORGANIZED BY THE MARKET METHODS, SO THAT THE POINT Also

SHOULD NOT REQUIRE FURTHER ELABORATION. IT MAY SUFFICE TO SAY THAT NON-

MARKET METHODS WERE MUCH MORE GENERALLY EMPLOYED IN ANTIQUITY THAN THEY ARE

and even more it is true that the trick of market institutions of the trime reduced the role of the market in trade and 2. The trime almost to be vanishing point. In any case, it is crucial that the answer almost to be vanishing point. In any case, it is crucial that PY VIRTUE OF I THE PRESENCE OF TRADE AND BUSINESS, BUT MUST BE SHOWN TO BE Empirical eridence must be adde ced in regard to the PRESENT IN TERMS OF FACTE TTEL TO WHICH MARKETS ACTUALLY ORGANIZED THE PROCESS OF TRADING AND BUBINESS AS yearnets the and a formes of organization encomilered in the communic life of antiquity. the second be unated the distinctions made here was and meater infine To speak of muliet trade as merely one of the form the Set. trade, inglies a thorp terstin tim telivien trale white gras again the market trade or market trale way or use with the nichtulins which way or use with the The ogainging vehicle of the trade. The 3 1 de the term Charle (butrade ?) such a plurase as frame ? represe the place at the and a plurase as "he role played by creatists in Trade" much be a meaningle is plurase. Even to it is incompleted of the states. MA S it is inconvolant on us to indre we should indicate what features of their bigger the pushing what the one is the price weeking character, 7 the machel i to the release tofation this feature is in enclance the role of the market wit increase. File othe 6 is the part played by private persons public hand as against the market. As buy as one or he other He we of the market in Janiging

At two points the inquiry requires CONCEPTUAL PRECISION MAY BE DESTRABLE. WHAT EXACTLY DO WE MEAN BY THE ROLE PLAYED BY MARKET ONSTITUTIONS IN BUSINESS LIFE? AND WHAT IS MEANT MERE BY comprised should be here under "BUSINESS LIFE" IN THE TERMS OF THE PERIODE

> TRADE HINGES MAINLY UN THREE PEATURES THE PUNCTION OF MARKETS IN OF MARKET INSTITUTIONS HATTEND!

( in the organization of back THE IMPORTANCE OF THE ROLE PLAYED BY MARKET INSTITUTIONS DEPENDS on the WHAT DEGREE ARE (APART FROM THE NUMBER AND EXTENT OF BUCH INSTITUTIONS) ON THIS to while they are MAKING CAN THEY ONE PRICE? AND DO THEY SAID TO PRODUCE REPRESENT PRIMARHEY & MEETING OF PRIVATE PERSONS AND FIRMS AS AGAINST THAT

OF THE REPRESENTATIVES OF PUBLIC AUTHORITIES?

AS TO THE MEANING OF THE TERM"BUSINESS LIFE," WE SHOULD HATHER THINK OF THIS FIELD OF ACTIVITY IN ANCIENT ROME AS CONSISTING OF TWO DISTINCT "other which we will be breeff call "business" THIS MAY SOUND UNUSUAL IN OUR EARS SINCE IN MODERN TIMES SO LARGE A PART OF BUSINESS CONSISTS PRECISELY IN TRADING ACTIVITIES. HOWEVER, THIS WAS NOT SO IN ANCIENT ROME. IT IS CHARACTERISTIC OF THE PERIOD, THAT TRADE AND BUSINESS CAN BE OFTEN NEATLY SEPARATED. TRADE WAS ON THE WHEN A MENIAL OCCUPATION, CARRIED ON BY FOREIGNERS AND FREEDMEN, the vest of

IN WHICH, AS A RULE, NOT MUCH MONEY WAS MADE MADE, WHILE BUSINESS --WE TODAY most of public contracting and forgels the first of the would call the FINANCE--WAS CONDUCTED BY THE UPPER CLASSES IT WAS A FIELD a knight, the second by the venatorial class. IN WHICH LARGE SUMS WERE INVESTED OR AT ANY RATE TURNED OVER WITH ONLY IN-

CIDENTAL TRADING ACTIVITIES, The in ening ulo thus the refined se carrier on aparately.

online

## PART IS TRADE

THE FIRST SECTION OF THIS PAPER WILL BE DEVOTED TO THE ROLE OF MARKET ELEMENTS IN TRADE. A GENERAL SURVEY WILL BE MADE OF THE DIFFERENT GOODS TRADED, BEGINNING WITH THEIR PRODUCTION INSOFAR AS THIS MAY BE NECESSARY TO SERVE AS A BACKGROULND FOR METHODS OF TRADING. THIS MATERIAL WILL, OF COURSE, BE LIMITED BUT TO THIS WE MUST CONFINE OURSELVES, FOR AS STATED ABOVE, THE DISTINCTIVE VIEWPOINT OF THIS PAPER IS THAT MARKETS CANNOT BE INFERRED FROM THE EXISTENCE OF TRADE AND MONEY BEEN USES, BUT MUST BE SHOWN TO HAVE BEEN EETW ACTUALLY PRESENT. FINALLY, HAVING SURVEYED THE EVIDENCE OF THE PRESENCE OF MARKETS, WE WILL ESTIMATEE THE EXTENT OF MARKET TRADE, AS WELL AS ITS BOCIAL AND POLITICAL INFLUENCE ON THE AFFAIRS OF THE COMMUNITY IN GENEREL.

#

(Note: I THINK I WILL DROP THE SUB-INTRODUCTION "BECTION A: AGRICULTURE AND FOOD MARKETS," AS THIS SEEMS TO HAVE HAD MANY WEAKNESSES, AND, I THINK MAY NEEDLESSLY COMPLICATE THE PAPER. INSTEAD, WE SHALL IMMEDIATELY BEGIN WITH THE FACTUAL SURVEY. YOUR COMMENTS ON THIS OF COURSE ARE HIGHLY DESIRED), AND IF YOU ENENK THINK AN INDTRODUCTION WE WORTHWHILE I SHALL TRY TO PROVIDE ONE.)

## AGRIGULTURE: THE FOOD MARKETS

OUTLINE: 1. EARLY FORUM; 11. THE SEPARATE MARKETS; 111. THE MAGELLUMI A GENERAL MARKET; IV. ARCHITEGTURE; V. PRODUCTS; VI. THE AEDILE; VIII. SUPPLY

> I. EARLY FORUME THERE ARE SOME REFERENCES TO A MARKET SEING HELD PERIODICALLY IN THE EARLIEST TIMES IN THE ROMAN FORUM. THIS VERY LIKELY WAS A MARKET FOR PREPARED FOODS WHEREY THERE WERE BUTCHERS STALLS, SCALED FISH, ETC., WHILE THE MARKETS FOR BASIC COMMODITIES LIKE CATTLE, VEGETABLES, ETC. WERE OUTSIDE THE WALLS OF THE CITY (SEE BELOW.). AS POLITICAL FUNCTIONS DEMANDED MORE AND MORE SPACE THERE, NOWEVER, THE MARKET WAS MOVED ELSEWHERE. ABOUT 310 B.C. WE HAVE A REFERENCE TO BUTCHERS BEING REMOVED FROM THEIR STALLS THERE TO MAKE ROOM FOR BANKERS, WHOSE SHOPS WERE CALLED THE "TABERNAE VETERES." ABOUT 171 B.C. THE LAST OF THE SHOPS WERE MOVED WHEN THE BASILICA SEMPRONIA WAS BUILT.

11. THE GEPARATE MARKETS: BY THE END OF THE THIRD CENTURY B.C. WE HEAR OF A NUMBER OF SEPARATE MARKETS: THE FORUM PISCARIUM (FISH MARKET) NORTH OF THE FORUM BETWEEN THE BASILIGA PORGIA AND THE TEMPLE OF VESTA; THE FORUM BOARIUM, (MEAT MARKET) <u>OUTBIDE</u> THE "SERVIAN" WALL, BETWEEN THE CIRCUM MAXIMUS AND THE TIBER; THE FORUM OLITORIUM (VEGETABLE MARKET), SOUTH OF THE THEATER OF MARCELLUS BETWEEN THE TIBER AND THE CAPITOLINE HILL; THE FORUM COQUINUM, IN THE SAME PLACE, WHERE PROFESSIONAL COOKS OFFERED THEIR SERVICES. FINALLY THERE WAS ALSO THE FORUM CUPPEDINIS, A MARKET FOR DAINTIES BETWEEN THE VIA SAGRA AND THE MACELLUM. IT IS TO BE NOTED THAT THESE PROBABLY HAD THE PERIODIC CHARACTER OF THE EARLY MARKET (NUNDINAE), MEETING EVERY EIGHT DAYS, AND THAT THE GOMMODITY MARKETS (FORA BOARIUM AND HOLITORIUM) WERE OUTSIEDE THE EARLY GITY LIMITS, WHERE FOREIGNERS COULD ALSO TRADE, WHILE THE PREPARED FOOD MARKETS SUCH AS THE BUTCHERS STALLS WERE INXINE WITHIN WHERE THE CITIZEN WHO CAME FOR THE DAY TO DISCUSS POLITICAL MATTERS COULD GET A BITE TO EAT.

111. THE MAGELLUM: A GENERAL MARKET: IN 179 B. C. THE CENSORS M. FULVIUS NOBILIOR AND Q. FABIUS MAXIMUS BUILT A CENTRAL MARKET ON THE SITE OF THE OLD FISH MARKET WHICH HAD BORNED DOWN TWENTY YEARS BEFORE. THE MARKET WAS CALLED THE "MACELLUM", WHICH VARRO TAKES TO COME FROM G EEK USAGE. AS THEDNAT WRITES: "THIS WAS THE FIRST REAL MARKET OF ROME, WHERE THEY SOLD ALL THE PRODUCTS UNTIL THEN BOLD IN THE SPECIAL MARKETS, WHICH ABOUNDED IN FOOD FROM COMMODITIES TRANSPORTED FROM THE COUNTRY OR SENT PROM THE PROVINCES TO ROME." LATER THIS MARKET WAS SUPPLANTED, PROBABLY BY THE MACELLUM LIVIAE BUILT BY AUGUSTUS ABOUT 10 A.D., JUST OUTSIDE THE PORTA ESQUILINA. OTHER LATER IMPERIAL MARKETS GREW UP SUCH AS THE MACELLUM MACELLUM OF NERO ON THE CAELIAN HILL.

IV. ARCHITECTURE: IT IS PRACTICALLY CERTAIN THAT THE ROMAN MARKET WAS SIMILAR TO OTHERS THROUGHOUT THE EMPIRE. AT LEAST THREE OF THESE HAVE BEEN WELL EXCAVATEDI AT POMPETI AND PUTEOLI IN ITALY, AND TIMGAD IN NORTH AFRICA. THEY GAN FURNISH US WITH A GENERAL DESCRIPTION OF WHAT THE ROMAN MACELLIM WAB LIKE.

THE FORME OF THE MAGELLUM WAS A WALLED RECTANGLE ENCLOSING AN OPEN SPACE CALLED "AREA" ONTO WHICH MOST OF THE SHOPS FACED, AND IN THE CENTER OF WHICH WAS A ROUND BUILDING, THE "THOLUS". A GOOD PICTURE OF SUCH A BUILDING AT ROME IS GIVEN IN A COIN OF NERO. A LARGE NUMBER OF FISH SCALES AND BONES WERE FOUND IN THE THOLUS AT POMPEIL, FROM WHICH MAU CONCLUDED THAT IT WAS USED FOR CLEANING FISH WHICH WERE SOLD AT THE MARKET.

THE "AREA" HAD COLONADES ON TWO OR MORE SIDES. BETWEEN THE COLUMNS WERE THE BOOTHS OF THE GALESMEN. FROM TINGAD WE HAVE STONE TABLES ON W ICH THE WARES MUST HAVE BEEN DISPLAYED, AND R FROM POMPEII WE HAVE A PICTURE OF THE FOOD BEING DISPLAYED ON TABLES. THE BOOTHS WERE MODEST IN SIZE AND FAIRLY UNIFORM. THES WERE NOT, ERECTED BY INDIVIDUAL MERCHANTS FOR THEIR OWN USE, BUT BY THE COMMUNITY OR ONE OF ITS BENEFACTORS. THE STALLS WERE USUALLY RENTED OR LEASED AND AT ROME PERHAPS SOLD.

V. PRODUCTS: THE GOODS THAT WERE SOLD INCLUDED FISH, MEAT, VEGETABLES, FRUIT, BREAD, PREPARED MEATS, AND COOKED FOOD, WINE AND PERFUME JARS ALSO HAVE BEEN DISCOVERED, AND FROM A PICTURE AT POMPEII WE SEE THAT LIVE FISH AND BIRDS WERE ALSO ON SALE. MAU ALSO STATES THAT GREIN WAS SOLD THERE, ALTHOUGH IT MAY ALSO HA E BEEN DISTRIBUTED AT OTHER POINTS SUCH AS THE TEMPLE OF CERES, AS IT WAS FROM THE PORTICUS MINUCIUS IN ROME IN THE TIME OF CLAUDIUS.

VI. THE AEDILE: THE AEDILESHIP WAS GRIGINALLY A PEEBIAN OFFICE, FOUNDED SHORTLY AFTER THE TRIBUNESHIP. ITS OFFICE WAS IN THE TEMPLE OF CERES AT Rome, which emphabizes the importance of his duty "to see that the market was supplied with plenty of provisions" (Dion VI 90). Emexawrenxesign

THE SUPERVISION OF THE MARKET WAS ALSO IN THE HANDS OF THE AEDILE. HE PERFORMED THE TASK OF MARKET POLICE SIMILAR TO THE AGORANOMOI OF THE GREEKS. HE KEPT THE OFFICIAL WEIGHTS AND MEASURES OF THE MARKET, SOME OF WHICH HAVE BEEN FOUND AT FOMPEII, WHERE HIS OFFICE WAS FOUND NOT IN THE MARKET BUT INXINEXME AT THE OPPOSITE END OF THE FORUM BY ITS NORTHWEST SIDE. A HE ALSO ENFORCED THE SUMPTUARY LAWS AND SET THE PRICE OF THE NECESSARY COMMODITIES, ESPECIALLY OF THE ANNONA. THE LAST POINT IS OF VITAL SIGNIFICANCE. LIVY GIVES SEVERAL EXAMPLES TO CONFIRM THIS CONCLUSION, BUT THE MOST VIVID PICTURE OF THE POWER OF THE AEDILE TO THE LIFE OF THE COMMON MAN IS GOVEN IN PETRONIUS 44:

"So SATO PHILEROS, BUT GANYMEDE BROKE IN: YOU GO TALKING AB UT THINGS WHICH ARE NEITHER IN HEAVEN NOR IN EARTH AND NONE OF YOU CARE ALL THE TIME HOW THE PRICE OF FOODD RINGES PINCHES. I & SWEAR I CANNOT GET HOLD OF A MOUTHFUL OF BREAD TODAY. AND HOW THE DROUGHT GOES ON! THERE HAS BEEN A FAMINE FOR A WHOLE YEAR NOW ( TAM ESURITO FUIT MEANS HIGH PRICES? ). DAMN THE MADISTRATES (AEDILES) , WHO PLAY 'SCRATCH MY BACK AND I'LL SCRATCH YOURS" IN LEAGUE WITH THE BAKERS (PISTORIBUS). SO THE LITTLE PROPLE COME OFF BADLY; FOR THE JAWS OF THE UPPER CLASSES ARE ALWAYS KEEPING CARNIVAL. I DO WAXN WISH WE HAD THE BUCKS (LEONES) ! FOUND HERE WHEN ! FIRST CAME OUT OF ASIA. THAT WAS LIFE. IF THE FLOUR WAS ANY BUT THE BEST THEY BEAT THOSE VAMPIRES INTO A JELLY, UNTIL THEY PUT THE FEAR OF GOD INTO THEM. I REMEMBER SAFINIUS. HE WAS MORE OF A MUSTARD POT THAN A MAN. USED TO SCORCH THE GROUND WHEREVER HE TROD. STILL HE WAS STRAIGHT ; YOU COULD TRUST HIM, A TRUE FRIEND; YOU WOULD NOT BE AFRAID TO PLAY MORRA WITH HIM IN THE DARK. HOW HE USED TO DRESS THEM DOWN AT THE SENATE HOUSE (CURIA), EVERY ONE OF THEM, NEVER USING ROUNDABOUT PHRASES MAKING A STRAIGHTFORWARD ATTACK. AND WHEN W HE WAS PLEADING IN THE COURTS HIS VOICE USED TO SWELL LIKE A TRUMPET. NEVER ANY SWEATTING OR SPITTING. I IMAGINE HE HAD A TOUCH OF THE ASIANIC STYLE. AND HOW KINDLY HE RETURNED ONE'S GREETING, CALLING EVERYONE B NAME, QUITE LIKE ONE OF OURSELVES. 30 AT THAT TIME FOOD WAS DIRT CHEAP ( ILLO TEMPORE ANNONA PRO LUTO ERAT). YOU COULD BUY A LARGER LOAF FOR A TWOPENCE THAT YOU AND XNORSXEX YOUR BETTER HALF TOGETHER COULD GET THROUGH. ONE EES A BIGGER BUN NOW. LORD THINGS ARE WORSE EVERY DAY. THIS TOWN GOES DOWNHILL LIKE A CALF'S TAIL. BUT WHY DO WE PUT UP WITH A MAGISTRATE (AEDILE) NOT WORTH THREE PEP ER CORNS, WHO CARES MORE ABOUT PUTTING TWOPENCE IN HIS PURSE

Onu

THAN REEPING US ALIVE? HE SITS GRINNING AT HOME AND POCKETS MORE MONEY A DAY THAN OTHER PEOPLE HAVE FOR A PORTUNE. I HAPPEN TO KNOW WHERE HE CAME BY A THOUSAND IN GOLD, IF WE HAD ANY SPUNK IN US HE WOULD NOT BE SO PLEASED WITH HIMSELF. NOWADAYS PEOPLE ARE LIONS IN THEIR OWN HOMES AND FOXES OUT OF DOORS.<sup>3</sup> K

FROM THIS IT IS GLEAR THAT THE AEDILE WAS EXPECTED TO KEEP DOWN THE PRICE O OF FOOD TO A REABONAB E LEVEL, WHICH MAY HAVE HAD AS MUCH TO DO WITH HIS POPULARITY AND FUTURE ELECTION TO HIGHER OFFICES, AS THE MAGNIFICENCE OF THE GAMES FOR WHICH HE WAS ALSO RESPONSIBLE.

VII. THE PRICES THAT THE PRICE COULD BE SET BY THE AEDILE REMINDS & US OF MANY PRIMITIVE FOOD MARKETS WHERE PRICES ARE SET BY OFFICIALS OR BY CUSTOM. THIS MUST SEEM ARTIFICIAL TO MANY WHO ARE ACCUSTOMED TO THINK IN TERMS OF A MODERN SUPPLY-DEMAND PRICE MECHANISM. THEY WOULD ASK IF THE PUBLIC OFFICIALS HELD DOWN THE PRICE OF GRAIN, WHETHER THE EFFECT WOULD NOT BE THAT LESS GRAIN WOULD APPEAR ON THE MARKET AND PRICES EVENTUALLY DE FORGED EVEN HIGHER. HERE LIES THE BABIC DIFFERENCE BETWEEN THE ECONOMICS OF THE ANCIENT WORLD AND THRSE OF MODERN TIMES. THE SUPPLY OF COMMODITIES IN MODERN TIMES IS PROVIDED BY THE WORKING OF THE MARKET ON A WORLD SCALE WHEREBY SELLERS FROM THE WORLD OVER ARE ATTRACTED TO SEEL THEIR BOODS WHEREVER THERE IS FAVORABLE PRICE. BUCH A SYSTEM IMPLIES A UNIVERSAL SYSTEM OF COMMUNICATIONS, TRANSPORT-ATION, AND A MEANS OF EXCHANCE SUCH AS WAS PROVIDED BY THE GOLD STANDARD IN THE 19TH CENTURY. IN THE ANCIENT WORLD, AS FAR AS WE CAN DETERMINE, NO BUCH SYSTEM EVER DEVELOPED. INSTEAD THE LOCAL MARKETS, TO SUPPLEMENT THE PRODUCTS OF THE SURROUNDING COUNTRYSIDE, HAD TO RELY UPON ADMINISTRATIVE MEANS FOR THEIR SUPPLIES.

VIII, GRAIN SUPPLY: A MORE SPECIFIC CASE OF HOW THE LOCAL MARKETS WERE SUPPLIED BY ADMINISTRATATIVE MEANS CAN BE BEEN IN THE CASE OF GRAIN, THE BASIC FOOD OF ANTIQUITY.

IN THE GREEK WORLD, THERE WAS A CONTINUAL QUEST FOR GRAIN. FEW PLACES PRODUCED A BEQULAR SURPLUS. AMONG THESE WAS THE CRIMEA WHERE BERFS PAID LARGE TAXES OF GRAIN TO THE KING. THERE WAS ALSO EGVPT AND SIGILY. SINCE ALEXANDER'S THE GREAT'S INVABION OF INDIA OUT OFF THE BOBPORUS' BUPPLY, EGYPT BECAME PREEMINENT AS A SOURCE OF GRAIN. THE PORY OF TRADE AT ALEXANDRIA ORGANIZED BY THE PTOLEMIES HAD A GREAT ADVANTAGE OVER ALL OTHER MARKETS AS IT HAD A MORE DEPENDABLE SUPPLY OF EXPORTABLE GRAIN AND SO CAME CLOSER THAN ANY OTHER PLACE IN ANTIQUITY TO DEVELOPING INTO AN INTERNATIONAL GRAIN MARKET. EXTER IN THE LATER 2ND CENTURY B.C. WHEN UNDER ROMAN INFLUENCE, EGYPT SOLD HER GRAIN THROUGH DELOS WHICH BECAME THE GREAT GRAIN MARKET OF THAT TIME. FINALLY AUGUSTUS ENDED THE CHANCE FOR THE FEVELOPMENT OF A FREE GORN MARKET IN THE EASTERN MEDITERRANEAN BY TAKING OVER THE ADMINISTRATION OF THE EGYPTIAN GORN SUPPLY AND USING IT TO SUPPLY THE CITY OF ROME.

IN THE EARLY ROMAN REPUBLIC, THE PEASANT PRODUCED A BURPLUS OF CORN WHICH HE MAY HAVE GOLD IN THE CITY. EVENE IN THIS PERIOD, HOWEVER, WE SEE THAT IN TIMES OF BEARGITY THE CITY WOULD ACT TO BRING IN A SUPPLY OF THE VITAL FOOD. "HILE THESE REPERENCES IN LIVY MAY BE AN ANACHRONISM, IT IS VERY PROBABLY THAT, LIKE THE REEK CITIES, ROME HAD TO GUARANTEE A SUPPLY OF FOOD TO THOSE PEOPLE WHO HAD LEFT THEIR FARMS TO TAKE OVER GOVERNMENT SERVICE IN THE CITY.

LATER ROMAN HISTORY SEEMS TO BE MUCH INFLUENCED BY THE QUEST OF THE ROMANS FOR A SECURE AND AMPLE SUPPLY OF CORN. THUS WE HAVE ONE OF THE LEADING MOTIVES ASCRIBED BY LIVY TO THE ROMANS FOR THEIR ENTRANCE INTO CAMPANIA INSPITTE OF A TREATY WITH THE SAMINITES TO THE CONTRARY. LATER THE REGIONS OF SIGILY EGYPT, AND AFRICA WERE TAKEN OVER, AND THEIR GRAIN EXPORT WAS RIGOROUSLY CONTROLLED

As THE SOURCES OF SUPPLY EXPANDED WE HEAR HOW THE CITIZENS AT ROME BENEFITTED BY THE FABOULOUSLY LOW PRICES: IT MUST BE SEPECIALLY NOTED THAT THESE FIGURES COVER SEVERAL CONSECUTIVE YEARS AND ARE NOT LIMITED TO MERELY WARTIME:

203 B.C.	4 ABGES A MODIUS	LIVY XXX 26
202 B.C.	LESS THAT TRANSPORTATION COSTS	LIVY XXX 38
201 B.6.	4 ASSES A MODIUS	LIVY XXXI 4
200 B.C.	2 ASSES A MODIUS	LIVY XXXI 50
196 B.C.	2 ASSES A MODIUS	LIVY XXXIII 42

INTHIS OF COURSE WOULD BE RUINOUS TO THE DEVELOPMENT OF ANY INDEPENDENT GRAIN MARKET SINCE PRIVATE TRADERS WHO ARRIVED THERE WOULD FIND THEY COULD NOT SELL THEIR GRAIN, OR ONLY AT A LOSS. BUT THE IMPORTANT POINT IS THAT THE AUTHORITIES DID NOT RELY ON PRIVATE MERCHANTS, GENERALLY XXXXXXXX FOREIGNERS, TO CARRY THE

9

FOOD TO THE GITY AT A PRICE MADE BY THE COMPETITIVE BIDDING OF THE CITIZENS AGAINST EACH OTHER. RATHER THE SUPPLY WAS GUARANTEED BY THE GOVERNEMENT'S CONTROL OF THE SOURCES OF SUPPLY. THAT PRIVATE SKIPPERS WERE ALLOWED TO CARRY THE GRAIN AND ALSO TO SELL IT AT XX ROME DID NOT CREATE A PRICEMAKING MARKET, SINCE THE SUPPLY WAS CONTROLLED, THE DEMAND RATIONED, WHE THE DESTINATION SET, AND THE PRICE FIXED BY ROMAN OFFICIALS. WHILE THE PRICE THUS SET MIGHT AND DID CHANGE TO SOME EXTENT WITH VARYING RESOURCES, IT WAS THE DUTY OF THE AEDILE TO SEE THAT CORN WAS PROCURED AND MADE AVAILABLE AT THE LOWEST POSSIBLE PRICE, AND IN THIS HE SEEMS TO HAVE BEEN FERY SUCCESSFUL.

FROM THIS WE SEE THAT THE LAWS OF THE GRACCHI GONGERNING THE DISTIBUTION OF CORN WERE NOT AS REVOLUTIONARY A DEPARTURE AS HAS BEEN SOMETIMES ASSUMED, BUT RATHER LEGALIZED A PRACTICE WHICH HAD BEGUN LONG BEFORE AS AN EMERGANCY MEASURE. WITH THE DIMINISHING CORN PRODUCTION OF ITALY AND THE GROWTH OF THE GITY OF ROME, IT HAD BECOME CUSTOMARY TO SELL IMPORTED CORN CHEAP, BUT THERE WAS EVIDENTLY SOME DISCRETION LEFT TO THE AEDILE. IN REGARD TO GRAIN THIS WAS EXXR REMOVED BY THE GRACCHI WHO SET A DEFINITE PRICE OF 6 2/3 ASSES A MODIUS, A VERY LOW ONE.

THESE PUBLIC DISTRIBUTIONS NO DOUBT ALSO HAD THE EFFECT OF FORCING A LOW PRICE ON WHATEVER OTHER GRAIN WAS BOLD OF THE MACELLUM, IF, AS SEEMS LIKELY, IT WAS NOT ALREADY CONTROLLED BY THE AEDILE. ANY ATTEMPT OF THE GRAIN MERCHANTS TO RAISE T E PRICE WAS OF COURSE SEVERELY REPRESSED BY THE AUTHORITIES.

THE EASE WITH WHICH AUGUSTUS WAS ABLE TO TAKE OVER AND CONTROL THE CORN SUPPLY AND SET THE PRICE WAS ONLY POSSIBLE BECAUSE HE HAD MERELY TO COMBINE THE DUTIES OF THE AEDILE WITH THE EMPEROR'S CONTROL OF THE SUPPLY OF EGYPTIAN GRAIN. HAD A TRUE CORN MARKET EVER EXISTED IN ROME AND SUCCEEDED IN FEEDING THE INHABITANTS, IT WOULD HAVE BEEN A MOST DIFFICULT PROPOSITION FOR THE EMPEROR TO HAVE ABOLISHED THE MARKET AND CREATED A SUBSTITUTE FOR IT. AS IT WAS, THE HABITS OF THE PEOPLE MADE THEM LOOK TO THE STATE TO PROVIDE THE SUPPLY AND TO MAKE IT ACCESSIBLE TO THEM AT A LOW PRICE. SO LONG AS THIS

10

REBULT WAS ACHIEVED, ANY ADMINISTRATIVE MEANS WERE ADMISSIBLE,

. 11

1X. OTHER FOODER THE POWER OF THE AEDILE TO SUPERVISE PRICES DID NOT END WITH HIS CONTROL OF THE ANNONA, HOWEVER. WE GAN SEE FROM THE FOLLOWING QUOTATION, ALTHOUGH IT REFERS TO AN OBSCURE TOWN IN THESSALY, THAT THE AEDILE ALSO SUPERVISED THE FISHDEALERS, AND PROBABLY ALL OTHERS WHO SOLD THERE. 12

"WHEN THIS WAS DONE AND ALL MY THINGS BROUGHT INTO THE CHAMBER, 1 WALKED TOWARDS THE BATHS, BUT FIRST ! WENT TO THE PROVISION MARKET (FORUM CUPIDINIS) TO BUY SOME VICTUALS FRO MY SUPPER, WHEREAS I SAW GREAT PLENTY OF FISH SET OUT TO BE SOLD , AND SO I CHEAPENED PART THEREOF, AND THAT WHICH THEY FIRST NELD AT AN HUNDRED PIECES, I BOUGHT AT LENGTH FOR TWENTY PENCE: WHICH WHEN I HAD DONE AND WAS DEPARTING AWAY, PYTHIRS, ONE OF MINE OLD SUNXINX COMPANIONE AND FELLOW AT ATHENS, FORTUNED TO PASS BY, AND VIEWING ME A GOOD SPACE, IN THE END BROUGHT ME KINDLY INT TO HIS REMEMBRANCE, AND GENTLY CAME AND RISSED ME, SAYINGI "O MY DEAR FRIEND LUCIUS, IT IS A GREAT WHILE PAST SINCE WE TWO SAW EACH OTHER, AND MOREOVER, FROM THE TIME THAT WE DEPARTED FROM OUR MASTER VESTIUS I NEVER HEARD ANY NEWS OF YOU; I PRAY YOU LUCIUS, TELL ME OF THE CAUSE OF YOUR PEREGRINATION HITHER." THEN I ANSWERED AND SAID: "I WILL MAKE RELATION THEREOF UNTO YOU TO-MORROWS & BUT WHAT IS THIS? VERILY I THINK XEN THAT YOU HAVE OBTAINED YOUR OWN DESIRE, WHEREOF I AM RIGHT GLAD, FOR I SEE THESE SERVITORS THAT FOLLOW YOU, AND THESE RODS OR VERGES WHICH THEY BEAR; AND THIS HABIT WHICH YOU WEAR, LIKE UNTO A MEGISTRATE," THEN ANSWERED PYTHIAS: "I BEAR THE OFFICE AND RULE OF THE CLERK (AEDILEN) OF THE MARKET, AND THEREFORE, IF YOU WILL AUGHT FOR YOUR SUPPER, SPEAK AND I WILL PURVEY IT FOR YOU," THEN I THANKED HIM HEARTILY AND SAID I HAD BOUGHT FIGH SUFFICIENT ALREADY FOR MY DINNER, B BUT PYTHIAS, WHEN HE ESPIED MY BASKET, TOOK IT AND SHOOK IT, SO THAT THE FISH MIGHT COME TO VIEW, AND DEMANDED OF ME WHAT I PAID FOR ALL MY SPRATS, "IN FAITH," QUOTH 1, "I COULD SCARCE ENFORCE THE FISHMONGER TO SELL THEM FOR TWENTY PENCE"; WHICH WHEN HE HEARD , HE SEIZED MY HAND AND BROUGHT ME BACK AGAIN INTO THE MARKET AND INQUIRED OF ME OF WHOM I HAD BOUGHT SUCH WRETCHED STUFF. I SHEWED HIM THE OLD MAN WHICH SAT IN THE CORNER, WHOM STRAIGHTWAY (BY REASON OF HIS OFFICE) (PRO AEDILITATIS IMPERIO) HE DID GREATLY BLAME, AND SAID: "IS IT THUS THAT YOU SERVE AND HANDLE STRANGERS? AND ESPECIALLY OUR FRIEBDS? WHEREFORE SELL YOU THIS FISH SO DEAR WHICH IS NOT WORTH A HALFPENNY? NOW PERCEIVE I WELL & THAT YOU ARE AN OCCASION TO MAKE THIS PLACE, WHICH IS THE FLOWER OF ALL THESSALY . TO BE FORBAKEN OF ALL MEN AND REDUCE IT INTO AN UNINHABITABLE ROCK, BY REASON OF YOUR EXCESSIVE PRICES OF VICTUALS; BUT ASSURE YOURSELF THAT YOU SHALL NOT ESCAPE WITHOUT PUNSSHMENT, AND YOU SHALL KNOW WHAT MINE OFFICE IS, AND HOW I OUGHT TO PUNISH SUCH AS DO OFFEND," THEN HE TOOK MY BASKET AND CAST THE FISH ON THE BROUND, AND COMMANDED ONE OF HIS SERVANTS TO & TREAD THEM ALL UNDER HIS FEET; SO DOING WAS X PYTHIAS WELL PLEASED WITH THE SEVERITY HE SHEWED IN HIS OFFICE, AND BADE ME FAREWELL, AND SAID THAT HE WAS CONTENT WITH THE SHAME AND REPROACH DONE U NTO THE OLD CAITIFF. So I WENT AWAY, ALL AMAZED AND ASTONISHED, TOWARDS THE BATHS, CONSIDERING MYSELF, AND DEXISING OF THE STRONG MAND OF THAT SO PRUDENT COMPANION OF MINE, PYTHIAS, WHEREBY I HAD LOST BOTH MY MONEY AND MY MEAT: AND THERE , WHEN I HAD WASHED AND REFRESHED MY BODY, I RETURNED AGAIN TO MILO'S HOUSE, AND SO GOT INTO MY CHAMBER,

UNLIKE AGRICULTURE, FOR INDUSTRIAL PRODUCTS WE HAVE NO MENTION OF A RECOGNIZED MARKET. WE BHALL THEN HAVE TO SEARCH FOR SIGNS OF IT INDIRECTLY INI I. PRODUCTIONI WERE THERE LARGE FACTORIES PRODUCING GOODS WHICH WOULD REQUIRE A LARGE MARKET TO DISPOSE OF THEM?

INDUSTRY

14

11. DISTRIBUTION: WHAT KNOWN WAYS WERE GOODS DISPOSED OF? DO THESE POINT TO THE DEVELOPMENT OF A MARKET, OR ARE THEY A SUBSTITUTE FOR IT?

MEN VERY RICH AND POWERFUL AS TODAY?

IV. POLICY: WAS THE IMPORTANCE OF INDUSTRY SHOWN BY ITS INFLUENCE ON GOVERNMENT POLICY IN INTERNATIONAL AFFAIRS OR TAXING POLICIES?

1. PRODUCTION: GOMMERUS DECLARES THAT THERE WAS A DEVELOPMENT OF BIG BUSINESS BASED ON SLAVERY AND CAPITAL. HOWEVER WHEN WE LOOK FOR SPECIFIC LARGE INDUSTRIAL CONCERNS WE HAVE SOME TROUBLE.

A. VERBAL EVIDENCE: IT IS A STRIKING FACT THAT WE HAVE ND CLEAR PROOF OF A WORD WHICH MEANS "FACTORY." "FABRICA" SEEMS TO REFER MOSTLY TO A DIVISION OF THE MILITARY ORGANIZATION. "ERGASTULUM" TO A SLAVE'S WORKHOUSE. "TABERNAE" TO A SELLER'S STALL, SMALL IN SIZE. "OFFICINA", THE MOST LIKELY CANDIDATE BEGAUSE IT IS FOUND ON SOME LAMPS, OFTEN MEANS"STUDIO" DR"WORKSHOP" OF AN INDIVIDUAL.

B. GOVERNMENT FACTORIES: IF OUR ULTIMATE GOAL IS TO FIND EVIDENCES OF A MARKET, WE MUST EXEMPT PRODUCTS WHICH WOULD NOT BE SOLD IN A MARKET. THESE GOODS GOULD BE DISTRIBUTED BY ADMINISTRATIVE MEABS SUCH AS RATIONING (ARMY) OR SOLD AT SET PRICES. THIS INCLUDES MOST OF THOSE INDUSTRIES WHICH APPROACHED LARGE SCALE PRODUCTION, IN THESE THE GOVERNMENT WAS EITHER THE PURCHASER (ARMS, BAKING, GHIPPING) OR THE SELLER (PAPYRUS, CINNABAR, MINES, BRICKS). IN EITHER CASE NO PRICE WAS LIABLE TO FORM THROUGH COMPETITIVE BIDDING OF BUYING AND SELLING CROWDS WHICH IS THE CHARACTERISTIC OF THE MODERN MARKET.

C. GUILD INDUSTRIESI THERE WAS LARGE SCALE TEXTILE PRODUCTION. FROM THE

#### INDUSTRY (2)

15

#### PRODUCTION: GUILD INDUSTRIES:

NECESSITY OF A LARGE WORKROOM, MACHINERY, UTILITIES SUCH AS WATER, IT HAS BEEN BUPPOSED THAT IN WEAVING, TANNING, FULLING, AND DYEING, WE MUST HAVE HAD LARGE FAGTORIES, WITH EQUIPMENT SUPPLIED BY CAPITALISTS. I HOWEVER WOULD LIKE TO PROPOSE THAT THESE WERE SUPPLIED BY THE RESPECTIVE GUILDS. WE DO KNOW THE GUILDS EXISTED AND WERE INFLUENTIAL. WE KNOW OF NOT MORE THAN ONE "CAPITALST" WHO IS CALLED BUCH BECAUSE OF A LARGE DONATION OF MONEY HE MIGHT HAVE ACQUIRED IN BOME OTHER WAY. IN GENERAL, WE KNOW OF NO LARGE FORTUNES MADE IN THESE INDUSTRIES. IN POMPEII WE KNOW OF A GUILD HALL OF THE FULLERS, WHICH WAS GIVEN BY EUMACHIA GIVEN TO THE FULLONES. THIS SES ALSO PROOF OF GUILD OWNED UTILITIES.

D. METALS INDUSTRY: HERE ALSO THE RAW GOODS WERE CONTROLLED BY THE GOVERNMENT, WHICH ALSO BOUGHT MUCH OF THE WARES FOR THE ARMY. BUT EVEN HERE THERE IS LITTLE EVIDENCE FOR LARGE SCALE FACTORIES. THE GOLDSMITHS WERE INDIVIDUAL GRAFTSMEN. IN BRONZE FROM THE FACT WE KNOW OF ONE FACTORY OF & FREEMEN AND > IN ANOTHER, PEOPLE HAVE CONJECTURED WE THE EXISTENCE OF AN INDUSTRY WITH THOUSANDS OF ELAVES. THIS ISCLEARLY WITHOUT FOUNDATION. LIKEWISE IN IRON, IN ROME, THE LARGEST GROUP WE KNOW OF 18 7 ERECOMEN! THE LEAD PIPES FOR AQUEDUCTS WERE MADE BY SMALL GROUPS. WHILE THERE WAS DOUBTEESS A VERY HIGH VOLUME OF PRODUCTION IN THESE GOODS, IN MER 18 FALSE TO ABSUME THIS NECESSITATED LARGE UNITS OF PRODUCTION. MANY SMALL, INDEPENDENT WORKERS, CAN ALSO TURN OUT GREAT AMOUNTS OF MATERIAL.

E. GLASS AND POTTERY WERE ALSO PRODUCED IN GREAT QUANTITY. BUT THE LARGEST UNITS OF PRODUCTION ARE VERY SMALL (14 OR 15 MEN). IN ONE CASE 58 MEN ARE MENTIONED IN A POTTERY FIRM, BUT THIS GEEMS TO BE THE AGME OF THE DEVELOPMENT. GAUL ALSO OFFERS THE POESIBILITY OF LARGE FACTORIES IN THE RUINS OF GRAUFESENQUE AND LEZOUX, WHICH COVER ONE AND NINE KILDMETERS RESPECTIVELY. THIS ALSO MAY, HOWEVER, HAVE BEEN A COLONY OF INDIVIDUAL WORKERS. AT ANY RATE IT DOES NOT SEEM LIKELY THAT THIS WAS LINKED WITH SLAVERY, WHICH WAS ALMOST NON-EXISTENT IN INDUSTRY (3)

11

E. GLASS AND POTTERY (CONTINUED)

THAT PROVINCE ALSO TO BE DISCOUNTED HERE ARE THE WORKSHOPS ON VILLAS, WHICH PRODUCED MAINLY FOR THEMSELVES, AS FORERUNNERS OF THE MEDEVAL MANCA, OR AT THE MOST SUPPLIED THE NEIGHBORING TOWNS.

SUMMARYI WHILE A LARGE QUANTITY OF GOODS WERE PRODUCED, THERE IS LITTLE EVIDENCE THAT THEY NEGESSITATED LARGE FACTORIES. WE KNOW OF NO UNIT OF PRODUCTION NUMBERING OVER A HUNDRED WORKERS. THE LARGEST ONES WERE BAKING AND BRIGKS, THE ONE SUPPLYING THE EMPEROR, THE OTHER OWNED BY HIM. OTHER IMPORTANT PRODUCTS SUCH AS CINNABAR, PAPYRUS, METALS, AND ARMS WERE INTEGRATED BY THE GOVERNMENT WHO ACTED EITHER AS A BUYER OR SELLER. GERTAIN POTTERY FIRMS IN GAUL MAY HAVE BEEN LARGE IN SIZE, BUT LITTLE ES REALLY KNOWN ABOUT THEM. EMEREXISISTED AND ARESISEREEXEMPERATEMENT.

THERE IS THUS LITTLE EVIDENCE FOR LARGE AMOUNTS OF CAPITAL ENVEBTED IN FACTORIES FOR SLAVES AND MACHINERY, WHICH WOULD REQUIRE WIDESPREAD MARKETS FOR DISTRIBUTION. RATHER PRODUCTION SEEMS TO BE ALMOST ENTIRELY IN THE HANDS OF THE SMALL MEMMERETWREE ARTISAN WHO EITHER SELLES TO OR FOR THE GOVERNMENT AT RATES FIXED BY IT, OR WHO DISPOSES OF HIS GOUDS PERSONALLY BY THE WELL KNOWN METHOD OF THE BAZAAR WHICH IS EXAMBBERED NOT A PREDECESSOR OF, BUT A SUBSTITUTE FOR A PRICE MAXING MARKET.

# D. BANKING AND CREDIT did

PROBLEMI TO THE OUT TO WHAT EXTENT BANKING DEVELOPEDY A CREDIT MARKET. MARX MOST AVAILABLE INFORMATION BY TRACING THE "BANKER." gure Two words TRANSLATED INTO ENGLISH, EVEN BY ROS., AS"BANKER the (L) ARGENTARIUS (2) NEGOTIATOR

  - 2. SLAUGHTER BY SULLA
  - 3. RETURN: FAILURE TO BACK CICERO OR POMPEY
  - 4. NEED FOR REFORM AT HOME AS WELL AS ABROAD CATILINE'S REVOLT
  - 5. END: REFORMS OF GAESAR AND AUGUSTUS: TITHES OF ASIA TAKEN FROM PUBLICANI

#### D. SHE SIGNIFICANCE OF THE SOCIETAS:

1. COMPOSED OF UPPER CLASS ROMAN CITIZENS, NOT ITALIANS OR FREEDMEN: POSSIBILITY OF POL. POWER 2. By ITS UNIQUE RIGHT OF INCORPORATION, LIMITED LIABILITY AND SALE OF SHARES PROVIDED

WIDE BASIS FOR INVESTMENT OF CAPITAL.

3. HAS ACCESS TO GREAT RESOURCES, COMMODITIES, AS WELL AS COMMUNICATION AND TRANSPORTATION. 4. Yet never goes in for buying or selling or manufacturing

A. MONEY INVESTED IN IT NOT RELATED TO ECONOMIC PRODUCTION

- 5. PROBLEM: WHY DID IT NOT DEVELOP INTO A MARKET SYSTEM:
  - A. ALL ELEMENTS OF SUPPLY , ETC. SEEM TO BE PRESENT
  - B. OPPORTUNITY TO BUY AND SELL TO ADAERATE TAXES.
  - C. PERHAPS DUE TO GOVERNMENTAL RESTRICTIONS FROM SENATORIAL OPPOSITION
  - D. LACK OF INTEREST OR KNOWLEDGE OF PRODUCTION IN ROMAN UPPER CLASS

E. PILLAGE SEEMS QUICKER AND MORE PROFITABLE.

## Chapter VI LAUNCHING OF A CANOE AND CEREMONIAL VISITING --TRIBAL ECONOMICS IN THE TROBRIANDS

Ι

The cance, painted and decorated, stands now ready to be launched, a source of pride to the owners and to the makers, and an object of admiration to the other beholders. A new sailing craft is not only another utility created; it is more: it is a new entity sprung into being, something with which the future destinies of the sailors will be bound up, and on which they will depend. There can be no doubt that this sentiment is also felt by the natives and expressed in their customs and behaviour. The cance receives a personal name, it becomes an object of intense interest to the whole district. Its qualities, points of beauty, and of probable perfection or faultiness are canvassed round the fires at night. The owner and his kinsmen and fellow villagers will speak of it with the usual boasting and exaggerations, and the others will all be very keen to see it, and to watch its performances. Thus the institution of ceremonial launching is not a mere formality prescribed by custom; it corresponds to the psychological needs of the community, it rouses a great interest, and is very well attended even when the cance belongs to a small community. When a big chief's cance is launched, whether that of Kasanai or Omarakana, Olivilevi or Sinaketa, up to a thousand natives will assemble on the beach.

This festive and public display of a finished cance, with its full paint and ornament, is not only in harmony with the natives' sentiments towards a new sailing craft; it also agrees with the way they treat in general the results of their economic activities. Whether in gardening or in fishing, in the building of houses or in industrial achievements, there is a tendency to display the products, to arrange them, and even adorn at least certain classes of them, so as to produce a big, aesthetic effect. In fishing, there are only traces of this tendency, but in gardening, it assumes very great proportions, and the hendling, arranging and display of garden produce is one of the most characteristic features of their tribal life, and it takes up much time and work.\*

Soon after the painting and adorning of the cance, a date is fixed for the ceremonial launching and trial run, the <u>tasasoria</u> festivities, as they are called. Word is passed to the chiefs and headmen of the neighbouring villages. Those of them who own cances and who belong to the same Kula community have always to come with their cances and take part in a sort of regatta held on the occasion. As the new cance is always constructed in connection with a Kula expedition, and as the other cances of the same Kula community have to be either done up or replaced, it is the rule that on the <u>tasasoria</u> day a whole fleet of brand new or renovated cances assemble on the beach, all resplendent in fresh colours and decoration of cowrie shells and bleached pandanus streamors.

The launching itself is inaugurated with a rite of the <u>mwasila</u> (Kula magic), called <u>Kaytalula wadola waga</u> ("staining red of the mouth of the cance"). After the natives have taken off the plaited coco-nut leaves with which the cance is protected against the sun, the toliwaga chants a spell over some red ochre, and stains both

\*Cf. Chapter II, Divisions III and IV, and some of the following Divisions of this Chapter.

bow and stern of the cance. A special cowrie shell, attached to the prow-board (<u>tabuyo</u>) is stained at each end. After that the cance is launched, the villagers pushing it into the water over pieces of wood transversely placed which act as slips (see Plate XXX). This is done amidst shouts and ululations, such as are made on all occasions when some piece of work has to be done in a festive and ceremonial manner, when, for instance, the harvest is brought in and given ceremonially by a man to his brother-in-law, or when a gift of yams or taro is laid down before a fisherman's house by an inland gardener, or the return gift of fish is made.

Thus the cance is finally launched after the long series of mingled work and ceremony, technical effort and magical rite.

After the launching is done, there takes place a feast, or, more correctly, a distribution of food (<u>sagali</u>) under observation of all sorts of formalities and ritual. Such a distribution is always made when the <u>toliwaga</u> has not built the cance himself, and when he therefore has to repay the cutter of the cance and his helpers. It also takes place whenever the cance of a big chief is launched, in order to celebrate the occasion, to show off his wealth and generosity, and to give food to the many people who have been summoned to assist in the construction.

After the <u>segali</u> (ceremonial distribution of food) is over, as a rule, in the afternoon, the new cance is rigged, the mast is put up, the sail attached, and this and all the other boats make a trial run. It is not a competitive race in the strict sense of the word. The chief's cance, which indeed would as a rule be best and fastest, in any case always wins the race. If it did not sail fastest, the others would probably keep back. The trial run is rather a display of the new cance, side by side with the others.

In order to give one concrete illustration of the ceremonial connected with cance building and launching, it may be well to relate an actual event. I shall therefore describe the <u>tasasoria</u>, seen on the beach of Kaulukuba, in February, 1916, when the new cance of Kasana'i was launched. Eight cances took part in the trial run, that is, all the cances of Kiriwina, which forms what I have called the "Kula community," the social group who make their Kula expeditions in a body, and who have the same limits within which they carry on their exchange of valuables.

The great event which was the cause of the building and renovating of the cances, was a Kula expedition planned by To'ulawa and his Kula community. They were to go to the East, to Kitava, to Iwa or Gawa, perhaps even to Muruwa (Woodlark Island), though with this island the patives do not carry on the Kula directly. As is usual in such cases, months before the approximate date of sailing, plans and forecasts were made, stories of previous voyages were recounted, old men dwelt on their own reminiscences and reported what they have been told by their elders of the days when iron was unknown and everyone had to sail to the East in order to get the green stone quarried in Suloga on Woodlark Island. And sc, as it always happens when future events are talked over round village fires, imagination outran all bounds of probability; and the hopes and anticipations grew bigger and bigger. In the end, everyone really believed his party would go at least to the Easternmost Marshall Bennetts (Gawa), whereas, as events turned out, they did not sail beyond Kitava.

For this occasion a new cance had to be constructed in Kasana'i, and this was done by Ibena himself, the chief of that village, a man of rank equal to the highest chief (his kinaman, in fact) but of smaller power. Ibena is a skilled builder as well as a fair carver, and there is no class of magic in which he does not profess to be versed. The canoe was built, under his guidance; he carved the boards hivself, he also performed the magic, and he was, of course, the toliwaga.

In Omarakana, the cance had to be slightly altered in construction; it had to be re-lashed and re-painted. To do this To'uluwa, the chief, had summoned a master builder and carver from the island of Kitava, the same one who a couple of years before, has built this cance. Also a new sail had to be made for the Omarakana boat, as the old one was too small. The ceremony of <u>tasasoria</u> (launching and regatta) ought by rights to have been held on the beach of Kasana'i, but as its sister village, Omarakana, is so much more important, it took place on Kaulukuba, the sea-shore of the latter.

As the date approached, the whole district was alive with preparations, since the coastal villages had to put their cances in order, while in the inland communities, new festive dresses and food had to be made ready. The food was not to be eaten, but to be offered to the chief for his <u>sagali</u> (ceremonial distribution). Only in Omarakana, the women had to cook for a big festive repast to be eaten on return from the <u>tasasoria</u>. In the Trobriands it is always a sign that a festive event is pending when all the women go in the evening to the bush to collect plenty of firewood. Next morning, this will be used for the <u>kumkumuli</u>, the baking of food in the ground, which is one of the forms of cooking used on festive occasions. On the evening of the <u>tasasoria</u> ceremony, people in Omarakana and Kasana'i were also busy with the numerous other preparations, running to the shore and back, filling baskets with yams for the <u>sagali</u>, getting ready their festive dress and decorations for the morrow. Festive dress means, for a woman, a new grass skirt, resplendent in fresh red, white and purple, and for the man a newly bleached, snow-white pubic leaf, made of the stalk of areca palm leaf.

Early in the morning of the appointed day, the food was packed into baskets of plaited leaf, the personal apparel on top of it, all covered as usual with folded mats and conveyed to the beach. The women carried on their heads the large baskets, shaped like big inverted bells, the men shouldered a stick with two bag-shaped baskets at each end. Other men had to carry the cars, paddles, rigging and sail, as these paraphernalia are always kept in the village. From one of the villages, one of the large, prismatic receptacles for food made of sticks was carried by several men right over the raybwag (coral ridge) to be offered to the chief of Omarakana as a share in the sagali. The whole village was astir, and on its outskirts, through the surrounding groves, parties from inland could be seen making their way rapidly to the shore. I left the village with a party of notables at about eight o'clock in the morning. After leaving the grove of fruit and palm trees which grows especially densely around the village of Omarakana, we entered between the two walls of green, the usual monotonous Trobriand road, which passes through the low scrub. Soon, emerging on a garden space, we could see, beyond a gentle declivity, the rising slope of the raybwag, a mixture of rank vegetation with monumental boulders of grey coral standing out here and there. Through this, the path led on, following in an intricate course between small precipices and towering outcrops, passing huge, ancient ficus trees, spreading around them their many trunks and aerial roots. At the top of the ridge, all of a sudden the blue sea shore through the foliage, and the roar of waves breaking on the reef struck cur ears. Soon we found ourselves among the crowd assembled on the beach, near to the big boat-shed of Omarakana.

By about nine o'clock, everybody was ready on the beach. It was fully exposed to the Eastern sun, but this was not yet sufficiently high to drop its light right from above, and thus to produce that deadly effect of tropical mid-day, where the shadows instead of modelling out the details, blur every vertical surface and make everything dull and formless. The beach appeared bright and gaudy, and the lively brown bodies looked well against the background of green foliage and white sand. The natives were anointed with coco-nut oil, and decorated with flowers and facial paint. Large red hibiacus blossoms were stuck into their hair, and wreaths of the white, wonderfully scented <u>butia</u> flowers crowned the dense black mops. There was a good display of ebony carvings, sticks and lime spoons. There were decorated lime pots, and such objects of personal adornment as belts of red shell discs or of small cowrie shells, nose sticks (very rarely used nowadays), and other articles so well known to everybody from ethnological collections in museums, and usually called "ceremonial," though, as said above (Chapter III, Div. III) the description "objects of parade" would be much more in agreement with the correct meaning of the words.

4

Such popular festivities as the one just being described are the occasions on which these objects of parade, some of which astonish us by their artistic perfection, appear in native life. Before I had opportunities to see savage art in actual display, in its proper, "living" setting, there seemed to me always to exist some incongruity between the artistic finish of such objects and the general crudity of savage life, a crudity marked precisely on the acothetic side. One imagines greasy, dirty, naked bodies, moppy hair full of vermin, and other realistic features which make up one's idea of the "savage," and in some respects reality bears out imagina-tion. As a matter of fact though, the incongruity does not exist when once one has see native art actually displayed in its own setting. A festive mob of natives, with the wonderful golden-brown colour of their skins brought cut by washing and anointing and set off by the gaudy white, red and black of facial paint, feathers and ornaments, with their exquisitely carved and polished ebony ojects, with their finely worked lime pots, has a distinct elegance of its own, without striking one as grotesque or incongruous in any aesthetic detail. There is an evident harmony between their festive mood, the display of colours and forms, and the manner in which they put on and bear their ornaments.

Those who have come from a distance, and who would spoil their decorations by the long march, wash with water and anoint themselves with coco-nut grease immediately before arriving at the scene of festivities. As a rule the best paint is put on later on, when the climax of the proceedings approaches. On this occasion, after the preliminaries (distribution of food, arrival of other cances) were over, and when the races were just going to be started, the aristocracy of Omarakana -- the wives and children of To'uluwa, his relatives and himself -- withdrew behind the shelters, near the boat shed, and proceeded to put on the red, white and black of full facial paint. They crushed young betel-nut, mixed it with lime, and put it on with the pestles of betel mortars; then some of the aromatic black resin (<u>sayaku</u>) and white lime were applied. As the habit of mirrors is not quite well established yet in the Trobriands, the painting was done by one person on the face of another, and great care and patience were displayed on both sides.

The numerous crowd spent the day without taking much refreshment -- a feature strongly differentiating Kiriwinian festivities from our ideal of an entertainment or picnic. No cooking was done, and only a few bananas were eaten here and there, and green coco-nuts were drunk and eaten. But even these refreshments were consumed with great frugality.

As always on such occasions, the people collected together in sets, the visitors from each village forming a group apart. The local natives kept to their own boat houses, those of Omerakana and Kurokaiwa having their natural centres on the beach of Kaulukuba. The other visitors similarly kept together in their position on the beach, according to their local distribution; thus, men from the Northern villages would keep to the Northern section of the beach, those from the South would stick to that point of the compass, so that villages which were neighbours in reality would also be side by side on the shore. There was no mingling in the crowd, and individuals would not walk about from one group to another. The aristocrats, out of personal dignity, humble folk because of a modesty imposed by custom, would keep in their places. To'uluwa sat practically during the whole performance, on the platform erected for this purpose, except when he went over to his boat, to trim it for the race.

The boat shed of Omarakana, round which the chief, his family and the other villagers were grouped, was the centre of all the proceedings. Under one of the palms, a fairly high platform was put up to accommodate To'uluwa. In a row in front of the sheds and shelters, there stood the priematic food receptacles (<u>pwata'i</u>). They had been erected by the inhabitants of Omarakana and Kasana'i, on the previous day, and partially filled with yams. The rest had to be supplied by people from the other villages, on the day of the boat races. As the natives came to the beach on that day, village after village, they brought their contribution, and before settling down on their particular spot on the shore, they paid a visit to the chief and offered him their tributes. These would be put into one of the <u>pwata'i</u>. All the villages did not contribute their share, but the majority did, though some of them brought only a few baskets. One of the villages brought one complete <u>pwata'i</u>, filled with yams, and offered the whole to the chief.

In the meantime, the eight cances arrived, including that of Kasana'i, which had been ceremonially launched that morning with the accompanying magical rite, on its own beach about half a mile away. The cance of Omarakana had also been launched on this morning (Plate XXX), and the same rite performed over it. It ought to have been done by To'uluwa, the chief. As he, however, is quite incapable of remembering magical spells -- in fact, he never does any of the magic which his rank and office impose on him -- the rite was performed on this occasion by one of his kinsmen. This is a typical case of a rule yery stringently formulated by all informants when you ask about it, yet in reality often observed with laxity. If you inquire directly, everyone will tell you that this rite, as all others of the <u>mwasila</u> (Kula magic) has to be done by the <u>toliwaga</u>. But every time when he ought to perform it, To'uluwa will find some excuse, and delegate it to another.

When all the cances were present, as well as all the important villages, at about eleven o'clock a.m., there took place the <u>sagali</u> (ceremonial distribution). The food was given to people from various villages, especially such as took part in the races, or had assisted in the building of the new cance. So we see that food contributed by all the villages before the <u>sagali</u> was simply redistributed among them, a considerable quantity having been added first by the chief; and this indeed is the usual procedure at a <u>sagali</u>. In this case, of course, the lion's share was taken by the Kitavans who helped at the building.

After the <u>sagali</u> was over, the cances were all brought up to one spot, and the natives began to prepare them for the race. The masts were stepped, the fastenings trimmed, the sails made ready (see Plate XXXI). After that the cances all put off and gathered about half a mile off the shore, beyond the fringing reef; and at a sign given by some one on one of them, they all started. As said before, such a run is not a race properly speaking, in which the cances would start scrupulously at the same minute, have the same distance to cover, and which would clearly show which is the fastest. In this case, it was merely, as always, a review of the boats sailing along as well as they were able, a review in which they all began to move, more or less at the same time, went in the same direction, and covered practically the same distance.

As to the time table of the events, the <u>sagali</u> was over before mid-day. There was a pause; and then, at about one p.m., the natives began rigging the cances. Then all hands had a spell, and not before three p.m. were the races started. The whole affair was over by about four o'clock, and half an hour later, the boats from the other villages started to sail home, the people on the shore dispersed, so that by sunset, that is, about six o'clock, the beach was almost deserted.

Such was the <u>tasasoria</u> ceremony which I saw in February, 1916. It was a fine sight from the spectacular point of view. A superficial onlooker could have hardly perceived any sign of white man's influence or interference. I was the only white man present, and besides myself only some two or three rative missionary teachers were dressed in white cotton. Amongst the rest of us there could be seen sparsely a coloured rag, tied round as a neckerchief or head-dress. But otherwise there was only a swarm of naked brown bodies, shining with coco-nut oil, adorned in new festive dress, with here and there the three-coloured grass skirt of a woman (see Plates XXX and XXXI).

But alas, for one who could look below the surface and read the various symptoms of decay, deep changes would be discernible from what must have been the original conditions of such a native gathering. In fact, some three generations ago, even its appearances would have been different. The natives then would have been armed with shields and spears; some would have borne decorative weapons, such as the big sword-clubs of hard wood, or massive ebony cudgels, or small throwingsticks. A closer inspection would have shown many more decorations and ornaments, such as nose-sticks, finely carved lime spatulae, gourds with burnt-in designs, some of which are now out of use, or those used of inferior workmanship or without decoration.

But other and much deeper changes have taken place in the social conditions. Three generations ago both the cances in the water and the people on the shore would have been more numerous. As mentioned above, in the olden days there would . have been some twenty cances in Kiriwina, as against eight at the present time. Again, the far stronger influence of the chief, and the much greater relative importance of the event would have attracted a larger proportion out of the then more numerous population. Nowadays, other interests, such as diving for pearls, working on white man's plantations, divert the native attention, while many events connected with Missions, Government and trading, eclipse the importance of old customs.

Again, the people on the shore would have had to adhere in olden days even more closely to the local distribution, men of the same village community keeping together still more strictly, and looking with mistrust and perhaps even hostility, at other groups, especially those with whom they had hereditary feuds. The general tension would often be broken by squabbles or even miniature fights, especially at the moment of dispersing, and on the way home.

One of the important features of the performance, and the one of which the natives think perhaps most -- the display of food -- would also have been quite different. The chief whom I saw sitting on a platform surrounded by a few wives only, and with small attendance would, under the old conditions, have been the owner of thrice as many wives and consequently relatives-in-law, and as it is these from whom he derives most of his income, he would have provided a much bigger <u>sagali</u> than he is able to do nowadays.

Three generations ago the whole event would have been much more solemn and dramatic to the natives. The very distance to the neighbouring island of Kitava is nowedays dwarfed. In the past, it would not, as now, be quickly obliterated by a white man's steam-launch. Then, the cances on the beach were the only means of arriving there, and their value in the eyes of the natives must have, therefore, been even higher, although they think so much of them now. The outlines of the distant island and the small fleet of cances on the beach formed for the natives the first act of a big over seas expedition, an event of far deeper significance to them then than now. A rich haul of arm-shells, the arrival of many much-coveted utilities, the bringing back of news from the far-off land, all this meant much more in older days than it can mean at present. War, dancing, and the Kula supplied tribal life with its romantic and heroic elements. Nowadays, with war prohibited by the Government, with dancing discredited by missionary influence, the Kula alone remains, and even that is stripped of some of its glamour.

II

Before we proceed to the next stage, we must pause in following the events of a Kula expedition, and consider one or two points of more general importance. I have touched in the narrative, but not dwelt upon, certain problems of the sociology of work. At the outset of the preceding chapter it was mentioned that canoe-building requires a definite organisation of work, and in fact we saw that in the course of construction, various kinds of labour were employed, and more especially towards the end, much use was made of communal labour. Again, we saw that during the launching ceremony payment was given by the owner to the expert and his helpers. These two points therefore, the organisation of labour and communal labour in particular, and the system of payment for experts' work must be here developed.

<u>Organisation of Lebour</u> -- First of all, it is important to realise that a Kiriwinian is capable of working well, efficiently and in a continuous manner. But he must work under an effective incentive: he must be prompted by some duty imposed by tribal standards, or he must be lured by ambitions and values also dictated by custom and tradition. Gain, such as is often the stimulus for work in more civilised communities, never acts as an impulse to work under the original native conditions. It succeeds very badly, therefore, when a white man tries to use this incentive to make a native work.

This is the reason why the traditional view of the lazy and indolent native is not only a constant refrain of the average white settler, but finds its way into good books of travel, and even serious ethnographic records. With us, labour is, or was till fairly recently, a commodity sold as any other, in the open market. A man accustomed to think in terms of current economic theory will naturally apply the conceptions of supply and demand to labour, and he applies them therefore to native labour. The untrained person does the same, though in less sophisticated terms, and as they see that the native will not work well for the white man, even if tempted by considerable payment and treated fairly well, they conclude that his capacity for labour is very small. This error is due to the same cause which lies at the bottom of all our misconceptions about people of different cultures. If you remove a man from his social milieu, you <u>co ipso</u> deprive him of almost all his stimuli to moral steadfastness and economic efficiency and even of interest in life. If then you measure him by moral, legal or economic standards, also essentially foreign to him, you cannot but obtain a caricature in your estimate.

But the natives are not only capable of energetic, continuous and skilful work; their social conditions also make it possible for them to employ organised labour. At the beginning of Chapter IV, the sociology of canoe-building was given in outline, and now, after the details of its successive stages have been filled in, it is possible to confirm what has been said there, and draw some conclusions as to this organisation of labour. And first, as we are using this expression so often, I must insist again on the fact that the natives are capable of it, and that this contention is not a truism, as the following consideration should show. The just mentioned view of the lazy, individualistic and selfish savage, who lives on the bounties of nature as they fall ripe and ready for him, implicitly procludes the possibility of his doing effective work, integrated into an organised effort by social forces. Again, the view, almost universally accepted by specialists, is that the lowest savages are in the pre-economic stage of individualistic search for food, whereas the more developed ones, such as the Trobrianders, for instance, live at the stage of isolated household economy. This view also ignores, when it does not deny explicitly, the possibility of socially organised labour.

The view generally held is that, in native communities each individual works for himself, or members of a household work so as to provide each family with the necessities of life. Of course, a cance, even a masawa, could obviously be made by the members of a household, though with less efficiency and in a longer time. So that there is a priori nothing to foretell whether organised labour, or the unaided efforts of an individual or a small group of people should be used in the work. As a matter of fact, we have seen in cance-building a number of men engaged in performing each a definite and difficult task, though united to one purpose. The tasks were differentiated in their sociological setting; some of the workers were actually to own the cance; others belonged to a different community, and did it only as an act of service to the chief. Some worked in order to derive direct benefit from the use of the cance, others were to be paid. We saw also that the work of felling, of scooping, of decorating, would in some cases be performed by various men, or it might be performed by one only. Certainly the minute tasks of lashing, caulking and painting, as well as sail-making, were done by communal labour as opposed to individual. And all these different tasks were directed towards one aim: the providing the chief or headman with the title of ownership of a canoe, and his whole community with its use.

It is clear that this differentiation of tasks, co ordinated to a general purpose, requires a well developed social apparatus to back it up, and that on the other hand, this social mechanism must be associated and permeated with economic elements. There must be a chief, regarded as representative of a group; he must have certain formal rights and privileges, and a certain amount of authority, and also he must dispose of part of the wealth of the community. There must also be a man or men with knowledge sufficient to direct and co-ordinate the technical operations. All this is obvious. But it must be clearly set forth that the real force which binds all the people and ties them down in their tasks is obedience to custom, to tradition.

Every man knows what is expected from him, in virtue of his position, and he does it, whether it means the obtaining of a privilege, the performance of a task, or the acquiescence in a <u>status quo</u>. He knows that it always has been thus, and thus it is all around him, and thus it always must remain. The chief's authority, his privileges, the customary give and take which exist between him and the community, all that is merely, so to speak, the mechanism through which the force of tradition acts. For there is no organised physical means by which those in authority could enforce their will in a case like this. Order is kept by direct force of everybody's adhesion to custom, rules and laws, by the same psychological influences which in our society prevent a man of the world doing something which is not "the right thing." The expression "might is right" would certainly not apply to Trobriand society. "Tradition is right, and what is right has might" -- this rather is the rule governing the social forces in Boyowa, and I dare say in almost all native communities at this stage of culture.

All the details of custom, all the magical formulae, the whole fringe of ceremonial and rite which accompany cance-building, all these things add weight to the social scheme of duties. The importance of magical ideas and rites as integrating forces has been indicated at the outset of this description. It is easy to see how all the appurtenances of ceremony, that is, magic, decoration, and public attendance welded together into one whole with labour, serve to put order and organisation into it.

Another point must be enlarged upon somewhat more. I have spoken of organised labour, and of communal labour. These two conceptions are not synonymous, and it is well to keep them apart. As already defined, organised labour implies the cooperation of several socially and economically different elements. It is quite another thing, however, when a number of people are engaged side by side, performing the same work, without any technical division of labour, or social differentiation of function. Thus, the whole enterprise of cance-building is, in Kiriwina, the result of organised labour. But the work of some twenty to thirty men, who side by side do the lashing or caulking of the cance, is communal labour. This latter form of work has a great psychological advantage. It is much more stimulating and more interesting, and it allows of emulation, and therefore of a better quality of work. For one or two men, it would require about a month to do the work which twenty to thirty men can do in a day. In certain cases, as in the pulling of the heavy log from the jungle to the village, the joining of forces is almost indispensable. True, the canoe could be scooped out in the raybwag, and then a few men might be able to pull it along, applying some skill. But it would entail great hardships. Thus, in some cases, communal labour is of extreme importance, and in all cases it furthers the course of work considerably. Sociologically, it is important, because it implies mutual help, exchange of services, and solidarity in work within a wide range.

Communal labour is an important factor in the tribal economy of the Trobriand natives. They resort to it in the building of living-huts and storehouses, in certain forms of industrial work, and in the transport of things, especially at harvest time, when great quantities of produce have to be shifted from one village to another, often over a great distance. In fishing, when several cances go out together and fish each for itself, then we cannot speak of communal labour. When on the other hand, they fish in one band, each cance having an appointed task, as is sometimes done, then we have to do with organised labour. Communal labour is also based upon the duties of <u>urigubu</u>, or relatives-in-law. That is, a man's relativesin-law have to assist him, whenever he needs their co-operation. In the case of a chief, there is an assistance on a grand scale, and whole villages will turn out. In the case of a commoner, only a few people will help. There is always a distribution of food after the work has been done, but this can hardly be considered as payment, for it is not proportional to the work each individual does.

By far the most important part communal labour has to play, is in gardening. There are as many as five different forms of communal labour in the gardens, each called by a different name, and each distinct in its sociological nature. When a chief or headman summons the members of a village community, and they agree to do their gardens communally, it is called <u>tangogula</u>. When this is decided upon, and the time grows near for cutting the scrub for new gardens, a festive eating is held on the central place, and there all men go, and <u>takayva</u> (cut down) the scrub on the chief's plot. After that, they cut in turn the garden plots of everyone, all men working on the one plot during a day, and getting on that day food from the owner. This procedure is reproduced at each successive stage of gardening; at the fencing, planting of yams, bringing in supports, and finally, at the weeding, which is done by women. At certain stages, the gardening is often done by each one working for himself, namely at the clearing of the gardens after they are burnt, at the cleaning of the roots of yams when they begin to produce tubers, and at harvesting.

There are, as a rule, several communal feasts during the progress, and one at the end of a <u>tangogula</u> period. Gardens are generally worked in this fashion, in years when big ceremonial dancing or some other tribal festivity is held. This usually makes the work very late, and it has then to be done quickly and energetically, and communal labour has evidently been found suitable for this purpose.

When several villages agree to work their gardens by communal labour, this is called <u>lubalabisa</u>. The two forms do not differ very much except by name, and also by the fact that, in the latter form, more than one chief or headman has to direct the process. The <u>lubalabisa</u> would only be held when there are several small villages, clustered together, as is the case in the village compounds of Sinaketa, Kavataria, Kabwaku or Yalaka.

When a chief or headman, or man of wealth and influence summons his dependents or his relatives-in-law to work for him, the name <u>kabutu</u> is given to the proceedings. The owner has to give food to all those co-operating. A <u>kabutu</u> may be instituted for one bit of gardening, for example, a headman may invite his villagers to do his cutting for him, or his planting or his fencing. It is clear that whenever communal labour is required by one man in the construction of his house or yam store, the labour is of the <u>kabutu</u> type, and it is thus called by the natives.

The fourth form of communal labour is called <u>ta'ula</u>, and takes place whenever a number of villagers agree to do one stage of gardening in common, on the basis of reciprocity. No great or special payments take place. The same sort of communal labour extending over all stages of gardening, is called <u>kari'ula</u>, and it may be counted as the fifth form of communal labour in the gardens. Finally, a special word, <u>tavile'i</u>, is used when they wish to say that the gardens are done by individual labour, and that everyone works on his own plot. It is a rule, however, that the chief's plots, especially those of an influential chief of high rank, are always gardened by communal labour, and this latter is also used with regard to certain privileged plots, on which, in a given year, the garden magic is performed first, and with the greatest display.

Thus there is a number of distinct forms of communal labour, and they show many more interesting features which cannot be mentioned in this short outline. The communal labour used in cance-building is obviously of the <u>kabutu</u> type. In having a cance made, the chief is able to summon big numbers of the inhabitants of a whole district, the headman of an important village receives the assistance of his whole community, whereas a man of small importance, such as one of the smaller headman of Sinaketa or Vakuta, would have to rely on his fellow villagers and relations-in-law. In all these cases, it would be the call of duty, laid down by custom, which would wake them work. The payment would be of secondary importance, though in certain circumstances, it would be a considerable one. The distribution of food during launching forms such a payment, as we have seen in Division I of this chapter. In olden days, a meal of pigs, an abundance of betel-nut and coco-nut and sugar cane would have made a veritable feast for the natives.

Another point of importance from the economic aspect is the payment given by the chief to the builder of the cance. The cance of Omarakana was made, as we saw, for To'uluwa by a specialist from Kitava, who was well paid with a quantity of food, pigs and vaygua (native valuables). Nowadays, when the power of the chiefs is broken, when they have much less wealth than formerly to back up their position, and cannot use even the little force they ever did and when the general breaking up of custom has undermined the traditional deference and loyalty of their subjects, the production of cances and other forms of wealth by the specialist for the chief is only a vestige of what it once was. In olden days it was, economically, one of the most important features of the Trobriand tribal life. In the construction of the cance, which a chief in olden days would never build himself, we meet with an example of this.

Here it will be enough to say that whenever a cance is built for a chief or headman by a builder, this has to be paid for by an initial gift of food. Then, as long as the man is at work, provisional gifts of food are given him. If he lives away from home, like the Kitavan builder on the beach of Omarakana, he is fed by the toliwage and supplied with dainties such as coco-nut, betel-nuts, pigs' flesh, fish and fruits. When he works in his own home, the toliwage will bring him choice food at frequent intervals, inspecting, as he does so, the progress of the work. This feeding of the worker or bringing him extra choice food is called <u>vakapula</u>. After the cance is finished, a substantial gift is given to the master-builder during the ceremonial distribution of food. The proper amount would be a few hundred baaketfuls of yams, a pig or two, bunches of betel-nut, and a great number of coconuts; also, a large stone blade or a pig, or a belt of red shell discs, and some smaller vaygua of the non-Kula type.

In Vakuta, where chieftainship is not very distinct, and the difference in wealth less great, a <u>tolivaga</u> also has to feed the workers during the time of hollowing out, preparing, and building a cance. Then, after the caulking, some fifty basketsful are given to the builder. After the launching and trial run, this builder gives a rope, symbol of the cance, to his wife, who, blowing the conch shell, presents the rope to the <u>toliwaga</u>. He, on the spot, gives her a bunch of betel or bananas. Next day, a considerable present of food, known as <u>yomelu</u>, is given by the chief, and then at the next harvest, another fifty or sixty basketfuls of yams as karibudaboda or closing up gift.

I have chosen the data from two concrete cases, one noted in Kiriwina, the other in Vakuta -- that is, in the district where the chief's power is greatest, and in that where there never has been more than a rudimentary distance in rank and wealth between chief and commoner. In both cases there is a payment, but in Kiriwina the payment is greater. In Vakuta, it is obviously rather an exchange of services, whereas in Kiriwina the chief maintains, as well as rewards his builder. In both cases we have the exchange of skilled services against maintenance by supply of food. We shall pass now to the next coremonial and customary performance in the succession of Kula events, to the display of a new cance to the friends and relatives of the <u>toliwaga</u>. This custom is called <u>kabigidoya</u>. The <u>tasasoria</u> (launching and trial run) is obviously at the same time the last act of shipbuilding, and by its associated magical rite, by the foretaste of sailing, it is also one of the beginning stages of the Kula. The <u>kabigidoya</u> being a presentation of the new cance, belongs to the series of building coremonials; but in so far as it is a provisioning trip, it belongs to the Kula.

The cance is manned with the usual crew, it is rigged and fitted out with all its paraphernalia, such as paddles, baler, and conch shell, and it sets out on a short trip to the beaches of the neighbouring villages. When the cance belongs to a compound settlement like Sinaketa, then it will stop at every beach of the sister villages. The conch shell is blown, and people in the village will know "The kabigidoya men have arrived." The crew remains in the cance, the toliwaga goes ashore, taking one paddle with him. He goes to the house of his fellow-headman and thrusts the paddle into the frame of the house, with the words: "I offer thee thy bisila (pandanus streamer); take a vaygua (valuable), catch a pig and break the head of my new cance." To which the local headman will answer -- giving a present: "This is the katuvisala dabala (the breaking of the head) of thy new cance!" This is an example of the quaint customary wording used in the exchange of gifts, and in other ceremonial transactions. The bisila (pandanus streamer) is often used as a symbol for the cance, in magical spells, in customary expressions, and in idiomatic terms of speech. Bleached pandanus streamers are tied to the mast, rigging and sail; a specially medicated strip is often attached to the prow of the cance to give it speed, and there is also other bisila magic to make a district partner inclined for Kula.

The gifts given are not always up to the standard of those mentioned in the above customary phrase. The kabigidoya, especially from the neighbouring villages, often brings only a few mats, a few dozen coco-nuts, some betel-nut, a couple of paddles, and such articles of minor value. And even in these trifles there is not much gain from the short kabigidoya. For as we know, at the beginning of the Kula all the canoes of, say, Sinaketa or Kiriwina are either rebuilt or renewed. What therefore one cance receives on its kabigidoya round, from all the others, will have to be more or less returned to them, when they in their turn kabigidoya one after the other. Soon afterwards, however, on an appointed day, all the cances sail together on a visit to the other districts, and on this kabigidoya, they receive as a rule much more substantial presents, and these they will only have to return much later, after a year or two, when the visited district will come back to them on their own kabigidoya. Thus, when the cances of Kirwina are built and renovated for a big Kula expedition, they will sail South along the coast, and stop first in Olivilevi, receiving presents from the chief there, and walking on a round of the inland villages of Luba. Then they will proceed to the next sea village, that of Wawela, leaving their cances there, and going from there across to Sinaketa. Thence they proceed still further South, to Vakuta. The Villages on the Lagoon, such as Sinaketa and Vakuta, will return these visits, sailing North along the Western shore on the Lagcon side. Then they stop at Tukwaukwa or Kavataria, and from there walk inland to Kiriwina, where they receive presents (see Map IV, p. 50).

The <u>kabigidoya</u> trips of the Vakutans and Sinaketans are more important than those of the Northern or Eastern districts, because they are combined with a preliminary trade, in which the visitors replenish their stock of goods, which they will need presently on their trip South to Dobu. The reader will remember that Kuboma is the industrial district of the Trobriands, where are manufactured most of the useful articles, for which these islands are renowned in the whole of Eastern New Guinea. It lies in the Northern half of the island, and from Kiriwina it is only a few miles walk, but to reach it from Sinaketa or Vakuta it is necessary to sail North. The Southern villages therefore go to Kavataria, and from there walk inland to Bwoytalu, Luya, Yalaka and Kadukwaykela, where they make their purchases. The inhabitants of these villages also when they hear that the Sinaketans are anchored in Kavataria, bring their wares to the cances.

A brisk trade is carried on during the day or two that the Sinaketans remain in Kavataria. The natives of Kuboma are always eager to buy yams, as they live in an unfertile district, and devote themselves more to industrial productions than to gardening. And they are still more eager to acquire coco-nuts and betel-nut, of which they have a great acarcity. They desire besides to receive in exchange for their produce the red shell discs manufactured in Sinaketa and Vakuta, and the turtle-shell rings. For objects of great value, the Sinaketans would give the big clay pots which they receive directly from the Amphletts. For that they obtain different articles according to the villages with which they are exchanging. From Bwoytalu, they get the wonderfully fashioned and decorated wooden dishes of various sizes, depths and finish, made out of either hard or soft wood; from Bwaytelu, Wabutuma and Buduwaylaka, armlets of plaited fern fibre, and wooden combs; from Buduwaylaka, Yalaka, and Kadukwaykela, lime pots of different qualities and sizes. From the villages of Tilataula, the district North-east of Kuboma, the polished axe blades used to be acquired in olden days.

I shall not enter into the technicalities of this exchange, nor shall I give here the approximate list of prices which obtain. We shall have to follow the traded goods further on to Dobu, and there we shall see how they change hands again, and under what conditions. This will allow us to compare the prices and thus to gauge the nature of the transaction as a whole. It will be better therefore to defer all details till then.

IV

Here, however, it seems necessary to make another digression from the straight narrative of the Kula, and give an outline of the various forms of trade and exchange as we find them in the Trobriands. Indeed, the main theme of this volume is the Kula, form of exchange, and I would be untrue to my chief principle of method, were I to give the description of one form of exchange torn out of its most intimate context; that is, were I to give an account of the Kula without giving at least a general outline of the forms of Kiriwinian payments and gifts and barter.

In Chapter II, speaking of some features of Trobriand tribal life, I was led to criticise the current views of primitive economic man. They depict him as a being indolent, independent, happy-go-lucky, yet at the same time governed exclusively by strictly rational and utilitarian motives, and logical and consistent in his behaviour. In this chapter again, in Division II, I pointed out another fallacy implied in this conception, a fallacy which declares that a savage is capable only of very simple, unorganised and unsystematic forms of labour. Another error more or less explicitly expressed in all writings on primitive economics, is that the natives possess only rudimentary forms of trade and exchange; that these forms play no essential part in the tribal life, are carried on only spasmodically and at rare intervals, and as necessity dictates. Whether we have to deal with the wide-spread fallacy of the primitive Golden Age, characterised mainly by the absence of any distinction between <u>mine</u> and <u>thine</u>; or whether we take the more sophisticated view, which postulates stages of individual search for food, and of isolated household catering; or if we consider for the moment the numerous theories which see nothing in primitive economics but simple pursuits for the maintenance of existence -- in none of these can we find reflected even a hint of the real state of affairs as found in the Trobriands; namely, that <u>the whole tribal life is permeated by a constant give and take</u>; that every ceremony, every legal and customary act is done to the accompaniment of material gift and counter gift; that wealth, given and taken, is one of the main instruments of social organisation, of the power of the chief, of the bonds of kinship, and of relationship in law.\*

These views on primitive trade, prevalent though erroneous, appear no doubt quite consistent, that is, if we grant certain premises. Now these premises seem plausible, and yet they are false, and it will be good to have a careful look at them so that we can discard them once and for all. They are based on some sort of reasoning, such as the following one: If, in tropical conditions, there is a plenty of all utilities, why trouble about exchanging them? Then, why attach any value to them? Is there any reason for striving after wealth, where everyone can have as much as he wants without much effort? Is there indeed any room for value, if this latter is the result of scarcity as well as utility, in a community, in which all the useful things are plentiful? On the other hand, in those savage communities where the necessities of life are scarce, there is obviously no possibility of accumulating them, and thus creating wealth.

Again, since, in savage communities, whether bountifully or badly provided for by nature, everyone has the same free access to all the necessities, is there any need to exchange them? Why give a basketful of fruit or vegetables, if everybody has practically the same quantity and the same means of procuring it? Why make a present of it, if it cannot be returned except in the same form?\*\*

\* I am adducing these views not for any controversial purposes, but to justify and make clear why I stress certain general features of Trobriand Economic Sociology. My contentions might run the danger of appearing as gratuitous truisms if not thus justified. The opinion that primitive humanity and savages have no individual property is an old prejudice shared by many modern writers, especially in support of communistic theories, and the so-called materialistic view of history. The "communism of savages" is a phrase very often read, and needs no special quotation. The views of individual search for food and household economy are those of Karl Bucher, and they have directly influenced all the best modern writings on Primitive Economics. Finally, the view that we have done with Primitive Economics if we have described the way in which the natives procure their food, is obviously a fundamental premise of all the naive, evolutionary theories which construct the successive stages of economic development. This view is summarised in the following sentence: "... In many simple communities, the actual food quest, and operations immediately arising from it, occupy by far the greater part of the people's time and energy, leaving little opportunity for the satisfaction of any lesser needs." This sentence, quoted out of "Notes and Queries on Anthropology," p. 160, article on the "Economics of the Social Group," represents what may be called the official view of contemporary Ethnology on the subject, and in perusing the rest of the article, it can be easily seen that all the manifold economic problems, with which we are dealing in this book, have been so far more or less neglected.

\*\* These views had to be adduced at length, although touched upon already in Chapter II, Division IV, because they imply a serious error with regard to human
